

FOUNDATION PROGRAM (B.SC. (AG.ENV.SC.))

Offered by: Agricultural & Env.Sc.-Dean (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 45

Program Description

The B.Sc.(Ag.Env.Sc.); Foundation Program is designed to provide core science prerequisites for those entering university for the first time from a high school system (outside of the Quebec CEGEP system).

All majors except Agricultural Economics: Required Courses (27 credits)

Expand allContract all

Course	Title	Credits
AEBI 120	General Biology.	3
AECH 110	General Chemistry 1.	4
AECH 111	General Chemistry 2.	4
AEMA 101	Calculus 1 with Precalculus.	4
AEMA 102	Calculus 2.	4
AEPH 112	Introductory Physics 1.	4
AEPH 114	Introductory Physics 2.	4

Elective Course (3 credits)

Course selection is done in consultation with the program advisor.

Foundation Program (B.Sc. (F.Sc.)) (30 credits)

Offered by: Food Science & Agr. Chemistry (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Food Science)

Program credit weight: 30

Program Description

The B.Sc.(F.Sc.); Foundation Program is designed to provide core science prerequisites for those entering university for the first time from a high school system (outside of the Quebec CEGEP system).

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).

- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (30 credits)

FDSC 230	Organic Chemistry.	4

Foundation Program (B.Sc. (Nutr.Sc.)) (30 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 30

Program Description

The B.Sc.(Nutr.Sc.) Foundation Program is designed to provide the required science entrance prerequisites for students entering university for the first time from a high school system (outside of the Quebec CEGEP system).

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Animal Biology Minor (B.Eng.) (24 credits)

Offered by: Animal Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Engineering (Bioresource)

Program credit weight: 24

Program Description

The Minor Animal Biology is intended for students who wish to further their studies in the basic biology of large mammals and birds. Successful completion of the program should provide students with a sound background in the field of biomedical studies and the use of animal models. It should also qualify students to apply to most veterinary colleges in North America, to study in a variety of postgraduate biology programs, and to work in many laboratory settings.

This Minor is not open to students in B.Sc.(Ag.Env.Sc.) programs. These students may register for the specialization in Animal Biology.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Animal Health and Disease Minor (B.Eng.) (24 credits)

Offered by: Animal Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Engineering (Bioresource)

Program credit weight: 24

Program Description

The Minor in Animal Health and Disease is offered to students wishing to understand general animal physiology and function, the susceptibility of animals to various diseases, methods for limiting and controlling potential outbreaks, and the resulting implications for the animal, the consumer, and the environment. It is an ideal choice for students who are interested in the care of animals, or in working in laboratories where diseases are being researched. It would also be useful to students who wish to apply to most veterinary colleges in North America.

This Minor is not open to students in B.Sc.(Ag.Env.Sc.) programs. These students may register for the specialization in Animal Health and Disease.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Livestock Specialization (B.Sc.(Ag.Env.Sc.)) (18 credits)

Offered by: Animal Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 18

Program Description

The Specialization in Livestock focuses on essentials of livestock production as it relates to providing food and other resources to consumers. The key components of livestock management (reproductive physiology, breeding and genomics, nutrition, and welfare with hands-on farm experience), including precision animal agriculture and highlights provincial and national livestock industries in a global context. This Specialization may be taken with the Major in Sustainable Agricultural Systems with connections to Crops, Vegetables, and Global Food Security, as well as an opportunity to take dedicated agronomic content leading to an additional Specialization in Professional Agrology, thereby meeting the eligibility requirements for the Ordre des agronomes du Québec.

Bioresource Engineering Honours (B.Eng. (Bioresource)) (113 credits)

Offered by: Bioresource Engineering (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Engineering (Bioresource)

Program credit weight: 113

Program Description

The B.Eng.(Bioresource); Honours in Bioresource Engineering program focuses on biological, agricultural, food, environmental areas, and applying professional engineering skills to biological systems. The design and implementation of technology for the creation of bio-based products, including food, fibre, fuel, and biomaterials, while sustaining a healthful environment. Graduates of this program are eligible for registration as professional engineers in any province across Canada, as well as in some international jurisdictions.

Farm Management Technology (Diploma of College Studies)

Offered by: Agricultural & Env.Sc.-Dean

Degree: Farm Management Technology

Program Description

This three-year academic and practical program is offered on the Macdonald campus and taught by the staff of the Faculty of Agricultural and Environmental Sciences of McGill University. The program is funded by the Ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec and authorized by the Ministère de l'Éducation, Enseignement supérieur, et Recherche (MEESR).

The educational goals of the program are:

1. to make our graduates competent in the exercise of their profession;
2. to help the student's integration into professional life;
3. to foster professional mobility;
4. to foster a need for continual development of professional knowledge.

Program Overview

Six academic terms are spent on the Macdonald Campus studying a sequence of courses in soil, plant science, animal science, engineering, and management. The first summer of the program includes a 13-week internship on an agricultural enterprise other than the home farm, or an agricultural business, where the student learns the many skills related to modern commercial agriculture. Students prepare for their Agricultural Internship during both academic semesters of Year 1 through two Stage courses.

During the second summer, students are registered in Enterprise Management 1. During this period, the students will be responsible for data collection to be used in the next two Enterprise Management courses and the Nutrient Management Plan course when they return to the campus for the Fall semester. These internships will enable the students to relate their academic work to the reality of farming and of the agri-food sector.

Finally, courses in English, Français, Humanities, Physical Education, and two complementary subjects taken during the program will entitle the student to receive a Diploma of College Studies (DEC) from the MEESR.

Elective Production Courses

We offer four production courses in the area of Animal Science and four production courses in the area of Plant Science. Students must take a minimum of two courses in each category for a total of four courses. Students could elect to take more than four courses if they wish, after a discussion with their academic adviser. They must take a minimum of two courses per semester.

FMT4 036	Field Crop Management 2 (152-VTN-MC).	2.67

Complementary Courses

Students must take two complementary courses to meet the program requirements. The program offers the following.

¹

After consultation with their academic adviser, students can substitute complementary courses taken at another collegial

institution. This includes science courses which are required for further studies in a degree program. The cost associated with courses taken elsewhere must be assumed by the students.

Course	Title	Credits
FMTP 074	Complementary Course 2.	2
FMTP 097	Landscape Design (504-VSG-MC).	2

Comprehensive Assessment

The objective of this examination is to ensure that students have attained the objectives and standards for each competency in the program. Successful completion of the Comprehensive Assessment is mandatory to obtain the DEC.

The passing grade is 60%. The mark indicating that the student has successfully completed the Comprehensive Assessment will appear on the student's transcript.

English Exit Examination

All students who wish to graduate and obtain the DEC must pass the English Exit Examination that is prepared and corrected by the MEESR. Students must take this examination on the dates selected by the MEESR.

Food Science - Food Chemistry Option (B.Sc.(F.Sc.)) (90 credits)

Offered by: Food Science&Agr.Chemistry (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Food Science)

Program credit weight: 90

Program Description

This program is intended for those students interested in the multidisciplinary field of food science. The courses are integrated to acquaint the student with food processing, food chemistry, quality assurance, analytical procedures, food products, standards, and regulations. The program prepares graduates for employment as scientists in industry or government, in regulatory, research, quality assurance, or product development capacities.

Graduates have the academic qualifications for membership in the Canadian Institute of Food Science and Technology (CIFST). Graduates of the Food Science Major with Food Chemistry Option can also qualify for recognition by the Institute of Food Technologists (IFT) and the Ordre des chimistes du Québec (OCQ). Food Chemistry Option is completed to 90 credits with free elective courses.

Please refer to "Faculty Information and Regulations" > "Minimum Credit Requirements" in this Course Catalogue for prerequisites and minimum credit requirements.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (54 credits)

Note: If an introductory CEGEP-level Organic Chemistry course has not been completed, then FDSC 230 Organic Chemistry must be completed as a replacement.

Electives (6 credits)

Electives are selected in consultation with an academic adviser, to meet the minimum 90-credit requirement for the degree. A portion of these credits should be in the humanities/social sciences.

Food Science/Nutritional Science Honours (Concurrent) (B.Sc.(F.Sc.)) and (B.Sc.(Nutr.Sc.)) (122 credits)

Offered by: Food Science&Agr.Chemistry (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Food Science)

Program credit weight: 122

Program Description

Students can use their electives to complete the Honours program. The courses credited to the Honours program must be in addition to any required or complementary courses taken to satisfy the requirements of the student's major and specialization.

In addition to satisfying the research requirements, students must apply for the Honours program in March or April of their U3 year. It is the responsibility of the student to find a professor who is willing to support and supervise the research project. No student will be accepted into the program until a supervisor has agreed to supervise the student. Applicants must have a minimum CGPA of 3.3 to enter the Honours program and they must earn a B grade (3.0) or higher in the courses making up the Honours program. Students are required to achieve a minimum overall CGPA of 3.3 at graduation to obtain honours. Students can use their electives to complete the Honours program. The courses credited to the Honours program must be in addition to any required or complementary courses taken to satisfy the requirements of the student's major and specialization.

The Honours program consists of 12 credits of courses that follow one of two plans listed below.

Students who meet all the requirements will have the name of their program changed to include the word "Honours."

Refer to "Faculty Information and Regulations" > "Minimum Credit Requirements" in this Course Catalogue for prerequisites and minimum credit requirements.

Honours Courses

Students choose either Plan A or Plan B.

Honours Plan A

Two 6-credit Honours research courses in the subject area of the student's major, chosen in consultation with the Program Director of the student's major and the professor who has agreed to supervise the research project.

Expand allContract all

Course	Title	Credits
FAES 401	Honours Research Project 1.	6
FAES 402	Honours Research Project 2.	6

Honours Plan B

A minimum of two 3-credit Honours courses and 6 credits in 400- or 500-level courses, from the Faculty of Agricultural and Environmental Sciences, selected in consultation with the Program Director of the student's major. The topic of the Honours research project must be on a topic related to their major and selected in consultation with the Program Director of the student's major and the professor who has agreed to supervise the research project.

FAES 406	Honours Project 2.	3

Elective Courses (6 credits)

Electives are selected in consultation with an academic adviser, to meet the minimum 90-credit requirement for the degree. A portion of these credits should be in the humanities/social sciences.

Food Science (Certificate) (30 credits)

Offered by: Food Science&Agr.Chemistry (Faculty of Agricultural and Environmental Sciences)

Degree: Certificate in Food Science

Program credit weight: 30

Program Description

This program is geared toward mature students, who have an undergraduate degree in a science-related discipline, to acquire the basic knowledge in the food science area to enter food-related industries or a food science graduate program. Students must complete a core course that introduces them to the basics of the field of food science and then choose complementary courses that allow a broad-based exposure in areas such as food chemistry/analysis, food microbiology/nutrition, quality assurance/safety, processing/engineering, communication skills, and ethics.

Required Course (3 credits)

Dietetics Major (B.Sc. (Nutr.Sc.)) (115 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 115

Program Description

The B.Sc.(Nutr.Sc.); Major in Dietetics is a 3.5 year competency-based program that focuses on food and nutrition, leadership, communication skills, management skills and critical thinking. The program includes 40 weeks of internship Professional Practice (Stage). The stage domains include: clinical nutrition care, public health nutrition and food provision management. The program is accredited by Accreditation Canada, and recognized by the Ordre des diététistes-nutritionnistes du Québec (ODNQ). Graduates of this accredited program are eligible to apply to become registered as a professional dietitian with the regulatory body of any province in Canada.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (112 credits)

Required courses and Professional Practice (Stage) courses are sequenced in a specific order over nine terms (3.5-year program). See <https://www.mcgill.ca/nutrition/programs/undergraduate/dietetics> for detailed information regarding the undergraduate program plan.

Elective Courses (3 credits)

3 credits, chosen in consultation with the academic adviser.

Compulsory Immunization

A compulsory immunization program exists at McGill which is required for Dietetics students. Students should complete their immunization upon commencing Year 1 of the Dietetics Major. Confirmation of immunization will be coordinated by the Student Wellness Hub (<https://www.mcgill.ca/wellness-hub/>). Certain deadlines apply.

Nutrition Honours (B.Sc. (Nutr.Sc.)) (90 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 90

Program Description

B.Sc.(Nutr.Sc.); Honours in Nutrition is intended for students who are interested in gaining a concentrated research experience in Human Nutrition. Students in the B.Sc.(Nutr.Sc.) Nutrition Major program who have a CGPA of at least 3.6, and a grade of at least A- in all NUTR courses can apply to transfer in Winter U2 term. It is the responsibility of each student to find a professor to support and supervise a research project. Graduation requires completion of a minimum of 90 credits, with CGPA of at least 3.6, and a grade of at least A- in all NUTR courses. Students who do not maintain Honours standing may transfer registration to the B.Sc.(Nutr.Sc.) Nutrition Major.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Nutrition Major - Food Function and Safety (B.Sc. (Nutr.Sc.)) (90 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 90

Program Description

This Major offers a core emphasis on the scientific fundamentals of nutrition and metabolism throughout the lifespan from the molecular to the organismal level. The concentration in food function and safety covers the ranges from health effects of phytochemicals and food toxicants, food chemistry and analysis, food safety, product development and influence of constituents of food on health.

This degree does not lead to professional licensure as a Dietitian/Nutritionist. Graduates are qualified for careers in the biotechnology field, pharmaceutical and/or food industries, government laboratories, and the health science communications field. Graduates often continue on to graduate studies preparing for careers in research, medicine, and dentistry or as specialists in nutrition.

Refer to "Faculty Information and Regulations" > "Minimum Credit Requirements", in this Course Catalogue for prerequisites and minimum credit requirements.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Nutrition Major - Global Nutrition (B.Sc.(Nutr.Sc.)) (90 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 90

Program Description

This Major covers many aspects of human nutrition and food and their impact on health and society at the community and international level. It offers a core emphasis on the scientific fundamentals of nutrition and metabolism throughout the lifespan. The specialization in global nutrition emphasizes the importance of the interaction of nutrition, diet, water, environment, and infection. This degree does not lead to professional licensure as a Dietitian/Nutritionist. Graduates are qualified for careers in national and international governmental and

Nutrition Major - Metabolism, Health and Disease (B.Sc. (Nutr.Sc.)) (90 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 90

Program Description

This Major offers a core emphasis on the scientific fundamentals of nutrition and metabolism throughout the lifespan from the molecular to the organismal level. This concentration emphasizes the influence of diet and nutrition on human health and the pathophysiology of inherited and acquired chronic disease. The links of nutrigenomics, nutrigenetics, and biotechnology with human health and regulation of metabolism are explored. This program does not lead to professional licensure as a dietitian/nutritionist.

Nutrition Major - Sports Nutrition (B.Sc.(Nutr.Sc.)) (90 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Nutritional Sciences)

Program credit weight: 90

Program Description

This Major offers a core emphasis on the scientific fundamentals of nutrition and metabolism throughout the lifespan from the molecular to the organismal level. The concentration in sports nutrition integrates the influence of exercise and physical activity on health and chronic disease prevention. This degree does not lead to professional licensure as a Dietitian/Nutritionist. Graduates are qualified for careers in the biotechnology field, pharmaceutical and/or food industries, government laboratories, and the health science communications field. Graduates often continue on to graduate studies preparing for careers in research, medicine, and dentistry or as specialists in nutrition.

Elective Courses (15 credits)

15 credits of electives are taken to meet the minimum credit requirement for the degree. Reciprocal agreement allows all students to take a limited number of electives at any Quebec university. With prior approval, students can take electives at any Canadian or international university.

Human Nutrition Minor (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Human Nutrition (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The Minor Human Nutrition is intended to complement a student's primary field of study by providing a focused introduction to the metabolic aspects of human nutrition. It is particularly accessible to students in Biochemistry, Biology, Physiology, Anatomy and Cell Biology, Microbiology and Immunology, Animal Science, or Food Science programs. The completion of 24 credits is required, of which at least 18 must not overlap with the primary program. All courses must be taken in the appropriate sequence and passed with a minimum grade of C. Students may declare their intent to follow the Minor program at the

beginning of their U2 year. They must then consult with the academic adviser in the School of Human Nutrition to obtain approval for their course selection. Since some courses may not be offered every year and many have prerequisites, students are cautioned to plan their program in advance.

The Minor program does not carry professional recognition; therefore, it is not suitable for students wishing to become nutritionists or dietitians. However, successful completion may enable students to qualify for many postgraduate nutrition programs.

Note:

Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Agribusiness Specialization (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The development of commercial agriculture relies on a large supporting sector of manufacturing and service companies involved in the supply of inputs to farming and the transportation, processing, and marketing of agricultural and food products.

This 24-credit specialization includes courses in agricultural sciences, agribusiness, and courses at the Desautels Faculty of Management.

This specialization is limited to students in the Major in Agricultural Economics.

Agricultural Economics Honours (B.Sc.(Ag.Env.Sc.)) (42 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 42

Program Description

This program is currently not offered.

Students can use their electives to complete the Honours program. The courses credited to the Honours program must be in addition to any required or complementary courses taken to satisfy the requirements of the student's major and specialization.

In addition to satisfying the research requirements, students must apply for the Honours program in March or April of their U2 year. It is the responsibility of the student to find a professor who is willing to support and supervise the research project. No student will be accepted into the program until a supervisor has agreed to supervise the student. Applicants must have a minimum CGPA of 3.3 to enter the Honours program and they must earn a B grade (3.0) or higher in the courses making up the Honours program. Students are required to achieve a minimum overall CGPA of 3.3 at graduation to obtain Honours. Students can use their electives to complete the Honours program. The courses credited to the Honours program must be in addition to any required or complementary courses taken to satisfy the requirements of the student's major and specialization.

The Honours program consists of 12 credits of courses that follow one of two plans listed below.

Students who meet all the requirements will have the name of their program changed to include the word "Honours."

A brief description of the research activities involved will be documented and signed by the Program Director of the student's major, the supervisor of the research project, and the student.

Program Prerequisites

Refer to "Faculty Information and Regulations" > "Minimum Credit Requirements" in this Course Catalogue for prerequisites and minimum credit requirements.

Required Courses (33 credits)

Expand allContract all

Honours Courses

Students choose either Plan A or Plan B.

Honours Plan A

Two 6-credit Honours research courses in the subject area of the student's major, chosen in consultation with the Program Director of the student's major and the professor who has agreed to supervise the research project.

Expand allContract all

Course	Title	Credits
FAES 401	Honours Research Project 1.	6
FAES 402	Honours Research Project 2.	6

Honours Plan B

A minimum of two 3-credit Honours courses and 6 credits in 400- or 500-level courses, from the Faculty of Agricultural and Environmental Sciences, selected in consultation with the Program Director of the student's major. The topic of the Honours research project must be on a topic related to their major and selected in consultation with the Program Director of the student's major and the professor who has agreed to supervise the research project.

Expand allContract all

Course	Title	Credits
FAES 405	Honours Project 1.	3
FAES 406	Honours Project 2.	3

Complementary Courses (9 credits)

With the approval of the Academic Adviser, one introductory course in each of the following areas:

- Accounting
- Statistics
- Written/Oral Communication

Specialization (24 credits)

Specializations designed to be taken with the Agricultural Economics Major:

- Agribusiness Specialization (24 credits)¹
- Environmental Economics Specialization (24 credits)¹
- Professional Agrology Specialization (24 credits)

¹ Membership to the OAQ requires successful completion of these two specializations.

Note: For a complete list of specializations offered for students in the Bachelor of Science in Agricultural and Environmental Sciences, please refer to "Browse Academic Units & Programs" > "Bachelor of Science (Agricultural and Environmental Sciences) - B.Sc.(Ag.Env.Sc.)" > "Specializations" in this eCalendar.

Electives

To meet the minimum credit requirement for the degree.

Agricultural Economics Major (B.Sc.(Ag.Env.Sc.)) (42 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 42

Program Description

The B.Sc.(Agr.Env.Sc.); Major in Agricultural Economics is designed to meet the demand for sustainable development as it relates to the environment and resource use, and the economics and management of the global agriculture and food system. This multidisciplinary program in applied economics involves the application of theory and analytical methods to environmental issues and the agricultural and food system. Training in economic theory and applied areas such as marketing, finance, farm management, public policy, ecology, natural resources, and international development.

Program Prerequisites

Refer to "Faculty Information and Regulations" > "Minimum Credit Requirements", in this Course Catalogue for prerequisites and minimum credit requirements.

Required Courses (36 credits)

- Statistics
- Written/Oral Communication

Specialization (24 credits)

Specializations designed to be taken with the Agricultural Economics Major:

Students taking the Major in Agricultural Economics must take one of the following specializations:

- Agribusiness (24 credits)
- Environmental Economics (24 credits)

Students who take the Specialization in Agribusiness can also take the Specialization in Professional Agrology for Agribusiness (24 credits). Membership to the OAQ requires successful completion of the Agribusiness and Professional Agrology for Agribusiness specializations.

Note: For a complete list of specializations offered for students in the Bachelor of Science in Agricultural and Environmental Sciences, please refer to "Browse Academic Units & Programs > Bachelor of Science (Agricultural and Environmental Sciences) - B.Sc.(Ag.Env.Sc.) > Specializations", in this eCalendar.

Electives

To meet the minimum credit requirement for the degree.

Animal Biology Specialization (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Animal Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The specialization in Animal Biology is intended for students who wish to further their studies in the basic biology of large mammals and birds. Successful completion of the program should enable students to qualify for application to most veterinary colleges in North America,

to study in a variety of postgraduate biology programs, and to work in many laboratory settings.

Animal Health and Disease Specialization (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Animal Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

This specialization is offered for students wishing to understand general animal physiology and function; the susceptibility of animals to various diseases; methods for limiting and controlling potential outbreaks; and the resulting implications for the animal, the consumer and the environment. It is an ideal choice for students interested in the care of animals, or in working in laboratories where diseases are being researched.

Applied Ecology Specialization (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

Food, water, air, the materials we use, and much of the diversity of life and recreation we enjoy are products of ecological systems. We manage ecosystems to provide these services and our use and misuse often degrades the ability of ecosystems to provide the benefits and services we value. In the Applied Ecology specialization you will develop your ability to understand how ecosystems function. You will apply systems thinking to the challenge of managing ecosystems for agriculture, forestry, fisheries, protected areas and urban development. You will learn concepts and tools that help you to deal with the complexity that an ecosystem perspective brings. The goal of this specialization is to provide students with an opportunity to further develop their understanding of the ecosystem processes, ecology, and systems thinking necessary to understand, design and manage our interaction with the environment.

Specialization

At least one specialization of 18-24 credits from:

Specializations designed to be taken with the Life Sciences (Biological and Agricultural) Major:

- Animal Biology
- Animal Health and Disease
- Life Sciences (Multidisciplinary)
- Microbiology and Molecular Biotechnology
- Plant Science

Note: For a complete list of specializations offered for students in the Bachelor of Science in Agricultural and Environmental Sciences, please refer to "Browse Academic Units & Programs" > "Bachelor of Science (Agricultural and Environmental Sciences) - B.Sc.(Ag.Env.Sc.)" > "Specializations" in this eCalendar.

Electives

To meet the minimum credit requirement for the degree.

Life Sciences (Biological and Agricultural) Major (B.Sc. (Ag.Env.Sc.)) (42 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 42

Program Description

The Life Sciences (Biological and Agricultural) Major provides a strong foundation in the basic biological sciences. It will prepare graduates for careers in the agricultural, environmental, health, and biotechnological fields. Graduates with high academic achievement may go on to postgraduate studies in research, or professional programs in the biological, veterinary, medical, and health sciences fields.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Program Prerequisites

Please refer to "Faculty Information and Regulations" > "Minimum Credit Requirements", in this Course Catalogue for prerequisites and minimum credit requirements.

Default Specialization: Students who do not select a Specialization will automatically be assigned to the Life Sciences (Multidisciplinary) Specialization upon entering U2.

Life Sciences (Multidisciplinary) Specialization (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

Students taking this specialization have a wide variety of Life Sciences course offerings to choose from, which allow them to target their program to their own interests in the field. Course choices are balanced between "fundamentals" and "applications." Depending upon the courses chosen, the resulting program may be relatively specialized or very broad, spanning several disciplines. Such a broad background in Life Sciences will open up employment opportunities in a variety of diverse bioscience industries; students with an appropriate CGPA may proceed to a wide variety of postgraduate programs or professional schools.

Microbiology and Molecular Biotechnology Specialization (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

Students following this specialization receive education and training in fundamental principles and applied aspects of microbiology. Complementary courses allow students to focus on basic microbial sciences or applied areas such as biotechnology. Successful graduates may work in university, government and industrial research laboratories, in the pharmaceutical, fermentation and food industries, and with an appropriate CGPA proceed to post-graduate studies or professional biomedical schools.

Plant Biology Specialization (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

This specialization emphasizes the study of plants from the cellular to the organismal level. The structure, physiology, development, evolution, and ecology of plants will be studied. Most courses offer laboratory classes that expand on the lecture material and introduce students to the latest techniques in plant biology. Many laboratory exercises use the excellent research and field facilities at the Morgan Arboretum, McGill Herbarium, Emile A. Lods Agronomy Research Centre, the Horticultural Centre and the Plant Science greenhouses as well as McGill field stations. Students may undertake a research project under the guidance of a member of the Plant Science Department as part of their studies. Graduates with the specialization may continue in post-graduate study or work in the fields of botany, mycology, molecular biology, ecology, conservation, or environmental science.

Professional Agrology for Agribusiness Specialization (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

This Specialization is required for students who wish to qualify for membership in the Ordre des agronomes du Québec (OAQ). It cannot be taken alone; it must be taken with the Major in Agricultural Economics and the Agribusiness Specialization. This Specialization focuses on working in the professional agribusiness industry and covers agricultural legislation as well as professional conduct.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>.

Professional Agrology Specialization (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The Specialization in Professional Agrology focuses on agricultural legislation, professional conduct, and working in the professional agrology industry. This Specialization may be taken with the Major in Sustainable Agricultural Systems. Taken in addition with a Specialization in Field Crops and Horticulture, Global Food Security, or Livestock, the eligibility requirements for the Ordre des agronomes du Québec will be met.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>.

Wildlife Biology Specialization (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

This specialization focuses on the ecology of vertebrate animals, their biological and physical environment, and the interactions that are important in the management of ecological communities and wildlife species. Students have access to local wildlife resources including the Avian Science and Conservation Centre, the McGill Arboretum, the Stonycroft Wildlife Area, the Molson Reserve, and the Ecomuseum.

Agricultural Economics Minor (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The Minor in Agricultural Economics will complement a student's education in four ways. First, as a social science, Economics will provide an alternative perspective for students in the Faculty. Second, the Minor will provide an excellent foundation of the workings of the economy at large. Third, it will aid students in understanding the business environment surrounding the agri-food industry. Finally, it will

challenge students to analyze the interaction between the agricultural economy and the natural resource base.

Applied Ecology Minor (B.Sc. (Ag.Env.Sc.)) (24 credits)

Offered by: Natural Resource Sciences (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

Food, water, air, the materials we use, and much of the diversity of life and recreation we enjoy are products of ecological systems. We manage ecosystems to provide these services and our use and misuse often degrades the ability of ecosystems to provide the benefits and services we value. In the Minor Applied Ecology you will develop your ability to understand how ecosystems function. You will apply systems thinking to the challenge of managing ecosystems for agriculture, forestry, fisheries, protected areas, and urban development. Concepts and tools will be presented that help you to deal with the complexity that an ecosystem perspective brings. The goal of this minor is to provide students with an opportunity to further develop their understanding of the ecosystem processes, ecology, and systems thinking necessary to understand, design, and manage our interaction with the environment.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

To obtain a Minor in Applied Ecology, students must:

1. Ensure all required and complementary courses are passed with a minimum grade of C;
2. Select 24 credits from the courses as given below, of which not more than 6 credits may be counted toward the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Ecological Agriculture Minor (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

The Minor Ecological Agriculture is designed to focus on the principles underlying the practice of ecological agriculture and is suitable for students wishing to farm and do extension and government work, and those intending to pursue postgraduate studies in this field.

This Minor can be associated with existing major programs in the Faculty, but in some instances it may require more than 90 credits to meet the requirements of both the Major and the Minor.

Students are advised, during the U1 year, to consult their Major program adviser and the Academic Adviser of the Minor. At the time of registration for the U2 year, students must declare their intent to obtain the Minor. With the agreement of their Major program adviser they must submit their program of courses already taken, and to be taken, to the Academic Adviser of the Minor. The Academic Adviser of the Minor will then certify which courses the student will apply toward the Minor and confirm that the student's program conforms with its requirements.

For information on academic advising, see: <https://www.mcgill.ca/macdonald/studentinfo/advising>

General Regulations

To obtain a Minor in Ecological Agriculture, students must:

1. Ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.
2. Offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Ecological Agriculture (Certificate) (30 credits)

Offered by: Agricultural Economics (Faculty of Agricultural and Environmental Sciences)

Degree: Certificate in Ecological Agriculture

Program credit weight: 30

Program Description

This 30-credit certificate program is very similar to the Minor program and is designed to focus on the principles underlying the practice of ecological agriculture. The certificate may be of special interest to professional agrologists who want further training, as well as formal recognition that they have completed a coherent program of courses beyond their B.Sc. studies.

Students holding a B.Sc. in agriculture or a related area are eligible to register for this program provided that they are otherwise acceptable for admission to the University. Students who have completed the Minor or specialization in Ecological Agriculture are not permitted to register for this program.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

General Regulations

To obtain a certificate in Ecological Agriculture, students must complete a minimum total of 30 credits from the courses as given below.

Notes:

1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study to ensure that they have met all conditions.
2. Students using AGRI 310 Internship in Agriculture/Environment toward the requirements of the Specialization/Minor/Certificate are limited to an experience on farms or other enterprises that are organic, biodynamic, or practising permaculture. The placement

Agricultural Production Minor (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

This Minor program is designed to allow students in non-agricultural production majors to receive credit for courses in agricultural production and to stimulate "cross-over" studies. The Minor can be associated with existing major programs in the Faculty, but in some

instances it may require more than 90 credits to meet the requirements of both the Major and the Minor.

Students are advised to consult their major program adviser and the Academic Adviser of the Minor in their first year. At the time of registration for their penultimate year, students must declare their intent to obtain a Minor Agricultural Production. With the agreement of their major program adviser, they must submit their program of courses already taken, and to be taken in their final year, to the Academic Adviser of the Agricultural Production Minor. The Academic Adviser of the Agricultural Production Minor will then certify which courses the student will apply toward the Minor and that the student's program conforms with the requirements of the Minor.

Notes:

1. Most courses listed at the 300 level and higher have prerequisites. Although instructors may waive prerequisite(s) in some cases, students are urged to prepare their program of study well before their final year.
2. Not all courses are offered every year. For information on available courses, consult Class Schedule at <http://www.mcgill.ca/minerva>. Complete listings can be found in the "Courses" section of this Course Catalogue.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

General Regulations

To obtain a Minor in Agricultural Production, students must:

1. ensure that their academic record at the University includes a C grade or higher in the courses as specified in the course requirements given below.
2. offer a minimum total of 24 credits from the courses as given below, of which not more than 6 credits may be counted for both the Major and the Minor programs. This restriction does not apply to elective courses in the Major program.

Required Courses (12 credits)

Expand allContract all

Course	Title	Credits
AEBI 210	Organisms 1.	3
ANSC 250	Introduction to Livestock Management	3
ENVB 210	The Biophysical Environment.	3
PLNT 200	Introduction to Crop Science	3

Complementary Courses (12 credits)

12 credits chosen from the following list in consultation with the Academic Adviser for the Minor:

Commercial Cannabis (Dip.) (30 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Program credit weight: 30

Program Description

This program is not currently offered

The Diploma in Commercial Cannabis focuses on ethical, medical, and legal issues related to the commercial cannabis industry, cannabis medicinal chemistry, contaminants and product development, as well as theoretical and hands-on experience of production, breeding and disease management. The program includes an internship that involves solving a specific problem that the commercial cannabis industry is facing. The program will extend over 12 months.

Field Crops and Horticulture Specialization (B.Sc. (Ag.Env.Sc.)) (18 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 18

Program Description

The Specialization in Field Crops and Horticulture focuses on the biology and physiology, breeding, propagation, and management of domesticated crops and vegetables. This Specialization may be taken under the Major in Sustainable Agricultural Systems, and offers the opportunity to take dedicated agronomic content leading to an additional Specialization in Professional Agrology, thereby meeting the eligibility requirements for the Ordre des agronomes du Québec.

Required Courses (18 credits)

Expand allContract all

Course	Title	Credits
PLNT 302	Forage Crops and Pastures.	3

PLNT 353	Plant Structure and Function.	3
PLNT 434	Weed Biology and Control.	3
PLNT 435	Plant Breeding.	3

Program Description

** This program is currently not offered. **

This specialization will interest students who want to understand how soils and water interact within managed ecosystems such as urban or agricultural landscapes. The conservation and management of agricultural soils, issues affecting watershed management and decision making, and the remediation of contaminated soils will be examined. When taken with the Agro-Environmental Sciences Major and the specialization in Professional Agrology, this specialization conforms with the eligibility requirements for the Ordre des agronomes du Québec.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Global Food Security Specialization (B.Sc. (Ag.Env.Sc.)) (18 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 18

Program Description

The Specialization in Global Food Security focuses on agriculture as a fundamental tool to help rural development, alleviate poverty and reach food security, especially in a world context, including global contexts and economically sustainable approaches to provide acceptable nutrition, water resources, sustainable development, nutrition, planning and development. This Specialization may be taken with the Major in Sustainable Agricultural Systems and offers the possibility to take dedicated agronomic content leading to an additional Specialization in Professional Agrology, thereby meeting the eligibility requirements for the Ordre des agronomes du Québec.

Sustainable Agricultural Systems Major (B.Sc. (Ag.Env.Sc.)) (69 credits)

Offered by: Plant Science (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 69

Program Description

The B.Sc.(Ag.Env.Sc.); Major in Sustainable Agricultural Systems focuses on the knowledge, skills, and hands-on experience needed to drive positive change in the agricultural sector, ensuring that it supports healthy communities and a thriving planet, including ecological stewardship, innovative farming practices, and the promotion of food security through sustainable methods. The Major includes practical field experiences and collaborative opportunities. Along with the Specialization in Professional Agrology, this Major will allow eligibility to become a member of the Ordre des agronomes du Québec (OAQ).

International Agriculture Minor (B.Sc.(Ag.Env.Sc.)) (24 credits)

Offered by: Agricultural & Env.Sc.-Dean (Faculty of Agricultural and Environmental Sciences)

Degree: Bachelor of Science (Agricultural and Environmental Sciences)

Program credit weight: 24

Program Description

Students enter this minor to acquire a global and applied understanding of agriculture as a fundamental tool to help rural development, alleviate poverty and reach food security, especially in the developing world. This program provides students with a combination of coursework at McGill together with a hands-on experience in a developing country, meeting locals and attending courses with McGill professors and/or local instructors. The costs of these field experiences may vary. The field experience (semester, short course or internship) includes developing projects in local communities, observing subsistence agriculture in situ and participating in various activities which contribute to sensitizing the students to the challenges that developing countries face. Students study water resources, sustainable development, nutrition, planning and development, and a host of other fascinating topics, allowing them to sharpen their skills for future career opportunities.

For information on academic advising, see: <http://www.mcgill.ca/macdonald/studentinfo/advising>

Option B

15 credits from any of the McGill Field Study Semesters:

Africa Field Study Semester

Barbados Field Study Semester

Barbados Interdisciplinary Tropical Studies Field Semester

Panama Field Study Semester

Plus 3 credits from the list in Option A

Foundation Program - French (B.A.) (30 credits)

Offered by: Arts - Dean's Office

Degree: Bachelor of Arts

Program credit weight: 30

Program Requirements

The Bachelor of Arts Foundation Year is designed to ensure that students gain a broad foundation for the three-year degree program. It is comprised of 24-30 credits in one of two program options. In the "En français" or French option, students choose up to 18 credits from a variety of courses conducted in French. These credits may be comprised wholly of language courses, wholly of substantive content courses conducted in French, or a combination of the two.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Core Requirement (18 credits)

Based on their proficiency in French, students select 18 credits from the courses below in French Language and Literature and French as a Second Language.

French Language and Literature Courses (FREN)

Expand allContract all

Course	Title	Credits
FREN 201	Le français littéraire (français langue seconde).	3
FREN 203	Analyse de textes (français langue seconde) .	3
FREN 231	Linguistique française.	3
FREN 239	Stylistique comparée.	3
FREN 245	Grammaire normative.	3

French as a Second Language (FRSL)

Depending on their level of proficiency, students may include a maximum of 12 credits of intensive French language courses. An intensive language course is a 6 credit term course. Students at the introductory level must take at least 6 credits in French in their Foundation/Foundation year but may be permitted to complete the remaining core requirement credits in year U1.

FRSL 455	Grammaire et création.	3

Substantive Content Courses Taught in French

Some subject area courses or "substantive content courses" are taught in French. Some courses may be offered in French and English in alternate years. POLI 226 La vie politique québécoise. listed below is such a course. When taught in French, such courses may be counted toward this program.

Expand allContract all

Course	Title	Credits
POLI 226	La vie politique québécoise.	3

Remaining Credits (12 credits)

Students select the remaining credits (normally 12) for their Foundation/Foundation year from a list of approved courses for Arts Foundation/Foundation Year students. This list is found with requirements for the Foundation/Foundation Year - General option on the Arts OASIS website at: <http://www.mcgill.ca/oasis/>.

Foundation Program - General (B.A.) (30 credits)

Offered by: Arts - Dean's Office

Degree: Bachelor of Arts

Program credit weight: 30

Program Requirements

The Bachelor of Arts Foundation Year is designed to ensure that students gain a broad foundation for the three-year degree program. It is comprised of 24-30 credits. In the General option, students develop their own program of study using courses from the social sciences, humanities, languages, and/or math and sciences.

This 30-credit option has a core requirement of 18 credits completed by selecting 6 credits in each of three of the four Arts subject categories: social sciences, humanities, languages, and/or mathematics and science. Students select 12 additional credits from approved courses for Foundation Year students based on their interests. A maximum of 18 credits may be taken in any one area and a maximum of 12 credits may be taken in the courses offered by any one department. For more information, see the Arts OASIS website for newly admitted Foundation/Foundation Year students at: <http://www.mcgill.ca/oasis>.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Core Requirement (18 credits)

18 credits with 6 credits in each of three of the four Arts categories: social sciences, humanities, languages, and mathematics and science.

The course lists below are organized by Arts category and include only courses approved by the offering department for Foundation/Foundation Year (UO) students. Students may use these lists to plan their course selection.

Approved Courses - Social Sciences

For a list of the approved Arts Foundation/Foundation Year (UO) courses, see the Arts OASIS website at: <http://www.mcgill.ca/oasis>.

Note: A few courses may be listed in both Social Sciences and in another category. For example, CANS 200 Understanding Canada. and ISLA 210 Muslim Societies. are considered to be both Social Sciences and Humanities courses.

Approved Courses - Humanities

For a list of the approved Arts Foundation/Foundation Year (UO) courses, see the Arts OASIS website at: <http://www.mcgill.ca/oasis>.

Note: Some of the courses are not suitable for first term as they require university-level prerequisites. Please check the course entries for further information about appropriate background before registering.

Note: A few courses may be listed in both Humanities and in another category. For example, CANS 200 Understanding Canada. is considered to be both Humanities and Social Science courses.

Approved Courses - Languages

For a list of the approved Arts Foundation/Foundation Year (UO) courses, see the Arts OASIS website at: <http://www.mcgill.ca/oasis>.

Note: When registering for 'D1' courses, you MUST also register for the second part 'D2' of this full-year course.

Note: No more than one language should be taken at the introductory level during the Foundation/Foundation year. Students with prior knowledge of the language may take higher-level courses with permission from the department.

Note: A few courses may be listed in both Languages and in another category.

Approved Courses - Mathematics and Sciences

For a list of the approved Arts Foundation/Foundation Year (UO) courses, see the Arts OASIS website at: <http://www.mcgill.ca/oasis>.

Note: Some of the courses are not suitable for first term as they require university-level prerequisites. Please check the course entries for further information about appropriate background before registering.

Note: GEOG 205 Global Change: Past, Present and Future. is listed as a Mathematics and Sciences course as well as a Social Sciences course.

Anthropology Minor Concentration (B.A.) (18 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Anthropology permits students to explore the development and diversity of human beings and human society and culture through courses in human evolution, prehistoric archaeology, and socio-cultural anthropology. Students may include courses in all of these fields, or may focus on one or two.

This program may be expanded to the Major Concentration Anthropology.

Complementary Courses (18 credits)

6-9 credits from 200-level courses in Anthropology.

9-12 credits from any 300-, or 400-, or 500-level courses in Anthropology (only 3 credits of which can be at the 400 or 500 level. Only 1 Special Topic course can be taken.)

Anthropology Major Concentration (B.A.) (36 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major concentration is especially appropriate for students who aim to take courses across several sub-disciplinary or topical concentrations, and for whom specialization is premature. There are no prerequisites for admission to the Major Concentration Anthropology. Students are encouraged to take a course in quantitative methods (listed under the Honours program), but this course cannot count as part of this concentration.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

200 Level

6 credits selected from 200-level courses in Anthropology (ANTH).

Core (350 Level)

6 credits from:

(Note: These are restricted to students in any Anthropology program with U2 standing or above.)

Expand allContract all

Course	Title	Credits
ANTH 352	History of Anthropological Theory.	3
ANTH 355	Theories of Culture and Society.	3
ANTH 357	Archaeological Methods.	3
ANTH 358	The Process of Anthropological Research.	3
ANTH 359	History of Archaeological Theory.	3

400 Level

6 credits, two 400-level Anthropology (ANTH) courses.

Undergraduate Level

18 credits of additional undergraduate-level Anthropology courses of which no more than 6 credits may be at the 200 level.

Anthropology Honours (B.A.) (60 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The Honours Program in Anthropology provides a greater focus on Anthropology with substantial breadth and depth. The completion of an Honours program is an asset when applying to graduate or professional schools.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Course (6 credits)

Expand all	Contract all	Course	Title	Credits
		ANTH 490	Honours Thesis.	6

Complementary Courses (54 credits)

Honours students select their courses as specified below. Students may take a maximum of 9 credits at the 300 and 400 level offered by other departments if they are directly related to their focus of study within Anthropology and are approved by their departmental program adviser.

200/300 Level

A maximum of 36 credits of 200- and 300-level courses (of which a maximum of 21 credits may be at the 200 level and a maximum of 6 credits may be Special Topic courses.)

Core (350 Level)

Select a minimum of 9 credits of core courses at the 350 level selected from:

Expand all	Contract all	Course	Title	Credits
		ANTH 352	History of Anthropological Theory.	3
		ANTH 355	Theories of Culture and Society.	3
		ANTH 357	Archaeological Methods.	3
		ANTH 358	The Process of Anthropological Research.	3
		ANTH 359	History of Archaeological Theory.	3

400/500 Level

A minimum of 9 credits of Anthropology (ANTH) courses at the 400- or 500-level, and a maximum of 3 credits can be a Special Topic course.

Anthropology Joint Honours Component (B.A.) (36 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students interested in Joint Honours should consult an advisor in the other department for specific course requirements. A form will be supplied by the Anthropology Department to keep track of courses required by both departments for the programs selected.

Students who wish to study at the Honours level in two disciplines can combine the Joint Honours Program component in Anthropology with one in any other Arts discipline.

The Joint Honours thesis topic should be arranged by consultation with an advisor in Anthropology and the other discipline, and supervisors should be appointed in each department who will work together to guide the student.

Joint Honours students must maintain a GPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Course (3 credits)

The Joint Honours thesis should be determined in consultation with advisers from both Joint Honours components programs. Normally, the thesis is 6 credits of coursework with 3 credits applying to each Joint Honours component.

Communication Studies Minor Concentration (Minor) (18 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Communication Studies provides undergraduate students with a critical understanding of the role that communications media and communication technologies play in a society. It offers students intellectually challenging and innovative instruction in key traditions of Communications and Media Studies and new theoretical and methodological practices being developed in the field. The courses included in the program focus on issues of the relationship between communication, democracy and urban life, the social life of communication technologies, the historical development and transformation of media and communication forms, institutions, practices and technologies, and the mass media representation and mobilization of social difference.

Art History Major Concentration (B.A.) (36 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Art History concentrates on analysis of forms of visual and material culture from ancient to contemporary times. It provides a grounding in diverse fields and methods of the discipline.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Complementary Courses (36 credits)

3-15 credits from the following list, as an introduction to methods, theories, and practices in diverse fields of the discipline:

Art History Honours (B.A.) (54 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

The Honours Art History program provides in-depth training, with emphasis on art historical methods and research, while allowing students flexibility in choosing courses that match their academic needs and interests. It is designed especially for students who anticipate pursuing graduate studies and careers in art history or related disciplines.

Students are encouraged to apply for this program after their first year of study at the University and after completion of no less than 12 credits in Art History. Admission is on a competitive basis. While the Faculty of Arts regulations require a minimum CGPA of 3.0 for Honours programs, the Department requires in addition a program GPA of 3.50 for admission into the program and the awarding of Honours.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Computer Science Supplementary Minor Concentration (B.A.) (18 credits)

Offered by: Computer Science (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

The Supplementary Minor Concentration may be taken only by students registered in the Major Concentration Computer Science or the Major Concentration Software Engineering. There may be no overlap in credits taken for this Supplementary Minor Concentration and the Major Concentration Computer Science/ Software Engineering. Taken together, these constitute a program very close to the Major Computer Science offered by the Faculty of Science. Students must get their selection of courses approved by an Academic Adviser in the School of Computer Science.

Students with two programs in the same department/unit must have a third program in a different department/unit to be eligible to graduate. Please refer to the Faculty of Arts regulations for "Faculty Degree Requirements", "About Program Requirements" and "Departmental Programs" for the Multi-track System options.

Complementary Courses (18 credits)

18 credits selected from Computer Science (COMP) courses at the 300 level or above excluding COMP 396 Undergraduate Research Project..

Students may also select a maximum of 3 credits of MATH courses from the list below.

Expand allContract all

Course	Title	Credits
MATH 223	Linear Algebra.	3
MATH 318	Mathematical Logic.	3
MATH 323	Probability.	3

Computer Science Major Concentration (B.A.) (36 credits)

Offered by: Computer Science (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

This Major concentration represents an in-depth introduction to computer science and its sub-areas. Students that are interested in further study in Computer Science can combine the Major

Concentration Computer Science with the Supplementary Minor in Computer Science to constitute a program very close to the Major Computer Science offered by the Faculty of Science. For further information, please consult the Program Adviser.

Students with two programs in the same department/unit must have a third program in a different department/unit to be eligible to graduate. Please refer to the Faculty of Arts regulations for "Faculty Degree Requirements," "About Program Requirements," and "Departmental Programs" for the Multi-track System options.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

MATH 133 Linear Algebra and Geometry., MATH 140 Calculus 1., and MATH 141 Calculus 2. (or their equivalents) should be completed prior to taking courses in this program.

The remaining complementary credits must be selected from COMP 230 Logic and Computability, and COMP courses at the 300 level or above (except COMP 396 Undergraduate Research Project.).

Software Engineering Major Concentration (B.A.) (36 credits)

Offered by: Computer Science (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration Software Engineering focuses on the techniques and methodology required to design and develop complex software systems and covers the subject commonly known as "Software Engineering". Arts students that are interested in further study in Computer Science can combine the Major Concentration in Software Engineering with the Supplementary Minor Concentration in Computer Science. For further information, please consult the Program Adviser.

Students with two programs in the same department/unit must have a third program in a different department/unit to be eligible to graduate. Please refer to the Faculty of Arts regulations for "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs" for the Multi-track System options.

MATH 133 Linear Algebra and Geometry., MATH 140 Calculus 1., and MATH 141 Calculus 2. (or their equivalents) must be completed prior to taking courses in this program.

Note: This program does not lead to certification as a Professional Engineer.

Required Courses (30 credits)

East Asian Language Supplementary Minor Concentration (B.A.) (18 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts and Science

Program credit weight: 18

Program Description

This program may not be expanded to the Major Concentration East Asian Studies.

The program offers students who have a background in an East Asian language the opportunity to study this language at the advanced level (300 level and above), including the classical language.

Complementary Courses (18 credits)

There are two options.

18 credits in second, third, or fourth level language courses in a single East Asian language, or a combination of an advanced language and other courses in East Asian culture, literature, or society at the 300 level or above, chosen in consultation with the Departmental Program Adviser.

East Asian Studies Major Concentration (B.A.) (36 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in East Asian Studies provides in-depth training in the humanistic studies of East Asia (including language, society, literature, history, media, religion, politics, and art). The program includes core survey on China, Japan, and Korea.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Complementary Courses (36 credits)

Introduction to East Asian Culture

East Asian Studies Joint Honours Component (B.A.) (36 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours - East Asian Studies Component provides in-depth training in the humanistic studies of East Asia (including language, society, literature, history, media, religion, politics, and art). The program includes core survey on China, Japan, and Korea. and progresses to upper-level lectures and seminars that allow students to tailor an individualized program of study. Half of the coursework will be done in East Asian Studies and the other half in another program within the Faculty of the Arts.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Economics Minor Concentration (B.A.) (18 credits)

Offered by: Economics (Faculty of Arts)
Degree: Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 18

Program Description

The Minor Concentration in Economics provides a moderate level of specialization in Economics for students who usually are pursuing Major Concentrations or Honours Programs in other fields of study. It does, however, provide an option to switch to or add a Major Concentration in Economics. There is a special Minor for Management students.

Complementary Courses (18 credits)

18 credits, of which 6 credits must be from Group A and 12 credits from Group B.

Group A

Expand allContract all

Course	Title	Credits
ECON 208	Microeconomic Analysis and Applications.	3
ECON 209	Macroeconomic Analysis and Applications.	3
ECON 230D1	Microeconomic Theory.	3
ECON 230D2	Microeconomic Theory.	3

Group B

Economics courses with course numbers above ECON 208 Microeconomic Analysis and Applications. (excluding ECON 295 Macroeconomic Policy.), at least 6 credits of which must be at the 300, 400 or 500 level.

Program Notes:

Only one of ECON 208 Microeconomic Analysis and Applications. or ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. or ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours. can be credited to the Economics Minor. Only one of ECON 209

Special Minor in Economics for Management Students

Information on this Minor Concentration and its special restrictions is in the Desautels Faculty of Management website at www.mcgill.ca/desautels/programs/bcom/academics/areas-study/economics/min.... Students should consult with the advisers in both the Faculty of Management and the Department of Economics for advice on this minor concentration.

Economics Major Concentration (B.A.) (36 credits)

Offered by: Economics (Faculty of Arts)
Degree: Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 36

Program Description

The Major Concentration in Economics is a planned sequence of courses designed to permit the student a degree of specialization in economics. It consists of 36 credits in courses approved by the Economics Department. Students wishing to pursue this concentration need to consult the department's rules and regulations at: www.mcgill.ca/economics/undergraduates/majorminor.

All students who wish to begin (or continue) the Major Concentration Economics should see a majors adviser in the Department of Economics in each of their university years. Further information may be obtained from the Department's website, or from any majors adviser; consult the Department website for a list of advisers and their email addresses.

Students who are registering for the first time with the Department should attend the orientation meeting in August (check the website for details) before seeing an adviser.

A student choosing the Major Concentration Economics must take 36 credits in Economics. The Economics courses will normally be taken at McGill and will be selected from the courses shown below. Major Concentration in Economics students entering University at the U1 year in September should directly proceed to ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. without taking ECON 208 Microeconomic Analysis and Applications. and ECON 209 Macroeconomic Analysis and Applications..

Note: Students who wish to switch from the Major Concentration to Honours Economics must complete all the requirements of the Honours program.

Mathematics: Mastery of high school mathematics is required for all economics courses.

Prerequisites: In general, 200-level courses have no prerequisites and 300-level and 400-level courses have ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. or ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours. (or ECON 208 and ECON 209 Macroeconomic Analysis and Applications., or MGCR 293 Managerial Economics. and ECON 295 Macroeconomic Policy.) as prerequisites. In addition, 400-level courses have Calculus 1 (or its equivalent) or a course in mathematical techniques for economic analysis (or its equivalent) as a prerequisite.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

All students must take 6 credits of approved statistics courses. Students should refer to the Department's document "Rules on Stats Courses for Economics Students" available at: <http://www.mcgill.ca/economics/undergraduates/courses/>.

Expand allContract all

Course	Title	Credits
ECON 227D1	Economic Statistics.	3

ECON 230D2	Microeconomic Theory.	3
ECON 332	Macroeconomic Theory: Majors 1.	3
ECON 333	Macroeconomic Theory - Majors 2.	3

Complementary Courses (18 credits)

18 credits in Economics selected from other 200- (with numbers above 209), 300-, 400- and 500-level courses. At least 6 of these credits must be in 400- or 500-level courses. No more than 6 credits may be at the 200 level.

Economics Honours (B.A.) (42 credits)

Offered by: Economics (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 42

Program Description

The Honours Economics program (B.A. and B.Com.) consists of 30 specified credits of Honours courses and a further 12 credits of approved Economics courses.

Continuation in the Honours program from one year to the next requires a minimum grade of B- in ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours. and a minimum B- average in required and complementary Honours economics courses. Students failing to meet

these requirements must switch out of the Honours program. If they continue to register in Honours, they will not be allowed to graduate with Honours. Note that graduation with Honours has more stringent requirements (see below) than these.

To be awarded an Honours degree, a student must obtain a 3.00 GPA in the required/core courses, a 3.00 average in the required and complementary credits in Economics, and a CGPA of 3.00. For a First Class Honours degree, the minimum requirements are a 3.50 program GPA in the required courses, a 3.50 average in the required and complementary credits in Economics, and a CGPA of 3.50. Students also have to meet the requirements of the Faculty of Arts for Honours and First Class Honours. In cases where a student takes a Supplemental Exam in a course, both the original and the Supplemental Exam grades will be counted in the calculation of the GPA and CGPA averages.

All Honours students are required to see an Honours advisor and also consult the Honours and Joint Honours programs available on the Department's website: <http://www.mcgill.ca/economics/undergraduates/honours>. For the current list of advisers in Economics and their advising times, see the Department of Economics' website.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites (0-10 credits)

For entering this program:

Course	Title	Credits	
ECON 460	History of Thought 1 - Honours.	3	For graduation with the Economics component, a student must also obtain a 3.00 GPA in the required courses, a 3.00 average in the required and complementary credits in Economics, and a CGPA of 3.00. For a First Class Honours degree, the minimum requirements are a 3.50 program GPA in the required courses, a 3.50 average in the required and complementary credits in Economics, and a CGPA of 3.50. In cases where a student takes a Supplemental Exam in an Economics course, both the original and the Supplemental Exam grades will be counted in the calculation of the GPA and CGPA averages.
ECON 461	History of Thought 2 - Honours.	3	
ECON 469	Econometrics 2 - Honours.	3	Students also have to meet the requirements of the other component of this program and of the relevant Faculty for Honours and First Class Honours.

Complementary Courses (12 credits)

Complementary courses are usually taken in U2 or U3.

12 credits of Economics courses at the 300, 400, or 500 level, approved by an Honours adviser. Unless explicitly approved by the Honours advisor, at least 9 of the 12 credits have to be at the 400 or 500 level. Note that Honours students are not permitted to register for majors or general Economics courses where an Honours or a more advanced undergraduate course in the same subject is offered.

Economics Joint Honours Component (B.A.) (30 credits)

Offered by: Economics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 30

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two approved disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs" on the Economics Department website.

Joint Honours students should consult an adviser in each of the relevant departments to discuss their course selection and their interdisciplinary research project (if applicable) in each year of their program.

For the Economics component of this program, Joint Honours students should consult: <http://www.mcgill.ca/economics/undergraduates/honours>. For the current list of advisers in Economics and their advising times, see the website of the Department of Economics.

Continuation in the Economic component of this program from one year to the next requires a minimum grade of B- in ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours., and a minimum B- average in the required and complementary Honours Economics courses. Students failing to meet these requirements must switch out of the Honours program. If they continue to register in Honours, they will not be allowed to graduate with Honours. Note that graduation with Honours has more stringent requirements (see below) than these.

For graduation with the Economics component, a student must also obtain a 3.00 GPA in the required courses, a 3.00 average in the

required and complementary credits in Economics, and a CGPA of

3.00. For a First Class Honours degree, the minimum requirements are a 3.50 program GPA in the required courses, a 3.50 average in

the required and complementary credits in Economics, and a CGPA of

3.50. In cases where a student takes a Supplemental Exam in an

Economics course, both the original and the Supplemental Exam

grades will be counted in the calculation of the GPA and CGPA

averages.

Students also have to meet the requirements of the other component

of this program and of the relevant Faculty for Honours and First Class

Honours.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Economics / Finance Joint Honours Component (B.A.) (60 credits)

Offered by: Management (Desautels Faculty of Management)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The B.A. Joint Honours in Economics and Finance is offered jointly by the Economics Department and the Desautels Faculty of Management. Students in this program should see an Economics adviser and a Management adviser. For the economics part, they should consult: <http://www.mcgill.ca/economics/undergraduates/honours>. For the current list of advisers in Economics and their advising times, see the website of the Department of Economics. For the Management component of this Joint Honours program, students should see the Honours program adviser in the Desautels Faculty of Management.

All Joint Honours students should consult the Economics Honours and Joint Honours programs at <http://www.mcgill.ca/economics/undergraduates/honours>.

The B.A. Joint Honours in Economics and Finance requires the completion of 30 specified credits of Honours Economics courses listed in the Economics Honours Program and 30 specified credits for Finance. This program is designed to take advantage of both McGill's Finance and Economics course offerings to produce a student who is well trained in these two complementary areas. To enter this Joint Honours program, students must have completed two terms of Calculus.

Continuation from one year to the next in the Economics part of this Joint Honours program requires a minimum grade of B- in ECON 250D1 Introduction to Economic Theory: Honours./ECON 257D2 Economic Statistics - Honours., and a minimum B- average in the required and complementary Honours Economics courses.

For the Economics component, a student must also obtain a 3.00 GPA in the required courses, a 3.00 average in the required and complementary credits in Economics, and a CGPA of 3.00. For a First Class Honours degree, the minimum requirements are a 3.50 program GPA in the required courses, a 3.50 average in the required and complementary credits in Economics, and a CGPA of 3.50. In cases where a student takes a Supplemental Exam in a course, both the initial and the Supplemental Exam grades will be counted in the calculation of the GPA and CGPA averages.

For the Management part of this program, students also have to meet the requirements of the Faculty of Management for Honours and First Class Honours.

To earn the Honours in Economics and Finance, the Faculty of Management requires that students must achieve a grade of B- or better in all courses in the Finance component of this program.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Education for Arts Students Minor Concentration (B.A.) (18 credits)

Offered by: Education - Dean's Office (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

This Minor concentration allows Arts students to develop and explore an interest in education. It will give students a solid footing in the basics of pedagogy and may provide a starting point towards a B.Ed. degree.

Completion of this Minor concentration DOES NOT qualify a student to enter the teaching profession. Students interested in a teaching

career should consult the Faculty of Education section of the Course Catalogue for information about Bachelor of Education programs that lead to teacher certification. See Faculty of Education programs offered by the Department of Integrated Studies in Education.

Students should consult the Faculty of Arts section on "Faculty Degree Requirements", and "Course Requirements" for information on "Courses Outside the Faculties of Arts and of Science" and other topics such as course restrictions, credit counting, etc.

This minor program requires an application due to limited enrolment space. Please see <http://www.mcgill.ca/isa/faculty-advising/minor-programs> for procedures and deadlines.

Drama and Theatre - Courses of Interest - Other Departments

Permission to count extra-departmental credits must be obtained in advance of taking any course from outside the Department of English. Students are normally permitted to count 3 credits from other departments towards their Drama and Theatre Minor. Permission is obtained with the signature of a Department of English program adviser on the student's program audit sheet.

This list comprises courses in other departments that might be accepted by an adviser for credit toward the student's Drama and Theatre program. This list applies only to these courses as they are offered in the current academic year.

There might be other courses in the Faculty of Arts for which a student could receive Drama and Theatre program credit. A student who has identified a course not noted below should show their program adviser the course syllabus in advance and, if he or she agrees, get the adviser's initialled approval of the course on their program audit sheet. The Department requires a complete signed audit sheet in the student's file in Arts 155 in order to process the file for graduation.

Included in the list are courses taught in languages other than English and courses that have prerequisites.

English - Cultural Studies Major Concentration (B.A.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Cultural Studies option concentrates on analysis of forms of cultural expression and symbolic interaction, and of the various media through which these may be disseminated and transformed. Such study concerns symbolic form, aesthetically based forms of analysis, and the various modes of criticism and theory relevant to media which contain both verbal and non-verbal elements. The aim is above all to hone students' analytical and interpretive skills while introducing them to specific critical approaches to cultural studies. This is not a major in journalism or communications; and while many of our graduates go on to do creative work in a variety of media, instruction in film and video production is not part of the curriculum.

For the most up-to-date information on Department requirements and detailed course descriptions, please see the English Department Handbook at <http://www.mcgill.ca/english/>.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

ENGL 492	Image and Text.	3	We recommend that students consult an Arts OASIS advisor for degree planning.

Historical Dimension

6 credits from a list of courses in Cultural Studies with an historical dimension:

Course	Title	Credits
ENGL 350	Studies in the History of Film 1.	3
ENGL 351	Studies in the History of Film 2.	3
ENGL 363	Studies in the History of Film 3.	3
ENGL 374	Film Movement or Period.	3
ENGL 444	Studies in Women Authors.	3
ENGL 451	A Period in Cinema.	3
ENGL 480	Studies in History of Film 1.	3

Additional Courses

9 additional credits from ENGL offerings, in the Literature, Cultural Studies, and Drama and Theatre Options. Other courses require approval by a departmental adviser.

Other Departments

Students are normally permitted to count 6 credits from other departments toward their English programs. In exceptional circumstances, an adviser who is approached by a student with strong academic grounds for including a third such course may grant permission (to a maximum of 9 extra-departmental credits) and must so indicate in advance by signing the departmental program audit sheet.

English - Drama and Theatre Major Concentration (B.A.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Drama and Theatre option tries to place its subject in as broad a social and philosophical context as possible. The Drama and Theatre program is not designed to provide professional theatre training. The aim is rather to encourage students to explore the subject as a liberal arts discipline.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (6 credits)

English - Literature Honours (B.A.) (54 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

Entry to Honours is by application, normally after two terms in a Departmental program, including at least 18 credits of English. The Faculty of Arts requires that all students admitted to Honours programs complete a second program minor in addition to their Honours program.

Admission to the Honours program is limited to a small number of students with excellent records. The minimum CGPA for application to the Honours program is 3.30. Students with a CGPA lower than 3.3 and at or above 3.0 (but with the requisite 3.5 program GPA) may consult the Director of the Honours program for special permission to apply. Students with a program GPA lower than 3.5 and at or above 3.3 (but with the requisite CGPA of 3.3) may also consult the Director of the Honours program for special permission to apply. In neither instance is admission guaranteed. After admission into the Honours program, the student is required to maintain a CGPA at a level set by the Faculty for graduation with Honours and a program GPA at the level set by the Department.

The Honours program in English requires 54 credits. Students intending to apply for Honours should plan to complete as many of the specific requirements of their option as possible within the first two years. With the written approval of an adviser, up to 9 credits may be taken outside the Department. All Honours students must complete at least 6 of their complementary credits at the 500 level. Ideally, 500-level seminars chosen will be relevant to the area of the student's independent study in the Honours Essay course (ENGL 491D1 Honours Essay./ENGL 491D2 Honours Essay.), taken without exception in the final year of the program. The Honours Essay is first planned in consultation with a supervisor at the time of application to the Honours program; it is then guided and evaluated by that supervisor during the completion of ENGL 491. Graduation with Honours requires 54 credits of English, a minimum mark of B+ on the Honours Essay, a minimum CGPA of 3.00, and a minimum program GPA of 3.50. Graduation with First Class Honours requires a mark of A on the Honours Essay, a minimum CGPA of 3.50, and a minimum program GPA of 3.70.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

ENGL 202 Departmental Survey of English Literature 1., ENGL 203 Departmental Survey of English Literature 2. and ENGL 311 Poetics. are

normally taken in the first two terms of the program. ENGL 360 Literary Criticism. is normally taken in the second year of the program.

ENGL 360	Literary Criticism.	3
ENGL 491D1	Honours Essay.	3
ENGL 491D2	Honours Essay.	3

Complementary Courses (36 credits)

36 credits selected as described below. At least 6 of the 36 credits must be at the 500 level. A maximum of 9 credits may be from another department with the signed permission of the program adviser. At least 3 of the 36 credits must be devoted to a course on a Major Author, and 3 must be devoted to a course on Canadian Literature, as indicated under the rubrics dedicated to these offerings in each year's list of Complementary Courses on the Department of English website (<http://www.mcgill.ca/english>). A maximum of 9 of the 36 credits are allowed at the 200 level, none in the final year of the program.

Note on Topics Courses: The Department of English offers courses which change topic from academic year to academic year. Depending on the topic in a specific year, these courses may count toward different program requirements. At the time they register for a topics course, students should confirm with their program adviser the program requirement it fulfills for that academic year.

English Courses

12 credits in English selected in consultation with an academic adviser.

Drama and Theatre - Courses of Interest - Other Departments

Students are normally permitted to count 6 credits from other departments toward their English programs. In exceptional circumstances, an adviser, approached by a student with strong academic grounds for including a third such course, may grant permission, to a maximum of 9 extra-departmental credits, and must so indicate in advance by signing the departmental program audit sheet.

This list comprises courses in other departments that might be accepted by an adviser for credit towards the student's Drama and Theatre program. This list applies only to these courses as they are offered in the current academic year.

There might be other courses in the Faculty of Arts for which a student could receive Drama and Theatre program credit. A student who has identified a course not noted below should show their program adviser the course syllabus in advance and, if he or she agrees, get the adviser's initialled approval of the course on their program audit sheet. The Department requires a complete signed audit sheet in the student's file in Arts 155 in order to process the file for graduation.

Included in the list are courses taught in languages other than English and courses that have prerequisites.

English - Literature Joint Honours Component (B.A.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs." Applications to do a Joint Honours program in English and another subject in the Faculty of Arts should be submitted once a minimum of 9 credits, and no more than 18 credits, have been completed in English. There are normally two possible application dates for Joint Honours in English: either by the end of January (by which time first-term courses are completed and the grades are available), or at the same time as the Honours application date, typically in mid-April. (Only students who will have completed more than 18 credits in English by the end of January may apply in the Fall.) The minimum CGPA for application to the Joint Honours program is 3.30. Students with a CGPA lower than 3.3 and at or above 3.0 (but with the requisite 3.5 program GPA) may consult the Director of the Honours program for special permission to apply. Students with a program GPA lower than 3.5 and at or above 3.3 (but with the requisite CGPA of 3.3) may also consult the Director of the Honours program for special permission to apply. The application form is available in the Department's General Office (Arts 155), and the specific submission requirements are described by that form.

The maintenance of a 3.50 program GPA is required for continuation in Joint Honours. Graduation with Joint Honours requires a minimum CGPA of 3.00, a minimum program GPA of 3.50, and a minimum mark of B+ on the Honours Essay. Graduation with First Class Joint Honours in English requires a minimum CGPA of 3.50, a minimum program GPA of 3.70, and a minimum mark of A on the Honours Essay.

Each academic year, there is a special adviser for Joint Honours students, and the receptionist in the General Office can provide their name and contact information. The Department's website <http://www.mcgill.ca/english/> provides additional information on the Joint Honours program and applications, and this website should also be consulted prior to contacting the Adviser.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (12 credits)

Expand allContract all

Course	Title	Credits
ENGL 202	Departmental Survey of English Literature 1.	3
ENGL 203	Departmental Survey of English Literature 2.	3
ENGL 311	Poetics.	3
ENGL 360	Literary Criticism.	3

Complementary Courses (24 credits)

24 credits selected as described below.

In addition to the 6-credit requirement for Advanced Study described below, all Joint Honours students' programs of study shall include 6 credits of study at the 400 level or above. Students are encouraged to take courses at the 300 level and above. At least 3 of the 24 credits must be devoted to a course on a Major Author as indicated under the rubrics dedicated to these offerings in each year's list of Complementary Courses on the Department of English website (<http://www.mcgill.ca/english>). In addition to the Advanced Study requirement, 3 of the remaining 18 Complementary Courses credits must be completed at the 500 level. A maximum of 9 of the 24 credits are allowed at the 200 level, none in the final year of the program.

Note on Topics Courses: The Department of English offers courses which change topic from academic year to academic year. Depending on the topic in a specific year, these courses may count toward different program requirements. At the time they register for a topics course, students should confirm with their program adviser the program requirement it fulfills for that academic year.

Advanced Study

6 credits of advanced study, in one of the following two forms A or B, in order of preference:

A) 6-credits of honours essay:

Expand allContract all

Course	Title	Credits
ENGL 491D1	Honours Essay.	3
ENGL 491D2	Honours Essay.	3

B) Two 3-credit 500-level courses selected in consultation with the student's adviser(s).

(In very rare cases, a third alternative may be approved at the discretion of the Joint Honours Adviser, but only when it is formally recommended for the joint subject according to the description of that Joint Honours program found in the Arts section of the Course Catalogue. For example, Joint Honours with Anthropology allows the option of combining 3 credits of essay work with 3 credits in the joint subject to create a joint essay.)

Areas of English Literature

World Cinemas Minor Concentration (B.A.) (18 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration World Cinemas instructs students in film aesthetics, history, and theory by acquainting them with cinematic practices from different national and international traditions. This interdisciplinary program draws on the already existing teaching and research activities in several departments within the Faculty of Arts and will serve as an institutional context for future teaching and research endeavors in film studies.

Gender, Sexuality, Feminist, and Social Justice Studies Minor Concentration (B.A.) (18 credits)

Offered by: Inst for Gender, Sex & Fem St (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Gender, Sexuality, Feminist, & Social Justice Studies (GSFS) is an interdisciplinary program that centrally engages contemporary and historical issues centered on gender, sexuality, feminism, and social justice. The program provides students with opportunities to explore the meaning and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships.

Gender, Sexuality, Feminist, and Social Justice Studies Major Concentration (B.A.) (36 credits)

Offered by: Inst for Gender, Sex & Fem St (Faculty of Arts)

Degree: Bachelor of Arts, Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Gender, Sexuality, Feminist, & Social Justice Studies (GSFS) is an interdisciplinary program that centrally engages contemporary and historical issues centered on gender, sexuality, feminism, and social justice. The program provides students with opportunities to explore the meaning and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships. The Major Concentration consists of required GSFS courses that allow for an immersion into this area of study, and complementary courses from a range of departments, disciplines, and faculties. Students must see an adviser in Gender, Sexuality, Feminist, and Social Justice Studies at a minimum upon declaring the GSFS Major Concentration and prior to selecting courses for the final year of study.

Students are advised to take GSFS 200 Feminist and Social Justice Studies, and GSFS 250 Sexual and Gender Diversity Studies, in their first year in the program, GSFS 300 Research Inquiry in GSFS, in their second year of the program, and GSFS 400 Capstone: Engaging Fields of GSFS, in their final year of the program.

Students must see an adviser in Women's Studies at a minimum upon registering in GSFS and prior to selecting courses for the final year of study.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Gender, Sexuality, Feminist, and Social Justice Studies Honours (B.A.) (57 credits)

Offered by: Inst for Gender, Sex & Fem St (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 57

Program Description

The Honours program offers a significant degree of analysis and depth of study into contemporary and historical critical issues centered on gender, sexuality, feminism, and social justice beyond the Major through required and complementary course work, intensive research, and seminars. The program enables students to explore the meanings and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships. The Honours program culminates in the completion of an Honours thesis, supervised by a faculty member whose approval is sought the year prior. The Colloquium requires supplemental reading and writing assignments, training in research and thesis writing methods, presentation to the group of theses in progress, and response to the work of others. Honours students must maintain a program GPA of 3.30 and a CGPA of 3.00.

Students are advised to take GSFS 200 Feminist and Social Justice Studies. and GSFS 250 Sexual and Gender Diversity Studies. in their first year in the program, and GSFS 300 in their second year of the program. Students must take GSFS 495D1 Honours/Joint Honours Colloquium./GSFS 495D2 Honours/Joint Honours Colloquium. and GSFS 496D1 Honours Thesis./GSFS 496D2 Honours Thesis. in their last full year of the program.

Students must see an adviser in Women's Studies at a minimum upon registering in GSFS and prior to selecting courses for the final year of study.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program credit weight: 36

Program Description

The Joint Honours program offers a significant degree of analysis and depth of study into contemporary and historical critical issues centered on gender, sexuality, feminism, and social justice beyond the Major through required and complementary course work, intensive research, and seminars. The program enables students to explore the meanings and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships. The Joint Honours program culminates in the completion of an Honours thesis, supervised by a faculty member whose approval is sought the year prior. The Colloquium requires supplemental reading and writing assignments, training in research and thesis writing methods, presentation to the group of theses in progress, and response to the work of others. Joint Honours students must maintain a program GPA of 3.30 and a CGPA of 3.00.

Students are advised to take GSFS 200 Feminist and Social Justice Studies. and GSFS 250 Sexual and Gender Diversity Studies. in their first year in the program, and GSFS 300 Research Inquiry in GSFS. in their second year of the program. Students must take GSFS 495D1 Honours/Joint Honours Colloquium./GSFS 495D2 Honours/Joint Honours Colloquium. and GSFS 497D1 Joint Honours Thesis./GSFS 495D2 Honours/Joint Honours Colloquium. in their last full year of the program.

Students must see and adviser in Women's Studies at a minimum upon registering in GSFS and prior to selecting courses for the final year of study.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Geography Minor Concentration (B.A.) (18 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The B.A.; Minor Concentration in Geography focuses on the interactions among people, places, and the environment, and is an excellent complement to many majors. It includes coursework in methodological techniques, human, and/or physical Geography. This Minor Concentration may be expanded into the Major Concentration Geography, but not into the Major Concentration Geography (Urban Studies).

Geography (Urban Studies) Minor Concentration (B.A.) (18 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

This interdisciplinary program introduces students in the Faculty of Arts to a range of urban dynamics and the challenges facing contemporary cities around the world. Students should observe the levels indicated by course numbers: 200-level are first year (U1); 300-level, second year (U2); 400- or 500-level, third year (U3).

Health Geography Minor Concentration (B.A.) (18 credits)

Offered by: Geography (Faculty of Science)
Degree: Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 18

Program Description

There is increasing consensus around the idea that health is not just an expression of individual characteristics but an interaction between the characteristics of the individual and the environments, both physical and social, to which one is exposed over a lifetime of daily living and working. Health outcomes vary dramatically by physical and social characteristics of places both within and between countries and these provide a wedge for our understanding of the factors that might be modified to improve the health of large groups of people. The B.A.; Minor Concentration in Health Geography introduces students to both local and global health issues and provides a skill set in spatial and statistical analyses of diverse health outcomes in populations.

Geography Major Concentration (B.A.) (37 credits)

Offered by: Geography (Faculty of Arts; Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 37

Program Description

The B.A.; Major Concentration in Geography focuses on the interactions among people, places, and the environment. It includes coursework in human and physical Geography, methodological techniques, and field.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Geography Honours (B.A.) (61 credits)		
Offered by: Geography (Faculty of Science)		
Degree: Bachelor of Arts		
Program credit weight: 61		
Program Description		
The B.A.; Honours Geography program focuses on the interactions among people, places, and the environment. Along with additional course work, the program is distinguished by the Honours project,		

which entails independent, original research conducted over two semesters, normally in the final year of study, under the supervision of a department faculty member.

In addition to the Faculty of Arts requirement that Honours students maintain a minimum CGPA of 3.00, students in the Geography Honours program must maintain a program GPA of at least 3.30 to remain in the program and receive an Honours degree.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Geography

24 credits of Geography (GEOG) courses excluding GEOG 200 Geographical Perspectives: World Environmental Problems, and GEOG 205 Global Change: Past, Present and Future., selected in consultation with the Program Adviser. No more than 6 credits may be taken from 200-level courses.

Outside Geography

9 credits at the 300 or 400 level or above of courses taught by units other than Geography selected from the humanities, social and physical sciences or engineering that have been approved by the Program Adviser as related to the student's focus within Geography.

Urban Studies Honours (B.A.) (60 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

This program exposes students to various approaches to the study of the urban world. Urban Studies is an interdisciplinary program that introduces students in the Faculty of Arts to a range of urban dynamics and the challenges facing contemporary cities around the world, and a variety of methodological approaches. Students should observe the levels indicated by course numbers: 200-level are first year (U1); 300-level, second year (U2); 400- or 500-level, third year (U3).

The Honours Urban Studies program is more concentrated and focused than the Major Concentration. In addition to the Faculty of Arts requirement that Honours students maintain a minimum CGPA of 3.00, students in the Honours Urban Studies must maintain a program GPA of at least 3.30 and complete a 6-credit Honours thesis. Honours students are encouraged to participate in 500-level seminars with graduate students.

For students in the Honours Urban Studies, the total number of credits permitted outside Arts and Science is 30 credits. Faculty of Arts regulations about "Courses Outside the Faculties of Arts and of Science" may be found in the Arts guidelines for "Course Requirements".

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Geography Joint Honours Component (B.A.) (37 credits)**Offered by:** Geography (Faculty of Science)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 37**Program Description**

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components of Geography and another Arts discipline. As with the regular Honours program, the Geography component of Joint Honours focuses on the interactions among people, places, and the environment, and requires an Honours project, which entails independent, original research conducted over two semesters, normally in the final year of study, under the supervision of a department faculty member. The requirements for Honours programs vary considerably among units, so students interested in Joint Honours should consult an adviser in each department to discuss their course selection and research project(s).

In addition to the Faculty of Arts requirement that Joint Honours students maintain a CGPA of at least 3.00, students in a Joint Honours Component Geography program must maintain a program GPA of at least 3.30 to remain in the Honours program and receive an Honours degree. In addition to meeting these Geography requirements, students must meet the requirements set forth by the other unit.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Geography

12-15 credits from a coherent set of Geography (GEOG) courses excluding GEOG 200 Geographical Perspectives: World Environmental Problems. and GEOG 205 Global Change: Past, Present and Future., approved by the Program Adviser. Including a field course is desirable. No more than 6 credits may be taken from 200-level courses.

History Minor Concentration (B.A.) (18 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration History introduces students to the study of diverse cultures and societies around the world from antiquity to contemporary times. It is an excellent complement to the major concentrations offered in the Faculty of Arts. The Minor Concentration History is expandable to a Major Concentration History.

Students wishing to complete a history program are encouraged to consult a Program Adviser at the beginning of their first year, and to fill out a departmental program advising/audit form. For more information about the undergraduate programs in history, and for advising information and forms, visit the program's website at <http://www.mcgill.ca/history/undergraduate>.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the overall credit requirement for history programs.

Complementary Courses (18 credits)

18 credits of history courses (HIST or Cognate courses - see list below), of which no more than 6 credits may be at the 200-level.

Cognate Courses

The following non-HIST courses may be counted toward the History minor program (max. 3 credits). Additional courses may be submitted for consideration to the Undergraduate Program Director. Faculty regulations stipulate that a course may not be counted toward more than one program.

History Major Concentration (B.A.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration History is a highly flexible program that emphasizes both breadth and depth, while introducing students to different historical theories and methodologies. Students select from a wide variety of courses on diverse cultures and societies around the world from antiquity to contemporary times, and also on thematic subjects such history and sexuality, imperialism and colonialism, histories of science, environmental history, and the history of thought and ideas. Students design their program to match their geographic, chronological, thematic or methodological interests.

Students wishing to complete a history program should consult a Program Adviser at the beginning of their first year, and fill out a departmental program advising/audit form. For more information, visit the program's website at <http://www.mcgill.ca/history/undergraduate>.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the credit requirements for history programs.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Complementary Courses (36 credits)

36 credits of HIST or cognate courses (see list below) according to the following requirements.

Distribution requirement:

- 3 credits from Group A
- 3 credits from Group B
- 3 credits from Group C

Note: Cognate courses (see below) may not be used to satisfy the Distribution requirement

Temporal Breadth requirement:

- At least 3 credits focused on the period before 1800
- At least 3 credits focused on the period after 1800

Notes: The same course may be used to satisfy both a Distribution and Temporal Breadth requirement. HIST 299 The Historian's Craft. may not be used to satisfy Temporal Breadth requirements.

Level requirement:

- Maximum 15 credits of complementary courses at the 200-level.
- Minimum 6 credits of 400- or 500- level courses.

Note: student may use at most 3 credits of HIST 498 Independent Research. or HIST 499 Internship: History. to fulfill this requirement.

51 credits of HIST or cognate courses (see list below) according to the following requirements.

Distribution requirement:

- 3 credits from Group A
- 3 credits from Group B
- 3 credits from Group C

Note: Cognate courses (see below) may not be used to satisfy the Distribution requirement.

Temporal Breadth requirement:

- At least 3 credits focused on the period before 1800
- At least 3 credits focused on the period after 1800

Notes: The same course may be used to satisfy both a Distribution and Temporal Breadth requirement. HIST 299 The Historian's Craft. and HIST 399 History and Historiography. may not be used to satisfy Temporal Breadth requirements.

Level requirement:

- Minimum 6 credits of honours seminars (500-level D1/D2 courses)
- Minimum 6 additional credits of 400-level or higher HIST courses. A second honours seminar may be used to fulfill this requirement.
- Maximum 18 credits complementary courses at 200-level

GPA requirements:

History Honours (B.A.) (54 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

The Honours History program provides in-depth training, with emphasis on historical methods and research, while allowing students

- 3.30 in program courses,
- 3.0 (B) or higher in each program course,
- CGPA 3.0 or higher.

History Joint Honours Component (B.A.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. The Joint Honours Component History is a flexible program that emphasizes breadth, depth as well as historical methods and research.

Students wishing to complete the Joint Honours History Component should consult a Program Adviser at the beginning of their first year to map out a course of study, and fill out a departmental program advising/audit form. For more information, visit the program's website: <http://www.mcgill.ca/history/undergraduate>. Students must also fulfill program requirements in the second honours component and should consult an adviser in that program.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the overall credit requirement for history programs.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Classics Major Concentration (B.A.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Classical Studies is an in-depth study of ancient Greece and Rome. Two Streams are offered. The Classical Languages stream emphasizes ancient Greek and Latin language, requiring advanced coursework in one or both languages. The Classical Studies stream provides a broad foundation in ancient languages and Greek and Roman literature while allowing students greater flexibility to take a variety of courses in translation.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Classics Honours (B.A.) (54 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

The Honours Classics program is designed for students who plan to pursue graduate studies in Classics or related discipline. The program is highly interdisciplinary. It emphasizes the study of ancient Greek and Latin, requiring proficiency in both languages and advanced coursework in at least one, combined with a strong foundation in ancient history, literature and material cultural studies. Honours students are encouraged to begin coursework in both Greek and Latin as soon as possible, and to meet with the classics program adviser to map out their courses and program.

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

South Asian Studies Minor Concentration (B.A.) (18 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The B.A.: Minor Concentration in South Asian Studies offers breadth and depth on the history, literature, languages, politics, religions, cultures, and societies of South Asia. The minor concentration is divided into two streams, "Culture and Civilization" and "Languages." An interdisciplinary curriculum is collaboratively offered by the Department of Anthropology, English, History and Classical Studies, Political Science, and Sociology, the Institute of Islamic Studies, and the School of Religious Studies, and is complemented by language instruction in Persian, Sanskrit, Tibetan, and Urdu-Hindi.

Complementary Courses (18 credits)

18 credits from one of the following streams:

Stream 1: Culture and Civilization

Note: As course content may change according to the offering unit's yearly curriculum, all classes listed must be approved in consultation with the South Asian Studies adviser as relevant to the Minor Concentration. Students should refer to the Course Catalogue to confirm any prerequisites for the following courses.

Canadian Studies Major Concentration (B.A.) (36 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Canadian Studies is an interdisciplinary program focused on in-depth multidisciplinary perspectives on Canada and its key institutions, with an emphasis on public affairs as it relates to social and cultural issues and debates in the Canadian context and the responses and actions taken or needed to be taken. The program draws on interdisciplinary perspectives incorporating research and approaches from both the humanities and the social sciences.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Canadian Studies Honours (B.A.) (54 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

The B.A.; Honours in Canadian Studies is an interdisciplinary program focused on in-depth multidisciplinary perspectives on Canada and its key institutions, with an emphasis on public affairs as it relates to social and cultural issues and debates in the Canadian context, and the responses and actions taken or needed to be taken. The program draws on interdisciplinary perspectives incorporating research and approaches from both the humanities and the social sciences.

Students with a GPA of 3.30 in their program courses and, in keeping with Faculty regulations, a minimum CGPA of 3.00 in general, are eligible to apply to the Honours program. Application deadlines are December 15 and May 15. Forms are available on the McGill Institute for the Study of Canada (MISC) website.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Indigenous Studies Minor Concentration (B.A.) (18 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Indigenous Studies provides students with a broad, interdisciplinary view of key issues in the historical, social and cultural dimensions of Indigenous life in Canada. Core courses offered within the program will provide interdisciplinary treatments of Indigenous life. The Program will focus on the history of indigenous populations in Canada, Aboriginal art and culture, the experience of indigeneity and gender, and legacies of Indigenous resistance to the Canadian state.

Quebec Studies and Community-Engaged Learning Minor Concentration (B.A.) / La concentration Mineure en Études sur le Québec et apprentissage par engagement communautaire (B.A.) (18 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 18

Program Description

La concentration Mineure en Études sur le Québec et apprentissage par engagement communautaire a pour but de donner à l'étudiant(e) une connaissance interdisciplinaire des réalités historiques et contemporaines du Québec en complémentarité à sa propre discipline de spécialisation tout en misant sur un apprentissage par engagement communautaire en milieu montréalais. En collaboration avec le Social Equity and Diversity Education (SEDE) Office, les étudiants ont ainsi la possibilité, grâce à un stage, de mettre en pratique le contenu d'enseignement des cours au sein d'un organisme communautaire montréalais. Enjeux liés à l'équité, à la diversité et à l'inclusion en contexte montréalais.

The goal of the Minor Concentration Quebec Studies and Community-Engaged Learning is to give students an interdisciplinary overview of Quebec historical and contemporary realities that is complementary to their degree by taking advantage of a community engagement learning approach within the Montreal community. With the collaboration of the Social Equity and Diversity Education (SEDE) Office, students have the possibility to link the academic course content with a hands-on experience within a Montreal community organization. Equity, diversity and inclusion issues within the Montreal context.

Required Courses / Cours Obligatoires (9 credits)

De façon usuelle, les cours obligatoires (9 crédits) sont complétés selon la séquence suivante : QCST 200 Introduction to the Study of Quebec. (3 crédits) en U0 ou U1, QCST 300 Quebec Culture and Society. (3 crédits) en U1 et QCST 440 Contemporary Issues in Quebec. (3 crédits) en U2 ou en U3. Les cours complémentaires (9 crédits) peuvent être complétés en U1, U2 ou en U3.

Normally, the required courses (9 credits) are completed in the following order: QCST 200 Introduction to the Study of Quebec. (3

credits) in U0 or U1, QCST 300 Quebec Culture and Society. (3 credits) in U1 and QCST 440 Contemporary Issues in Quebec. (3 credits) in U2 or in U3. The complementary courses (9 credits) can be completed in U1, U2, or U3.

Expand allContract all

Course	Title	Credits
QCST 200	Introduction to the Study of Quebec.	3
QCST 300	Quebec Culture and Society.	3
QCST 440	Contemporary Issues in Quebec.	3

Complementary Courses / Cours Complémentaires (9 credits)

De ces 9 crédits, 6 doivent être des cours provenant du tronc commun ou des cours approuvés par la direction du programme.

3 crédits doivent provenir d'un cours dont la langue d'enseignement est le français et peuvent provenir d'un cours de français langue seconde.

Au moins 6 des 9 crédits complémentaires doivent être du niveau 300 ou supérieur.

Le choix de ces cours se fera en consultation avec le directeur du programme et variera selon le domaine de spécialisation de chaque étudiant(e).

Of these 9 credits, 6 credits must be core courses, or courses approved by the Program Director.

3 credits must be taught in the French language and can be chosen from French as a Second Language course offerings.

At least 6 of the 9 complementary credits must be at the 300 level or above.

The selection of courses will be made in consultation with the Program Director and will vary depending on the major concentration or honours program of each student.

International Development Studies Major Concentration (B.A.) (36 credits)

Offered by: Inst for the St of Development (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 36

Program Description

The B.A.; Major Concentration in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, key development-related themes, and training in research methods related to international development studies.

Course Selection Guidelines for the Overall Program

- At least 18 of the 36 credits must be at the 300 level or above.
- At least 9 credits must be from INTD courses.
- Students cannot take more than 12 credits in any one discipline other than the INTD discipline.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (12 credits)

Course	Title	Credits

International Development Studies Honours (B.A.) (57 credits)

Offered by: Inst for the St of Development (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 57

Program Description

The B.A.; Honours in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, key development-related themes, and training in research methods related to international development studies.

Honours students must maintain a CGPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Course Selection Guidelines for the Overall Program

- At least 30 of the 57 credits must be at the 300 level or above; 9 credits of these must be at the 400 level or above.
- At least 12 credits must be from INTD courses.
- Students cannot take more than 18 credits in any discipline other than the INTD discipline.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (12 credits)

Expand allContract all

Course	Title	Credits
ECON 208	Microeconomic Analysis and Applications.	3

International Development Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Inst for the St of Development (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 36

Program Description

The B.A.; Honours in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, key development-related themes, and training in research methods related to international development studies.

Honours students must maintain a CGPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Course Selection Guidelines for the Overall Program

- At least 18 of the 36 credits must be at the 300 level or above. Nine credits must be at the 400 level or above.
- At least 12 credits must be from INTD courses.
- Students cannot take more than 12 credits in any one discipline other than the INTD discipline.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

NOTE: Students in the Econ-IDS Joint Honours program are required to take ECON 257D1 Economic Statistics - Honours./ECON 257D2 Economic Statistics - Honours. and therefore cannot also take ECON 227D1 Economic Statistics. /ECON 227D2 Economic Statistics.as part of their IDS program requirements.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

African Studies Major Concentration (B.A.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration African Studies provides students with an interdisciplinary approach to the study of the African continent.

Students wishing to major in African Studies should consult the Program Adviser at the beginning of their first academic year. In the African Studies Major concentration, students will be encouraged to identify an area within a discipline of the Faculty, taking as many relevant courses as possible in that field.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

African Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours program in African Studies provides students with an interdisciplinary approach to the study of the African continent.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs". Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary Honours thesis (if applicable). Joint Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations a minimum CGPA of 3.00 in general.

At least 9 of the 36 credits must be at the 400 level or above.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

Required Courses (9 credits)

Course	Title	Credits
AFRI 200	Introduction to African Studies.	3
AFRI 480	Honours Thesis. ¹	3
AFRI 598	Research Seminar in African Studies.	3

¹ Honours Thesis course must be taken for the AFRI Joint Honours component. Students must meet the specific requirements regarding Thesis credits of their second program in addition to the AFRI 480 Honours Thesis. Honours Thesis.

Complementary Courses (27 credits)

Group A

9 credits from:

Course	Title	Credits

World Islamic and Middle East Studies Minor Concentration (B.A.) (18 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the languages, textual traditions, and social life of Muslims across different times and places.

Complementary Courses (18 credits)

18 credits of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

3 credits at the 200 level, in non-language ISLA courses;

6 credits at the 300 level and Higher, in non-language ISLA courses;

9 credits at any level. If non-language courses are selected, no more than 6 credits in non-language courses overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

World Islamic and Middle East Studies Major Concentration (B.A.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the textual traditions and social life of Muslims across different times and places.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in [Degree Requirements for the Faculty of Arts](#).

We recommend that students consult an Arts OASIS advisor for degree planning.

Complementary Courses (36 credits)

12-15 credits (2 levels) in one language: Arabic, Persian, Turkish, or Urdu. One level is 6 credits. In the case of Arabic, the first two levels involve 15 credits. The extra 3 credits may count toward the 6-9 credits at any level category of the complementary courses' requirement.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

21-24 credits (21 if the extra Introductory Arabic credits are used) of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

3 credits of 200-level non-language ISLA courses;

6 credits of 300-level non-language ISLA courses;

6 credits of 400-/500-level non-language ISLA courses;

6-9 credits at any level, including more language courses, but no more than 6 non-language credits overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

World Islamic and Middle East Studies Honours (B.A.) (60 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the textual traditions and social life of Muslims across different times and places.

Honours students must maintain a program GPA of 3.30 in their World Islamic and Middle East Studies courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

World Islamic and Middle East Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the textual traditions and social life of Muslims across different times and places.

- 3 Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).
- 3 Joint Honours students must maintain a program GPA of 3.30 in their World Islamic & Middle East Studies courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Course (3 credits)

Course	Title	Credits
ISLA 495	World Islamic and Middle East Studies Research Seminar.	3

Complementary Courses (33 credits)

33 credits of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

12-15 credits (2 levels) in one language: Arabic, Persian, Turkish, or Urdu (lists below). One level is 6 credits. In the case of Arabic, the first two levels involve 15 credits. The extra 3 credits may count toward the 3-6 credits at any level category of the complementary courses' requirement.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

18-21 credits (18 if the 3 extra Introductory Arabic credits are used), distributed as follows:

3 credits of 100-/200-level non-language ISLA courses;

9 credits of 300-level non-language ISLA courses;

3 credits of 400-/500-level non-language ISLA courses;

3-6 credits at any level, including more language courses, but no more than 6 credits in non-language courses overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

Other Department Courses - History

Many of the courses in Jewish Studies are related to other departments, e.g., History, Religious Studies. There are also related courses in other departments which students specializing in certain areas of Jewish Studies might be encouraged to include in their programs, e.g., Classical Greek, Arabic, theories of literature, etc.

The following History department courses may be used as Jewish Studies courses in the Department of Jewish Studies programs. These courses have been included in the areas of study course lists above.

Jewish Studies Honours (B.A.) (60 credits)

Offered by: Jewish Studies (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Requirements

Honours students must maintain a GPA of 3.00 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Jewish Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Jewish Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Requirements

Students who wish to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.00 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

European Literature and Culture Minor Concentration (B.A.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in European Literature and Culture provides students with a broad foundation for understanding the development and interconnectedness of European culture, and its relevance for the comprehension of today's world through the study of literature and the arts from the Middle Ages to modern times. Knowledge of a language other than English is not required to complete the program.

Required Course (3 credits)

Course	Title	Credits
LLCU 210	Introduction to European Literature and Culture.	3

Complementary Courses (15 credits)

9-15 credits selected from the list below. At least 6 credits should be at the 300-level or above.

Students with an advanced knowledge of German, Italian, Russian, or Spanish can count GERM, HISP, ITAL, and RUSS literature courses taught in those languages toward the Minor Concentration. No more than 6 credits in any given area (LLCU, GERM, HISP, ITAL, and RUSS) shall count toward the Minor Concentration (not including LLCU 210 Introduction to European Literature and Culture.).

German Studies Minor Concentration (B.A.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in German Studies provides an introduction to and critical understanding of a variety of aspects of German culture from the eighteenth century to the present day. It is designed to complement other forms of disciplinary and cultural inquiry, such as international studies, the digital humanities, and studies in other languages or geographic areas. Courses include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture.

This program may be expanded to a Major Concentration.

Complementary Courses (18 credits)

18 credits of courses in German literature, culture, and film taught in English or German selected from the following list.

A maximum of 6 credits of LLCU courses can be taken, with prior departmental approval.

Beginners' and Intermediate Language courses may not be applied towards this Minor Concentration.

GERM 325 German Language - Intensive Advanced. may be applied towards this Minor Concentration.

German Studies Major Concentration (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in German Studies provides students with a rigorous and broad inquiry into the major features that have defined German cultural life since the eighteenth century. Knowledge of the German language is a core component of the major concentration and normally courses towards the major concentration will be taught in German. Courses will include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture. Students will acquire the skills of critical reading and viewing that allow them to interpret complex works of art and evaluate their social and cultural significance.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

German Studies Honours (B.A.) (60 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The Honours in German Studies provides students with a rigorous and broad inquiry into the major features that have defined German cultural life since the eighteenth century. Knowledge of the German language is a core component of the Honours program and all courses towards Honours will be taught in German. Courses will include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture. Students will acquire the skills of critical reading and viewing that allow them to interpret complex works of art and evaluate their social and cultural significance.

Note: Beginners' and intermediate language levels are offered either as a one-term intensive course or a two-term spanned course. Students choose which version of the level they prefer.

Admission to the Honours program requires departmental approval. Students may begin this program in their first year. Honours students must maintain a GPA of 3.30 in their program courses, and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Honours students, according to Faculty regulations, also must complete at least a minor concentration (18 credits) in another academic unit.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Hispanic Studies Major Concentration (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Department of Languages, Literatures, and Cultures – Hispanic Studies offers courses in the literature, intellectual history, and civilization of Spain and Latin America, as well as in the Spanish language. The Department's undergraduate and graduate programs are committed to expanding the liberal arts background of students by helping to develop the skills of communication and critical reasoning, and by providing insight into the culture of other regional, linguistic, and national groups. Enrichment in these areas reduces provincialism and broadens intellectual horizons, regardless of the professional interests or fields of specialization that may guide students in other facets of their university education.

McGill University has bilateral exchange agreements with the Universidad de Salamanca (Spain), the Universidad Nacional Autónoma de México, and the Universidad de las Américas, Puebla (Mexico), as well as with other leading universities in the Spanish and Portuguese-speaking world which allow student and faculty exchanges, and other collaborative ventures. Further information about these exchanges may be obtained from the Department or from the International Education website.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Hispanic Studies Honours (B.A.) (60 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The Honours program in Hispanic Studies offers an in-depth study of the language and culture of Spain and Latin America in the areas of literature, film, digital humanities and intellectual history. The program focuses on skills of communication and critical reasoning through the analysis of Spanish and Latin American languages and cultural production.

Prerequisite for admission into Honours Hispanic Studies: a first-year Spanish course with a final grade of B+. Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Students must take an 18-credit Minor concentration in another area.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

HISP 247	Introduction to Hispanic Popular Cultures	3
HISP 248	Introduction to Hispanic Cinema	3
HISP 490D1	Honours Thesis.	3
HISP 490D2	Honours Thesis.	3

Complementary Courses (42 credits)

At least 9 credits of undergraduate courses at the 400-level or above

All remaining credits may be selected from courses given in Spanish in the Department at or above the intermediate Spanish language level (HISP 219 Spanish Language Intensive - Intermediate. OR HISP 220D1 Spanish Language: Intermediate./HISP 220D2 Spanish Language: Intermediate.).

No more than 18 credits in courses taught in English will count towards the Honours program.

Hispanic Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Department of Languages, Literatures, and Cultures - Hispanic Studies offers courses in the literature, intellectual history, and civilization of Spain and Latin America, as well as in the Spanish language. The Department's undergraduate and graduate programs are committed to expanding the liberal arts background of students by helping to develop the skills of communication and critical reasoning, and by providing insight into the culture of other regional, linguistic, and national groups. Enrichment in these areas reduces provincialism and broadens intellectual horizons, regardless of the professional interests or fields of specialization that may guide students in other facets of their university education.

McGill University has bilateral exchange agreements with the Universidad de Salamanca (Spain), the Universidad Nacional Autónoma de México, and the Universidad de las Américas, Puebla (Mexico), as well as with other leading universities in the Spanish and Portuguese-speaking world which allow student and faculty exchanges, and other collaborative ventures. Further information about these exchanges may be obtained from the Department or from the International Education website.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Latin American and Caribbean Studies Honours (B.A.) (60 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The Honours Latin American and Caribbean Studies is designed to meet the needs of students who plan to attend graduate or professional school upon completion of the B.A. This programs provides a comprehensive interdisciplinary understanding of Latin America and the Caribbean, upon which more specialized coursework and research may be based. This program is recommended for students who envision graduate study in a specific discipline, such as History or Political Science.

While the Faculty of Arts regulations require a minimum CGPA of 3.0 for Honours programs, in addition, students pursuing the Honours Latin American and Caribbean Studies must normally maintain a B+ (3.30) average in all program courses. Students must also meet all additional Faculty of Arts requirements for graduation with Honours.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

Expand allContract all

Course	Title	Credits
HISP 243	Survey of Latin American Literature and Culture 1.	3
HISP 244	Survey of Latin American Literature and Culture 2.	3

LACS 497	Research Seminar: Latin America and the Caribbean.	3
LACS 498	Honours Thesis.	3
POLI 319	Politics of Latin America.	3

¹ Note: Successful completion of intermediate-level Spanish (HISP 220D1 Spanish Language: Intermediate./HISP 220D2 Spanish Language: Intermediate. or HISP 219 Spanish Language Intensive - Intermediate. or equivalent) is a prerequisite for the required courses HISP 243 Survey of Latin American Literature and Culture 1. and HISP 244 Survey of Latin American Literature and Culture 2..

Complementary Courses (42 credits)

42 credits selected from the Complementary Course List in consultation with the Program Advisor with the following requirements.

1. 12 credits must be taken in Spanish or Portuguese.
2. 30 additional credits on Latin America and the Caribbean (exclusive of language courses).
3. A minimum of 15 of these 30 credits must be taken in one of the following disciplinary clusters, which may also include up to 6 credits of theoretical and/or methodological courses of particular relevance to the student's research interests:
 - Cluster 1 - Literature and Culture;
 - Cluster 2 - Economics, History, and Political Science;
 - Cluster 3 - Anthropology and Geography.

Latin American and Caribbean Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Joint Honours Latin American and Caribbean Studies Component provides students with an interdisciplinary approach to the study of the Latin American and Caribbean region. Students wishing to study at the Honours level in two disciplines can combine Joint Honours programs in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs." Joint Honours students should consult an adviser in each department to discuss their course selection and their research project. Joint Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Requirements

At least 9 of the 36 credits must be at the 400 level or above.

Liberal Arts Major Concentration (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 36

Program Description

The Major Concentration in Liberal Arts exposes students to texts from and histories of a suitably wide range of cultures and societies. Students are able to choose among three intellectual streams: literature and the arts (including theatre and architecture); history, culture and society; and philosophy and religion. Students in each stream must satisfy distribution requirements in relation to minimum

number of 300/400+ level courses; maximum number of courses in one discipline; geographical areas and historical periods.

All students majoring in Liberal Arts are also required to complete a Minor Concentration in a language program (other than English). Students who are native speakers of a language other than English are strongly encouraged to fulfill this requirement in a third language.

The approved language minors are:

- Minor Concentration in Classics (Language Stream)
- Minor Concentration in East Asian Language and Literature or Supplementary East Asian Language
- Minor Concentration in German Language
- Minor Concentration in Hispanic Languages
- Minor Concentration in Italian Studies
- Minor Concentration in Jewish Studies
- Minor Concentration in French Language and Literature – French Language
- Minor Concentration in World Islamic & Middle East Studies
- Minor Concentration in Russian
- Minor Concentration in Scriptural Languages

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses

Liberal Arts students are required to take two courses designed to help them reflect on the contemporary significance of a Liberal Arts education and on their experience in the Liberal Arts program.

Expand allContract all

Course	Title	Credits
LIBA 202	Introduction to Liberal Arts.	3
LIBA 402	Seminar in Liberal Arts.	3

Complementary Courses (30 credits)

Students must complete 30 credits in one of the three specialized streams set out below.

The distribution requirements for all streams are the following:

1. at least 6 credits from the 200-level introductory courses within one stream;
2. at least 15 credits must be from courses at the 300 level or above; at least 6 credits must be at the 400 level or above (language courses cannot count toward satisfying this requirement);
3. no more than 18 credits can be from a single discipline;
4. geographical area: at least 6 credits in coursework primarily emphasizing Africa and/or Asia, and at least 6 credits in coursework emphasizing Europe and/or the Americas or Australasia, and
5. historical periods: at least 6 credits in coursework primarily emphasizing texts or history from before 1500, and at least 6

credits in coursework primarily emphasizing texts or history from 1500-1900 (a given course may satisfy both the geographical area and the historical period requirement).

Stream 1: Literature and the Arts (including Theatre and Architecture)

This stream is designed for students whose primary interests lie in the study of literature and the arts across geographical boundaries and historical traditions.

Approved courses are listed below. The courses appearing in List A are introductory in nature and should be taken early in the program. The courses appearing in List B are of two kind:

1. courses taught in the "core" disciplines in this stream, and
2. courses taught in other disciplines which are nevertheless pertinent to this stream.

Though wide ranging, the choice of courses is limited by the stream's orientation, as well as by the overall objectives of the Liberal Arts Program.

The additional courses may be substituted with the approval of the Program Director.

Students must choose 30 credits as follows:

6 credits from the courses in List A

24 credits from the courses in List B

List A (6 credits)

RUSS 430	High Stalinist Culture 1.	3			

Stream 3: Philosophy and Religion

This stream is designed for students whose primary interests lie in the study of philosophy and religion across geographical boundaries and historical traditions.

Approved courses are listed below. The courses appearing in List A are introductory in nature and should be taken early in the program. The courses appearing in List B are of two kind:

1. courses taught in the "core" disciplines in this stream, and
2. courses taught in other disciplines which are nevertheless pertinent to this stream.

Though wide ranging, the choice of courses is limited by the stream's orientation, as well as by the overall objectives of the Liberal Arts Program.

The additional courses may be substituted with the approval of the Program Director.

Students must choose 30 credits as follows:

6 credits from the courses in List A

24 credits from the courses in List B

List A (6 credits)

Liberal Arts Honours (B.A.) (60 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The Honours in Liberal Arts exposes students to texts from and histories of a suitably wide range of cultures and societies. Students are able to choose among three intellectual streams: literature and the arts (including theatre and architecture); history, culture and society; and philosophy and religion. Students in each stream must satisfy a language requirement as well as distribution requirements in relation to minimum number of 300/400+ level courses; maximum number of courses in one discipline; geographical areas and historical periods.

Honours student must maintain a program GPA of 3.30 and an overall GPA of 3.00.

All students in the Honours Liberal Arts are also required to complete a Minor Concentration in a language program (other than English). Students who are native speakers of a language other than English are strongly encouraged to fulfill this requirement in a third language.

The approved language minors are:

- Minor Concentration in Classics (Language Stream)
- Minor Concentration in East Asian Language and Literature or Supplementary East Asian Language
- Minor Concentration in German Language
- Minor Concentration in Hispanic Languages
- Minor Concentration in Italian Studies
- Minor Concentration in Jewish Studies
- Minor Concentration in French Language and Literature - French Language
- Minor Concentration in World Islamic & Middle East Studies
- Minor Concentration in Russian
- Minor Concentration in Scriptural Languages

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (9 credits)

Honours Liberal Arts students are required to take three courses designed to help them reflect on the contemporary significance of a Liberal Arts education and on their experience in the Liberal Arts program.

[Expand all](#)[Contract all](#)

Course	Title	Credits
LIBA 202	Introduction to Liberal Arts.	3
LIBA 402	Seminar in Liberal Arts.	3
LIBA 490	Honours Thesis.	3

Complementary Courses (51 credits)

Honours students must complete 51 credits in one of the three specialized streams set out below.

The distribution requirements for all streams are the following:

1. at least 9 credits from the 200-level introductory courses within one stream;
2. at least 24 credits must be from courses at the 300 level or above; at least 6 credits must be at the 400 level or above (language courses cannot count toward satisfying this requirement);
3. no more than 21 credits can be from a single discipline;
4. geographical area: at least 6 credits in coursework primarily emphasizing Africa and/or Asia, and at least 6 credits in coursework emphasizing Europe and/or the Americas or Australasia, and
5. historical periods: at least 6 credits in coursework primarily emphasizing texts or history from before 1500, and at least 6 credits in coursework primarily emphasizing texts or history from 1500-1900 (a given course may satisfy both the geographical area and the historical period requirement).

Stream 1: Literature and the Arts (including Theatre & Architecture)

This stream is designed for students whose primary interests lie in the study of literature and the arts across geographical boundaries and historical traditions.

Approved courses are listed below. The courses appearing in List A are introductory in nature and should be taken early in the program. The courses appearing in List B are of two kind:

1. courses taught in the "core" disciplines in this stream, and
2. courses taught in other disciplines which are nevertheless pertinent to this stream.

Though wide ranging, the choice of courses is limited by the stream's orientation, as well as by the overall objectives of the Liberal Arts Program.

The additional courses may be substituted with the approval of the Program Director.

Students must choose 51 credits as follows:

9 credits from the courses in List A

42 credits from the courses in List B

Russian Minor Concentration (B.A.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Russian will give students a basic working knowledge of Russian and the tools with which to explore Russian life and culture in the original. Students who can demonstrate to the Department that they have acquired the equivalent competence elsewhere may waive prerequisites for 300-level courses and above.

The Minor Concentration in Russian may be expanded to the Major Concentration in Russian.

Complementary Courses (18 credits)

18 credits to be chosen from:

Russian Major Concentration (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Russian gives students a foundation in the language, literature, and culture of Russia from the 19th century to the present. It incorporates a balance of instruction in the Russian language, the opportunity to read selected texts in the original language, and to explore Russian language and culture through translated texts.

By arrangement with the Department and subject to University approval, transfer credits will be accepted from Department-approved exchange/immersion programs.

Group B (9 credits)

Students who have acquired language competency elsewhere will replace lower-level courses with upper-level courses. A total of 6 credits may be taken in courses offered by other departments in the Faculty; these are listed at the end of this section. Students are particularly encouraged to select from LLC course offerings.

For admission into the Honours program and approval of all course selections, students must regularly consult with an academic adviser in the Department.

Honours students, according to Faculty regulations, also must complete at least a minor concentration (18 credits) in another academic unit.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Russian Joint Honours Component (B.A.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Prior to registering for each Joint Honours component, students must consult with advisers in the respective departments for approval of their course selection.

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00. Departments may require a higher program GPA. Joint Honours students must meet the requirements of both components of their program.

The specific course requirements for the 36-credit Joint Honours Component Russian program are determined on an individual basis in consultation with the student's program adviser(s).

The Honours thesis course, RUSS 490 Honours Seminar 01., is usually completed in the student's final year and is on a topic in Russian

literature or culture agreed upon in consultation with the student's thesis advisor. It is to be written independently from the thesis that is required by the second program in which the student is pursuing their Joint Honours degree

¹ Note: Students must submit their Russian thesis project proposals to the Russian Studies departmental adviser by March 15th or November 15th of the preceding term for independent research courses.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Linguistics Minor Concentration (B.A.) (18 credits)

Offered by: Linguistics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Linguistics focuses on basic Linguistics, the scientific study of human language, including phonetics and syntax, theoretical linguistics (phonology, syntax and semantics); experimental linguistics (phonetics, laboratory phonology, language acquisition and psycholinguistics); computational linguistics; linguistic fieldwork and language revitalization; and language variation and change (sociolinguistics, dialectology and historical linguistics). The program is expandable to the Major Concentration in Linguistics.

Required Courses (9 credits)

Expand allContract all

Course	Title	Credits
LING 201	Introduction to Linguistics.	3
LING 330	Phonetics.	3
LING 371	Syntax 1.	3

Required courses must be completed at McGill unless Departmental permission is obtained.

Complementary Courses (9 credits)

9 credits in Linguistics chosen according to the student's interests.

At least 3 of these credits must be at the 400 or 500 level. Only 3 credits at the 200 level may count towards complementary credits. Students who take LING 360 Introduction to Semantics, as one of their complementary courses may also count one of the following courses that are its prerequisites toward the complementary course requirement:

Études et pratiques littéraires Concentration Mineure (B.A.) (18 crédits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Description du Programme

Ce programme offre une introduction aux études littéraires de langue française et aux différentes pratiques littéraires que sont la création, la traduction et l'édition. Il vise également à fournir à chaque étudiant(e) les moyens de bien maîtriser l'écriture critique et les ressources de la langue. Il est possible de s'inscrire d'abord à ce programme et de le convertir par la suite en concentration majeure, moyennant l'ajout des cours requis pour répondre aux exigences de ce dernier programme. L'admission au programme nécessite une bonne connaissance du français lu, écrit et parlé.

Études et pratiques littéraires Concentration (B.A.) (36 crédits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Description du Programme

Ce programme offre une formation générale qui inclut l'histoire des littératures d'expression française, l'analyse critique des œuvres et la théorie littéraire. Cette formation vise également à fournir aux étudiant(e)s les moyens de bien maîtriser l'écriture critique et les ressources de la langue. L'étude de la littérature s'y fait à travers les différentes pratiques que sont la création, la traduction et l'édition. Tou(te)s les étudiant(e)s sont amené(e)s à suivre aussi bien des cours portant sur les études littéraires que des cours portant sur les pratiques littéraires ; ils et elles doivent cependant choisir une majorité de cours dans l'un ou l'autre grand domaine. L'inscription au programme presuppose une très bonne connaissance du français lu, écrit et parlé.

Degree Requirements – B.A. students

Études et pratiques littéraires Spécialisation Enrichie (B.A.) (72 crédits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 72

Description du Programme

Ce programme, qui prépare aux études supérieures, offre une formation spécialisée incluant l'histoire des littératures d'expression française, l'analyse critique des œuvres et la théorie littéraire. La formation vise également à fournir aux étudiant(e)s une initiation

à la recherche et les moyens de bien maîtriser l'écriture critique et les ressources de la langue. Les étudiant(e)s suivent aussi bien des cours portant sur les études littéraires que des cours portant sur les pratiques littéraires. Ils et elles doivent en outre se spécialiser dans l'un ou l'autre grand domaine en choisissant entre trois orientations : « Études littéraires », « Création littéraire » et « Traduction littéraire ». L'inscription au programme presuppose une très bonne connaissance du français lu, écrit et parlé. Moyennes minimales requises : 3,00 pour l'ensemble des cours du programme et un CGPA de 3,00.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Cours Obligatoires (21 crédits)

Le Baccalauréat ès Arts compte normalement 90 crédits (ou 120 crédits pour les étudiant(e)s admis en U0). L'étudiant(e) qui s'inscrit au programme « B.A. ; Spécialisation enrichie en Langue & littérature françaises ; option « Études et pratiques littéraires » s'assurera de cumuler, en plus des 72 crédits de spécialisation enrichie, une balance de 18 crédits. L'étudiant(e) peut mobiliser ces 18 crédits comme il ou elle le souhaite. Il ou elle peut cumuler ces crédits au DLLF ou ailleurs, en respectant les limites fixées par l'Université. Il ou elle n'a pas l'obligation de compléter une concentration mineure dans un autre programme mais il ou elle a la possibilité de le faire (auquel cas on s'assurera de respecter les exigences fixées par le département visé).

**Langue française
Concentration Mineure (B.A.)
(18 crédits)****Offered by:** French Language & Literature (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 18**Description du Programme**

Le programme « Concentration mineure en Langue et littérature françaises (option « Langue française ») » est offert en collaboration avec le Centre d'enseignement du français. Il s'adresse à des étudiant(e)s de français langue seconde qui ont déjà une bonne connaissance de la langue. Il vise l'acquisition d'un niveau de français équivalent au niveau B2 (« utilisateur expérimenté ») du Cadre européen de référence pour les langues dans les sphères universitaire, professionnelle, publique et personnelle.

Cette concentration mineure ne peut pas être convertie en concentration majeure. Pour être admis(e), l'étudiant(e) doit passer un test de classement au Centre d'enseignement du français.

¹ Pour s'inscrire aux cours FREN 201 Le français littéraire (français langue seconde). ou FREN 203 Analyse de textes (français langue seconde) ., l'étudiant(e) s'assurera d'avoir réussi le FRSL 431 Français fonctionnel avancé. ou d'avoir réussi ou être inscrit(e) à au moins un des cours suivants : FRSL 445 Français fonctionnel, écrit 1., FRSL 446 Français fonctionnel, écrit 2., FRSL 449 Le français des médias. ou FRSL 455 Grammaire et création..

Traduction Concentration Mineure (B.A.) (18 crédits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Description du Programme

Le programme de « Concentration mineure en Langue et littérature françaises (option « Traduction ») » offre une introduction à la traduction de l'anglais vers le français. Il favorise l'amélioration de la compréhension de l'anglais et des compétences rédactionnelles en français. Il est possible de s'inscrire d'abord à ce programme et de le convertir par la suite en concentration majeure, moyennant l'ajout des cours requis pour répondre aux exigences de ce dernier programme. L'admission nécessite une bonne connaissance du français et de l'anglais lus et écrits, ainsi que du français parlé; cette connaissance est vérifiée à l'aide d'un test de classement, à la suite duquel l'étudiant(e) peut se voir imposer de suivre le cours FREN 239 Stylistique comparée.

Traduction Concentration (B.A.) (36 crédits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Description du Programme

Le programme de « Concentration majeure en Langue et littérature françaises (option « Traduction ») » offre une formation générale en traduction de l'anglais vers le français. D'abord pratique, cette formation fournit également des assises théoriques sur le fonctionnement de la langue ou les enjeux de la traduction. Elle favorise l'amélioration de la compréhension de l'anglais et des compétences rédactionnelles en français, compétences que l'étude de la littérature de langue française viendra renforcer. L'admission au programme nécessite une bonne connaissance du français et de l'anglais lus et écrits, de même que du français parlé ; cette connaissance est vérifiée

à l'aide d'un test de classement, à la suite duquel l'étudiant(e) peut se voir imposer de suivre le cours FREN 239 Stylistique comparée.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Mathematics Minor Concentration (B.A.) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Mathematics is offered in two versions: an expandable version, for students who wish to leave open the option of expanding the program into a Major Concentration Mathematics, and a non-expandable version for students who know on entry into the Minor that they do not wish to expand it into a major concentration.

The Minor Concentration Mathematics may be taken in conjunction with a major concentration in some other discipline under option A of the Multi-track System. Students planning on taking the Major Concentration Mathematics and the Minor Concentration Mathematics as part of Multi-track option C should select the Supplementary Minor Concentration in Mathematics in place of this Minor concentration.

Under option C, it is not possible to combine the Minor Concentration Mathematics and the Minor Concentration Statistics. Students wishing to do this should instead take the Major Concentration Mathematics under option B (two major concentrations) and select a large number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

No overlap is permitted with other programs.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 18 credits required for the program.

Course	Title	Credits
MATH 133	Linear Algebra and Geometry.	3
MATH 140	Calculus 1.	3
MATH 141	Calculus 2.	4

Expandable Version: Required Courses (12 credits)

Course	Title	Credits
MATH 222	Calculus 3.	3
MATH 235	Algebra 1. ¹	3
MATH 236	Algebra 2.	3
MATH 315	Ordinary Differential Equations.	3

¹ Note: Credit cannot be received for both MATH 236 Algebra 2. and MATH 223 Linear Algebra. (listed as a required course in the non-expandable version of this Minor concentration).

Expandable Version: Complementary Courses (6 credits)

Students selecting the expandable version of this program complete 6 credits of complementary courses from the Complementary Course List.

It is strongly recommended that students take MATH 323 Probability. as a complementary course.

Non-Expandable Version: Required Courses (9 credits)

Course	Title	Credits
MATH 222	Calculus 3.	3
MATH 223	Linear Algebra. ¹	3
MATH 315	Ordinary Differential Equations.	3

¹ Note: Credit cannot be received for both MATH 223 Linear Algebra. and MATH 236 Algebra 2. (listed as a required course in the expandable version of this Minor concentration).

Non-Expandable Version: Complementary Courses (9 credits)

Students selecting the non-expandable version of this program complete 9 credits of complementary courses from the Complementary Course List.

It is strongly recommended that students take MATH 323 Probability. as a complementary course.

Complementary Course List

[Expand all](#)[Contract all](#)

Course	Title	Credits		Credits
MATH 249	Honours Complex Variables.	3		
MATH 314	Advanced Calculus.	3		
MATH 316	Complex Variables.	3

MATH 348	Euclidean Geometry.	3		
MATH 417	Linear Optimization.	3		
MATH 451	Introduction to General Topology.	3		

¹ Note: Either MATH 249 Honours Complex Variables. or MATH 316 Complex Variables. may be taken but not both.

Mathematics Concentration (Supplementary Minor) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

This Minor concentration is open only to students registered in the Major Concentration Mathematics. Taken together, these two concentrations constitute a program equivalent to the Major in Mathematics offered by the Faculty of Science.

No course overlap between the Major Concentration Mathematics and the Supplementary Minor Concentration in Mathematics is permitted.

Note that according to the Faculty of Arts Multi-track System degree requirements, option C, students registered in the Supplementary Minor Concentration in Mathematics must also complete another minor concentration in a discipline other than Mathematics.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

Required Course (3 credits)

[Expand all](#)[Contract all](#)

MATH 525	Sampling Theory and Applications.	4

Statistics Minor Concentration (B.A.) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

The Minor Concentration Statistics is offered only in a non-expandable version, that is, one that cannot be expanded into the Major Concentration Mathematics.

The Minor Concentration Statistics may be taken in conjunction with a major concentration in some other discipline under option A of the Multi-track System, or together with the Major Concentration Mathematics and a minor concentration (which must be in some other discipline than Mathematics) under option C.

Under option C, it is not possible to combine the Minor Concentration Statistics and the Minor Concentration Mathematics. Students wishing to do this should instead take the Major Concentration Mathematics under option B (two major concentrations) and select a large number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

No overlap is permitted with other programs.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 18 credits required for the program.

Statistics Concentration (Supplementary Minor) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

Students may complete this program with a minimum of 18 credits or a maximum of 20 credits.

Taken together with the B.A.; Major Concentration in Statistics, this program constitutes an equivalent of the B.Sc.; Major in Statistics program offered by the Faculty of Science. It provides training in statistics, with a mathematical core and basic training in computing. With satisfactory performance in an appropriate selection of courses, these two programs can lead to the accreditation "A.Stat" from the Statistical Society of Canada, which is regarded as the entry level requirement for a statistician practicing in Canada.

This supplementary minor concentration is open only to students registered in the B.A.; Major Concentration in Statistics. Taken together, these two programs constitute a program equivalent to the B.Sc.; Major in Statistics offered by the Faculty of Science. No course overlap between the B.A.; Major Concentration in Statistics and the B.A.; Supplementary Minor Concentration in Statistics is permitted.

Note that according to the Faculty of Arts Multi-Track System degree requirements, option C, students registered in the B.A.; Supplementary Minor Concentration in Statistics must also complete another minor concentration in a discipline other than Mathematics and Statistics. For more information about the Multi-Track System options, please refer to Faculty of Arts regulations under "Faculty Degree Requirements," "About Program Requirements," and "Departmental Programs."

This supplementary minor concentration is open only to students registered in the B.A.; Major Concentration in Statistics. Taken together, these two programs constitute a program equivalent to the B.Sc.; Major in Statistics offered by the Faculty of Science. No course overlap between the B.A.; Major Concentration in Statistics and the B.A.; Supplementary Minor Concentration in Statistics is permitted.

Statistics Major Concentration (B.A.) (46 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 46

Program Description

The program provides training in statistics with a mathematical core. Taken together with the B.A.; Supplementary Minor Concentration in Statistics, these two programs constitute an equivalent of the B.Sc.; Major in Statistics program offered by the Faculty of Science. With satisfactory performance in an appropriate selection of courses, these two programs can lead to the accreditation "A.Stat" from the Statistical Society of Canada, which is regarded as the entry level requirement for a statistician practicing in Canada. Students interested in this accreditation should consult an academic advisor.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Guidelines for Course Selection

Students who received advanced standing or the CEGEP equivalent of the 100-level Math courses listed below are no longer required to take them. Whenever an exemption without credits is granted for a 200-level and above required Math course, the latter must be replaced with a complementary course chosen in consultation with a program advisor.

Students are strongly advised to complete all required courses by the end of U2.

Where appropriate, Honours courses may be substituted for equivalent courses. Students planning to pursue graduate studies are encouraged to make such substitutions.

Required Courses (34 credits)

Statistics Honours (B.A.) (63 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Science; Bachelor of Arts

Program credit weight: 63

Program Description

The B.Sc.: Honours in Statistics provides training, at the honours level, in statistics, with a solid mathematical core, and basic training in computing. With a suitable selection of complementary courses, the program can focus on probability, mathematical statistics, applied statistics, actuarial science and finance, or data science. With satisfactory performance in an appropriate selection of courses, this program can lead to the professional accreditation A.Stat from the Statistical Society of Canada, which is regarded as the entry level requirement for a Statistician practicing in Canada.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Students may complete this program with a minimum of 60 credits or a maximum of 63 credits depending on whether or not they are required to take MATH 222 Calculus 3..

Program Prerequisites

The minimum requirement for entry into the Honours program is that the student has completed with high standing the following courses or their equivalents:

Expand allContract all

Course	Title	Credits
MATH 133	Linear Algebra and Geometry.	3
MATH 150	Calculus A.	4
MATH 151	Calculus B.	4

In particular, MATH 150 Calculus A./MATH 151 Calculus B. and MATH 140 Calculus 1./MATH 141 Calculus 2./MATH 222 Calculus 3. are considered equivalent.

Required Courses (25-28 credits)

Students who have not completed an equivalent of MATH 222 Calculus 3. on entering the program must consult an academic adviser and take MATH 222 Calculus 3. as a required course in the first semester, increasing the total number of program credits from 60 to 63. Students

who have successfully completed MATH 150 Calculus A./MATH 151 Calculus B. are not required to take MATH 222 Calculus 3..

Note: Students with limited knowledge of computer programming should take COMP 202 Foundations of Programming./COMP 204 Computer Programming for Life Sciences./COMP 208 Computer Programming for Physical Sciences and Engineering . or equivalent before COMP 250 Introduction to Computer Science.. UO students may take COMP 202 Foundations of Programming. as a Foundation Science course; new U1 students should take one of these courses as an elective in their first semester.

Note: Students who wish to take MATH 204 Principles of Statistics 2. as a complementary course are strongly advised to take MATH 203 Principles of Statistics 1. beforehand, in their first semester or their first year.

Students who transfer to Honours in Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

To be awarded the Honours degree, the student must have, at time of graduation, a CGPA of at least 3.00 in the required and complementary Mathematics courses of the program, as well as an overall CGPA of at least 3.00.

¹ Students with limited programming experience should take COMP 202 Foundations of Programming./COMP 204 Computer Programming for Life Sciences./COMP 208 Computer Programming for Physical Sciences and Engineering . or equivalent before COMP 250 Introduction to Computer Science..

² Students who have successfully completed MATH 150 Calculus A./MATH 151 Calculus B. or an equivalent of MATH 222 Calculus 3. on entering the program are not required to take MATH 222 Calculus 3..

³ Students select either MATH 251 Honours Algebra 2. or MATH 247 Honours Applied Linear Algebra., but not both.

Complementary Courses (35 credits)

Advising notes:

Students wishing to pursue mathematical statistics in graduate school are advised to take MATH 587 Advanced Probability Theory 1. and recommended to take honours mathematics courses as complementary courses in Part II, in particular MATH 358 Honours

Advanced Calculus., MATH 454 Honours Analysis 3. (preferably prior to MATH 587 Advanced Probability Theory 1.), and MATH 455 Honours Analysis 4..

Students wishing to pursue applied statistics and/or careers as statisticians in industry or government are advised to take MATH 523 Generalized Linear Models., MATH 524 Nonparametric Statistics., MATH 547 Stochastic Processes., at least one of MATH 525 Sampling Theory and Applications. and MATH 558 Design of Experiments., and as many courses as possible from Part III of the list of Complementary Courses below. Students interested in obtaining the A-Stat accreditation from the Statistical Society of Canada should discuss their course selection with the academic adviser.

Students with interest in probability are advised to choose from the following as part of their Complementary Courses:

Expand allContract all

Course	Title	Credits
MATH 547	Stochastic Processes.	4
MATH 587	Advanced Probability Theory 1.	4

Mathematics Major Concentration (B.A.) (46 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 46

Program Description

The B.A.; Major Concentration in Mathematics aims to provide an overview of the foundations of mathematics.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Guidelines for Course Selection

Students who received advanced standing or the CEGEP equivalent of the 100-level Math courses listed below are no longer required to take them. Whenever an exemption without credits is granted for a 200-level and above required Math course, the latter must be replaced with a complementary course chosen in consultation with a program advisor.

Where appropriate, Honours-level courses may be substituted for their Majors-level counterparts. Students planning to undertake graduate studies in mathematics are urged to make such substitutions. If there is no major counterpart available for a course, please see a departmental advisor to discuss its inclusion into your program as a complementary course in the lower section.

Students interested in computer science should consider the courses MATH 317, MATH 318, MATH 327, MATH 340, MATH 417, and take the Minor Concentration Computer Science.

Students interested in probability and statistics should consider either taking the Minor Concentration Statistics under option C or taking the major concentration in statistics.

Students interested in applied mathematics should consider the courses MATH 317, MATH 319, MATH 324, MATH 326, MATH 327, and MATH 417.

Students interested in careers in business, industry or government should consider the courses MATH 317, MATH 319, MATH 327, MATH 417, MATH 423, and MATH 447.

Students who have done well in MATH 242 and MATH 235 at the end of their first term should consider, in consultation with their adviser and the instructors of the courses involved, the possibility of entering

an Honours program in Mathematics, in Applied Mathematics, in Probability and Statistics, or a Joint Honours program in Mathematics and another discipline.

Required Courses (28 Credits)

Mathematics Joint Honours Component (B.A.) (36 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

To remain in the Joint Honours program and receive the Joint Honours degree, a student must maintain the standards set by each discipline, as well as by the Faculty. In the Mathematics courses of the program a GPA of 3.00 and a CGPA of 3.00 must be maintained. Students who have difficulty in maintaining the required level should change to another program before entering their final year.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 36 credits required for the program.

[Expand all](#) [Contract all](#)

MATH 457	Honours Algebra 4. ⁴	3
MATH 458	Honours Differential Geometry. ⁵	3
MATH 466	Honours Complex Analysis.	3

Program Description

The B.Sc.; Honours in Applied Mathematics provides an in-depth training, at the honours level, in “discrete” or “continuous” applied mathematics. It gives the foundations and necessary tools to explore some areas such as numerical analysis, continuous and discrete optimization, graph theory, discrete probability. The program also provides the background required to pursue interdisciplinary research at the interface between mathematics and other fields such as biology, physiology, and the biomedical sciences. This program may be completed with a minimum of 60 credits or a maximum of 63 credits.

Students may complete this program with a minimum of 60 credits or a maximum of 63 credits depending if they are exempt from MATH 222 Calculus 3..

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites

The minimum requirement for entry into the Honours program is that the student has completed with high standing the following courses below or their equivalents:

Expand allContract all

Course	Title	Credits
MATH 133	Linear Algebra and Geometry.	3
MATH 150	Calculus A.	4
MATH 151	Calculus B.	4

In particular, MATH 150 Calculus A./MATH 151 Calculus B. and MATH 140 Calculus 1./MATH 222 Calculus 3. are considered equivalent.

Students who have not completed an equivalent of MATH 222 Calculus 3. on entering the program must consult an academic adviser and take MATH 222 Calculus 3. as a required course in the first semester, increasing the total number of program credits from 60 to 63. Students who have successfully completed MATH 150 Calculus A./MATH 151 Calculus B. are not required to take MATH 222 Calculus 3..

Note: COMP 202 Foundations of Programming.—or an equivalent introduction to computer programming course—is a program prerequisite. UO students may take COMP 202 Foundations of Programming. as a Foundation Science course; new U1 students should take it as an elective in their first semester.

Students who transfer to Honours in Applied Mathematics from other programs will have credits for previous courses assigned, as appropriate, by the Department.

To be awarded the Honours degree, the student must have, at time of graduation, a CGPA of at least 3.00 in the required and complementary Mathematics courses of the program, as well as an overall CGPA of at least 3.00.

Required Courses (36-39 credits)

Mathematics Honours (B.Sc.) (63 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 63

Program Description

The B.Sc.; Honours in Mathematics provides an in-depth training, at the honours level, in mathematics. It gives the foundations and tools needed to explore diverse areas of mathematics such as analysis, number theory, geometry, geometric group theory, and probability. This program may be completed with a minimum of 60 credits or a maximum of 63 credits.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites

The minimum requirement for entry into the Honours program is that the student has completed with high standing the following courses below or their equivalents.

Expand allContract all

History and Philosophy of Science Minor Concentration (B.A.) (18 credits)

Offered by: Philosophy (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 18

Program Description

History and Philosophy of Science at McGill is an interdisciplinary program that aims to provide students with an understanding of science through the study of both its historical development and of some of the fundamental philosophical principles upon which it rests. For more information about the program and events, please visit <http://www.mcgill.ca/hpsc>.

Complementary Courses (18 credits)

18 credits with a maximum of 9 credits at the 200 level selected as follows:

Philosophy of Science

6-12 credits of courses focused on the Philosophy of Science with no more than 6 credits at the 200 level chosen from the following:

Political Science Minor Concentration (B.A.) (18 credits)

Offered by: Political Science (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 18

Program Description

The Minor Concentration in Political Science is an 18-credit program in four fields: comparative politics, international relations, Canadian politics, and political theory, including empirical methods.

Complementary Courses (18 credits)

18 credits selected as follows:

6 or 9 POLI credits at the 200 level. Each of these POLI courses must be in a different group, the relevant groups being: Canadian Politics, International Relations, Comparative Politics, Political Theory, and Methods.

The rest of the 18 credits (9 or 12 credits) must come from POLI courses at the 300 or 400 level in any group(s). Note, however, that to take a 300- or 400-level POLI course, students must have taken a 200-level POLI course in the same field.

No more than 6 POLI transfer credits can be used toward the program requirements.

POLI 490 Independent Reading and Research 1. and POLI 499 Honours Essay. are not open to students enrolled in the Minor Concentration.

Course lists for each group of political science courses are provided below.

Political Science Major Concentration (B.A.) (36 credits)

Offered by: Political Science (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Political Science is a 36-credit program in four fields: comparative politics, international relations, Canadian politics, and political theory, including empirical methods.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Complementary Courses (36 credits)

36 credits of courses selected from the four main fields of political science (Canadian Politics, Comparative Politics, International Relations, and Political Theory) with the following specifications.

Only POLI courses at the 200-level or above (or their equivalent courses from other universities can be counted toward this program.

No more than one-half of the credits (18 credits) may be taken in a single field of political science, unless the field is Comparative Politics in which case the maximum is 21 credits.

12 of the 36 credits must be taken at the 200 level. No more than 3 credits at the 200 level may be in any given group - the groups being Canadian Politics, Comparative Politics, International Relations,

No more than one-half (24 credits) of a student's political science credits may be in any one field (Canadian Politics, Comparative Politics, International Relations, Political Theory). However, if the field is Comparative Politics the maximum is 27 credits.

To take an upper-level POLI course (i.e. courses at the 300, 400 or 500 level), students must have taken a 200-level POLI course in the same field. Students are therefore expected to take all their 200-level courses in their first two years.

No more than 15 Political Science transfer credits can be used toward the program requirements.

Course lists for each group of political science courses are provided below.

Political Science Honours (B.A.) (48 credits)

Offered by: Political Science (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 48

Program Description

The Honours program in Political Science focuses on four fields in Political Science: comparative politics, international relations, Canadian politics, and political theory, including empirical methods that complement the four substantive fields of Political Science. Students may enter the Honours program at the start of U2. To enter, remain and graduate in Honours, students must achieve/maintain a 3.3 average in their political science courses and more than half of the political science grades must be at the B+ level or higher. According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Course (3 credits)

Faculty Program in Population and Global Health (B.A.) (54 credits)

Offered by: Department of Global and Public Health (Faculty of Medicine and Health Sciences)

Degree: Bachelor of Arts

Program credit weight: 54

Program Description

The B.A.; Faculty Program in Population and Global Health is an interdisciplinary program with a competency-based approach that focuses on values, skills and approaches foundational to improving health equity and population health both locally and globally. The key issues in population, global and Indigenous health are complemented by ethical principles, data literacy, research methods and knowledge translation. Areas of specialization include the following streams: Environment and Health; Culture, Society and Health; Diet, Lifestyle and The Life Course; Systems, Policy and Government; and Innovation and Leadership. There is an emphasis on teambased, problem-focused and communityengaged experiential learning. Blended learning will be used for some courses, which includes synchronous and asynchronous activities.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (33 credits)

Behavioural Science Minor Concentration (B.A.) (18 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

Psychology is the scientific study of the mind and behaviour. The B.A. Minor Concentration Behavioural Science (18 credits) is available only to Arts Majors in Psychology. This minor is a specialization option that allows Arts Majors in Psychology to complete additional credits in Psychology, allowing for a more specialized degree than the Major Concentration alone (see Program Requirements below).

Program Requirements

Restricted to students registered in the Bachelor of Arts, Major Concentration Psychology.

For B.A. Psychology Major Concentration students only; this program provides students with the space to take the additional courses they may need for applying to graduate school in psychology and for

completing the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs).

Note that this counts as a second minor concentration and is open only to students registered in the Bachelor of Arts, Major Concentration Psychology. A first minor concentration must also be completed in a discipline other than Psychology. Please note that a Minor Concentration in Educational Psychology does not fulfill this requirement as it is considered to be within the Psychology discipline.

Complementary Courses (18 credits)

18 credits selected as follows:

3 credits in Psychology from List A - (Behavioural Neuroscience, Cognition and Quantitative Methods)

3 credits in Psychology from List B - (Social, Health and Developmental Psychology)

3 credits in Psychology at the 400 or 500 level

9 credits at the 300 level or above from one or more of the following disciplines: Psychology (PSYC), Anthropology (ANTH), Linguistics (LING), or Sociology (SOCI).

List A - (Behavioural Neuroscience, Cognition and Quantitative Methods)

Psychology Minor Concentration (B.A.) (18 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

Psychology is the scientific study of the mind and behaviour. The B.A. Minor Concentration Psychology (18 credits) is intended to compliment the student's primary field of study by providing a focused introduction to specialized topics in psychology.

Program Requirements

Students registered in a Bachelor of Arts program in another department may pursue the Minor Concentration Psychology. This

Program Prerequisites (0-3 credits)

Students planning to enter the Minor Concentration Psychology program should have completed an introductory course in general psychology in CEGEP. Otherwise, they can complete it in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology. at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology. in their first year.

McGill Foundation students are recommended to complete the following course in their UO year:

12 credits in Psychology at the 300 level or above.

Psychology Major Concentration (B.A.) (36 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Psychology is the scientific study of the mind and behavior. The B.A. Major Concentration in Psychology (36 credits) provides students with a basic overview, covering the core areas of psychological science as well as more advanced courses in specialized content areas. Students also have the option to complete a research course(s) (see Program Requirements for details). Note: this program may not provide sufficient undergraduate background preparation for certain graduate programs. Students who wish to go on to graduate training in psychology, and those who wish to complete the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs), are advised to take the supplementary Minor Concentration Behavioural

Science. This specialization option will give students the space to take the additional courses they may need for such applications.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites (0-6 credits)

Students planning to enter the Major Concentration Psychology program should have completed an introductory course in general psychology and biology in CEGEP. Otherwise, they can complete them in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology in their first year.

Students who have completed Human Biology or General Biology 1 or 2 in CEGEP would have the recommended biology background. Students who have not completed one of those courses are advised to complete BIOL 115 Essential Biology, or BIOL 111 Principles: Organismal Biology, or BIOL 112 Cell and Molecular Biology during their first year.

Psychology Honours (B.A.) (60 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

Psychology is the scientific study of the mind and behavior. The B.A. Honours in Psychology (60 credits) is a specialized program that provides students with an in-depth overview of psychological science, covering the core areas as well as more advanced courses. Students are required to take a 2-term research course and seminar; students also have the option to complete additional research course(s) and/or gain additional training in arts related disciplines (see Program Requirements for details). This program emphasizes practice in the research techniques and statistics used in graduate school and professionally later on. It also provides students with the space to take the additional courses they may need for applying to graduate school in psychology and for completing the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs). Students must apply to the Honours program; admission is selective.

Program Requirements

Typically, students apply to the Honours program at the end of U1; students may apply at the end of U2, although there are often fewer seats for students applying in U2 (also the Honours program requirements must be completed within the remaining terms). To be eligible to apply to the BA Honours in Psychology, students must have completed a minimum of 27 graded credits in the academic year prior to applying (fall and winter terms only). All applicants must have taken PSYC 204 Introduction to Psychological Statistics., PSYC 211 Introductory Behavioural Neuroscience., PSYC 212 Perception., PSYC 213 Cognition., PSYC 215 Social Psychology. and PSYC 305 Statistics for Experimental Design.. Exceptional performance in these courses is a primary criterion for acceptance into the Honours program. In addition to performance in these psychology courses, a minimum cumulative grade point average (CGPA) of 3.50 is required to apply. However, since enrolment is limited, the typical CGPA cut-off is ~3.75, although this varies from year to year depending on the applicant pool. Once in the Honours program, students must obtain a GPA of 3.00 in the U2 year to continue in the Honours program for U3. Students are also encouraged to continue to complete a minimum of 27 graded credits in their U2 and U3 academic years. This is also the minimum number of credits required to be eligible for fellowships and awards.

The application is available on the Psychology Department website at: <https://www.mcgill.ca/psychology/undergraduate/current-students/research-opportunities/research-courses>. The deadline is specified on the website. Candidates will be informed of the Department's decision via email before classes begin in September.

Awarding of the Honours degree will depend on both CGPA and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "First Class Honours" is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A- in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "Honours" is awarded

to students with a minimum CGPA of 3.00 and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology..

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites (0-6 credits)

Students planning to enter the BA Honours Psychology program, should have completed an introductory course in general psychology, biology and statistics at the CEGEP level. Otherwise, they can complete them in their first year of study at McGill University (see below).

Students who have completed Human Biology or General Biology 1 or 2 in CEGEP would have the recommended biology background. Students who have not completed one of those courses are advised to complete BIOL 115 Essential Biology. or BIOL 111 Principles: Organismal Biology. or BIOL 112 Cell and Molecular Biology. during their first year.

McGill Foundation students are recommended to complete the following courses in their U0 year:

Psychology Joint Honours Component (B.A.) (36 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Psychology is the scientific study of the mind and behavior. The B.A.; Joint Honours Psychology Component (36 credits) provides students with an overview of psychological science, covering the core areas as well as select advanced courses. Students are required to take a 2-term research course and seminar; students also have the option to complete an additional research course (see Program Requirements for details). This program emphasizes practice in the research techniques and statistics used in graduate school and professionally later on. However, the Joint Honours Program is not as comprehensive as the B.A. or B.Sc. Honours Program, and does not give students the space to take the additional courses they may need for certain graduate programs in psychology or to complete the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs). Students must apply to the Joint Honours program; admission is selective.

Program Requirements

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection.

Admission to the B.A. Joint Honours Component Psychology is highly selective. Typically, students apply to the B.A Joint Honours program at the end of U1; students may apply at the end of U2, although there are often fewer seats for students applying in U2 (also the B.A. Joint Honours program requirements must be completed within the remaining terms). To be eligible to apply to the B.A. Joint Honours in Psychology, students must have completed a minimum of 27 graded credits in the academic year prior to applying (fall and winter terms only). All applicants must have taken PSYC 204 Introduction to Psychological Statistics., PSYC 211 Introductory Behavioural Neuroscience., PSYC 212 Perception., PSYC 213 Cognition., PSYC 215 Social Psychology. and PSYC 305 Statistics for Experimental Design.. Exceptional performance in these courses is a primary criterion for acceptance into the B.A. Joint Honours program. In addition to performance in these psychology courses, a minimum cumulative grade point average (CGPA) of 3.50 is required to apply. However,

since enrolment is limited, the typical CGPA cut-off is ~3.75, although this varies from year to year depending on the applicant pool. Once in the B.A. Joint Honours program, students must obtain a GPA of 3.00 in the U2 year to continue in the B.A. Joint Honours program for U3. Students are also encouraged to continue to complete a minimum of 27 graded credits in their U2 and U3 academic years. This is also the minimum number of credits required to be eligible for fellowships and awards.

The application is available on the Psychology Department website at: <https://www.mcgill.ca/psychology/undergraduate/current-students/research-opportunities/research-courses>. The deadline is specified on the website. Candidates will be informed of the Department's decision via email before classes begin in September.

Awarding of the B.A. Joint Honours program will depend on both CGPA and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "First Class Honours" is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A- in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "Joint Honours" is awarded to students with a minimum CGPA of 3.00 and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology..

In addition to the requirements of the B.A. Joint Honours Component Psychology, students must also complete all requirements of their other Joint Honours component.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Program Prerequisites (0-6 credits)

Students planning to enter the B.A. Joint Honours Psychology program, should have completed an introductory course in general psychology, biology and statistics at the CEGEP level. Otherwise, they can complete them in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology. at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology. in their first year.

Students who have completed Human Biology or General 1or 2 in CEGEP would have the recommended biology background.

Student who have not completed ones of those courses are advised to complete BIOL 115 Essential Biology. or BIOL 111 Principles: Organismal Biology. or BIOL 112 Cell and Molecular Biology. during their first year.

McGill Freshman students are recommended to complete the following courses in their U0 year:

Religious Studies Honours (B.A.) (60 credits)

Offered by: Religious Studies (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 60

Program Description

The B.A.; Honours in Religious Studies focuses on the methodological approaches to the study of religious traditions, including the languages, teachings, and history of those traditions. A 6-credit Honours thesis related to the student's area of focus must be submitted. The Honours thesis topic must be approved by a Religious Studies adviser. A supervisor will be appointed to guide the student.

Students must maintain a program GPA and a CGPA of 3.00 (or 3.50 for First Class Honours).

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Religious Studies Joint Honours Component (B.A.) (36 credits)

Offered by: Religious Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Joint Honours - Religious Studies Component focuses on the methodological approaches to the study of religious traditions, including the teachings, and history of those traditions.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable). A 3-credit Joint Honours thesis related to the student's area of focus must be submitted. The Joint Honours thesis topic must be approved by a Religious Studies adviser. A supervisor will be appointed to guide the student.

Students in Joint Honours program must maintain a program GPA and a CGPA of 3.00 (3.50 for First Class Honours) and attain a B- or higher in each program course. No overlap is allowed between the courses forming each component of the Joint Honours program.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Religious Studies (B.Th.) (120 credits)

Offered by: Religious Studies (Faculty of Arts)

Degree: Bachelor of Theology

Program credit weight: 120

Program Description

The Bachelor of Theology (B.Th.) degree requires 120 credits. Many students enter the program with advanced standing, and their credit requirement for the degree is adjusted accordingly. All students must discuss their course selection with their program adviser.

Students admitted on the basis of a bachelor degree will have advanced standing and should consult their program adviser to determine any course equivalencies completed during their first degree and how these affect their program requirements for the Bachelor of Theology.

The Bachelor of Theology degree serves three types of students: those seeking a classically oriented undergraduate program in the humanities that allows them to focus eventually on theology and related disciplines (90/120 credits); those who already have a degree but desire to add this competency, whether out of personal interest or with a view to graduate research in a theological discipline (60 credits); and those who not only desire but require it for the sake of a subsequent professional degree such as the Master of Divinity.

The Bachelor of Theology engages students in some of life's biggest questions and some of the world's most influential literature. Those doing 90 or more credits can (schedules permitting) add a Minor Concentration program in some other desired discipline or field; those who enter the program at Year 0 can add two Minor Concentrations offered by the Faculty of Arts and the Faculty of Science.

The normal course load in the degree for full-time students is 15 credits per term, five 3-credit courses. By permission of the Chair of the B.Th. Committee, students may also enroll for courses at any university in the province of Quebec. For further information, see Quebec Inter-University Transfer Agreement: McGill Students.

Professional and vocational courses (e.g., leading to ordination) are available through the In-Ministry Year (Master of Divinity (M.Div.)) upon the completion of the B.Th. degree.

Degree Requirements – B.Th. students

To be eligible for a B.Th. degree, a student must fulfil all School and program requirements as indicated below:

1. The B.Th. is either a 120-credit program (if you were admitted from outside Quebec and without a prior bachelor's degree), a 90-credit program (if you were admitted on the basis of a Quebec DCS/DEC or equivalent), or a 60-credit program (if you were admitted on the basis of a recognized bachelor's degree).
2. Qualification for the degree must include Satisfactory Standing (a grade of C or better) in all required courses and the complementary courses specified in Year 3, and the accumulation of enough acceptable credits to make a total of either 60, 90, or 120 credits. It should be noted that if you take the B.Th. program as part of the M.Div. program, you need to maintain a minimum CGPA of 2.5 to be eligible for the M.Div. degree.
3. Normally, the program credits must be earned within five years from the date of entrance.

Religious Studies Honours (B.Th.) (120 credits)

Offered by: Religious Studies (Faculty of Arts)

Degree: Bachelor of Theology

Program credit weight: 120

Program Description

Students who have achieved a CGPA of 3.30 at the end of B.Th. Year 2 (U2) may apply to the B.Th. Committee for permission to enter the Honours program. They will be required to complete the normal requirements for the Bachelor of Theology (B.Th.) (p. 248) degree and the honours courses RELG 494 and RELG 495 in the B.Th. Year 3 (U3) with a grade of B or better.

Degree Requirements – B.Th. students

To be eligible for a B.Th. degree, a student must fulfil all School and program requirements as indicated below:

1. The B.Th. is either a 120-credit program (if you were admitted from outside Quebec and without a prior bachelor's degree), a 90-credit program (if you were admitted on the basis of a Quebec DCS/DEC or equivalent), or a 60-credit program (if you were admitted on the basis of a recognized bachelor's degree).
2. Qualification for the degree must include Satisfactory Standing (a grade of C or better) in all required courses and the complementary courses specified in Year 3, and the accumulation of enough acceptable credits to make a total of either 60, 90, or 120 credits. It should be noted that if you take the B.Th. program as part of the M.Div. program, you need to maintain a minimum CGPA of 2.5 to be eligible for the M.Div. degree.
3. Normally, the program credits must be earned within five years from the date of entrance.

Science for Arts Students Minor Concentration (B.A.) (18 credits)

Offered by: Biology (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

Freshman students interested in this Minor Concentration should contact the Program Adviser to ensure that they are taking appropriate prerequisite courses. Students should declare their intention to obtain this Minor Concentration during their U1 year and consult the Program Adviser regarding approval of courses to meet the requirements.

Students select one of the following disciplinary areas as their area of specialization for the program:

Atmospheric and Oceanic Sciences; Biochemistry; Biology - Cell and Molecular Stream, Organismal Stream; Chemistry; Earth and Planetary Sciences; Geography; Mathematics and Statistics; Microbiology and Immunology; Pathology; Physics; Physiology; Psychology.

This Minor Concentration is coordinated by the Department of Biology. For more information contact the Undergraduate Program Adviser in the Biology Department, N7/9B, Stewart Biology Building, 514-398-4109.

Required Course (3 credits)

Expand allContract all

Course	Title	Credits
BIOL 210	Perspectives of Science.	3

Complementary Courses (15 credits)

15 credits taken in one of the disciplinary areas given below. Where suggested courses have prerequisites at the 200 or 300 level associated with them, credit for the associated prerequisites may also be counted as part of the 15 credits.

Prerequisites at the 100 level cannot be counted toward the Minor concentration.

With the prior written approval of the Program Adviser, an appropriate alternative set of courses may be substituted.

Disciplinary Areas

Atmospheric and Oceanic Sciences

Prerequisites which cannot be counted toward the Minor concentration: MATH 140 Calculus 1. and MATH 141 Calculus 2. or equivalents; PHYS 101 Introductory Physics - Mechanics. or PHYS 131 Mechanics and Waves. and PHYS 102 Introductory Physics - Electromagnetism. or PHYS 142 Electromagnetism and Optics. or equivalents recommended.

Expand allContract all

Course	Title	Credits
ATOC 214	Introduction: Physics of the Atmosphere.	3
ATOC 215	Oceans, Weather and Climate.	3
ATOC 219	Introduction to Atmospheric Chemistry.	3

Course	Title	Credits
BIOC 311	Metabolic Biochemistry.	3
BIOC 312	Biochemistry of Macromolecules.	3

Biology

Students interested in Biology can choose between two streams. Cell and molecular biology leads to upper-level courses in developmental biology, human genetics, molecular biology, or allied fields.

Organismal biology leads to upper-level courses in biodiversity, ecology, neurobiology, behaviour, or conservation biology. See the Undergraduate Program Adviser in the Biology Department, N7/9B, Stewart Biology Building, to arrange a counselling session on the choice of courses above the 200 level.

Prerequisites which cannot be counted toward the Minor concentration: BIOL 111 Principles: Organismal Biology. and BIOL 112 Cell and Molecular Biology., plus CHEM 110 General Chemistry 1. and CHEM 120 General Chemistry 2. or their equivalents; in addition, for the Organismal Stream, PHYS 101 Introductory Physics - Mechanics. or PHYS 131 Mechanics and Waves.; and MATH 140 Calculus 1. and PHYS 102 Introductory Physics - Electromagnetism. or PHYS 142 Electromagnetism and Optics. if taking BIOL 306 Neural Basis of Behaviour..

PHGY 312	Respiratory, Renal, and Cardiovascular Physiology.	3
PHGY 313	Blood, Gastrointestinal, and Immune Systems Physiology.	3
PHGY 314	Integrative Neuroscience.	3

Psychology

(Students in any Minor or Major concentration or Honours program in Psychology cannot choose this disciplinary area.)

Prerequisites which cannot be counted toward the Minor concentration: PSYC 100 Introduction to Psychology. (or equivalent).

Students in the Minor concentration take 15 credits of Psychology selected as follows:

Expand allContract all

Course	Title	Credits
PSYC 204	Introduction to Psychological Statistics.	3
Plus 6 credits from the following core courses:		
PSYC 211	Introductory Behavioural Neuroscience.	3
PSYC 212	Perception.	3
PSYC 213	Cognition.	3
PSYC 215	Social Psychology.	3

Plus 6 credits Psychology courses at the 300 level or higher (excluding PSYC 305 Statistics for Experimental Design.).

Social Studies of Medicine Minor Concentration (B.A.) (18 credits)

Offered by: Social Studies of Medicine (Faculty of Medicine and Health Sciences)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Social Studies of Medicine presents as a complex network of institutions, cultures, and political relations embedded in the institutions, cultures and political relations of the larger society. Courses are divided into three groups: History of Medicine, Anthropology of Medicine, and Sociology of Medicine. The Minor consists of 18 credits. Students are required to take at least one course in each of the three groups.

Note: No overlap is permitted with courses counting towards the student's major concentration.

Complementary Courses (18 credits)

18 credits from the following (at least 3 credits from each of the three groups):

History of Medicine

Course	Title	Credits
HIST 249	Health and the Healer in Western History.	3

Social Work (Three-Year Program) (B.S.W.) (90 credits)

Offered by: Social Work (Faculty of Arts)

Degree: Bachelor of Social Work

Program credit weight: 90

Program Description

The School of Social Work offers an undergraduate program leading to a Bachelor of Social Work (BSW) degree. The BSW focuses on generalist social work practice in a range of health and social service settings locally, nationally and internationally. Drawing on principles of diversity and equity consistent with anti-oppressive frameworks, the BSW examines theoretical foundations and practice skills to assess and respond to social problems affecting individuals, families,

groups and communities. Core objectives include: exploration of an identity consistent with the values and ethics of the profession; promoting human rights and social justice; addressing historical and contemporary systemic and structural sources of oppression and marginalization; and, engaging in critical thinking in relation to client populations and in response to inequitable policies and their implications for disadvantaged groups. The BSW includes essential training through field practice.

Field Practicum

Students in the three-year B.S.W. program complete a field placement during their second and third years, two days per week, in different settings each year. Students must have completed a minimum of 24 credits to begin the second year (U2) field placement, comprised of all U1 required SWRK courses and any combination of SWRK complementary, non-SWRK complementary and/or elective courses totaling 24 credits. Students must have completed a minimum number of 54 credits to begin the third year (U3) field placement, comprised of all U1 and U2 required SWRK courses, and any combination of SWRK complementary, non-SWRK complementary and/or elective courses totaling 54 credits.

Course	Title	Credits
SOCI 330	Sociological Theory.	3
SOCI 350	Statistics in Social Research.	3

9 credits of complementary courses chosen from the list of courses offered by the Sociology Department. At least 3 credits must be taken at the 300-level or higher.

Areas of Sociology

The Department of Sociology offers courses in four substantive areas of study:

- Institutions, Deviance, and Culture
- Politics and Social Change
- Social Stratification: Class, Ethnicity, and Gender
- Work, Organizations, and the Economy

The following lists indicate the courses which are included within each substantive area. Students should use these lists when selecting their complementary courses.

The 500-level seminars in each substantive area are open to social science major concentration students in their final year and to Honours students. Minor concentration students may only register for these with the permission of the instructor.

Program credit weight: 36

Program Description

The purpose of the Major Concentration Sociology is to give the student a comprehensive understanding of the field of sociology.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Sociology Honours (B.A.) (51 credits)

Offered by: Sociology (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 51

Program Description

The B.A.; Honours in Sociology provides a greater focus on Sociology with substantial breadth and depth. The completion of an Honours program is an asset when applying to graduate or professional schools.

Students may register for the Honours program at the beginning of their second year (U2).

To remain in the Honours program and receive an Honours degree, students must maintain a GPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (21 credits)

Note: Students who are exempted from SOCI 350 Statistics in Social Research. must replace it with another 300-level or higher sociology course.

Sociology Joint Honours Component (B.A.) (36 credits)

Offered by: Sociology (Faculty of Arts)

3 **Degree:** Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 36

Program Description

The Joint Honours Component Sociology provides a greater focus on Sociology with substantial breadth and depth. The completion of a Joint Honours program is an asset when applying to graduate or profession schools.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Students may register for Joint Honours at the beginning of their second year (U2). Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.50 in their program courses, and according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Required Courses (18 credits)

Note: Students who are exempted from SOCI 350 Statistics in Social Research. must replace it with another 300-level or higher sociology course.

Foundation Program (B.A. & Sc.) (30 credits)

Offered by: Arts & Science Admin (Shared)

Degree: Bachelor of Arts and Science

Program credit weight: 30

Program Description

Students who need to complete 97-120 credits to fulfil their degree requirements are admitted to the Foundation Year. Students with specific career goals should consult an academic adviser about their choice of program within the B.A. & Sc. However, students intending to pursue further studies following the B.A. & Sc. should refer to the admissions requirements of particular programs for the appropriate prerequisite courses.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Foundational Courses

The Foundation Program requirements include foundational courses in both Science and Arts which must be selected as follows:

Math

At least two mathematics courses:

Arts

At least three Arts courses (or 9 credits) to be chosen in two of the following three categories: Humanities, Languages, and Social Sciences.

A maximum of two courses (or 6 credits) may be chosen from one category, and no more than two courses (or 6 credits) can be taken in any one department.

Note: No course may fulfil the requirements for more than one program, including the B.A. & Sc. Foundation Program.

Humanities (Literature and Civilization)

Courses selected from the following subjects:

- Art History and Communications Studies (ARTH and COMS)
- Classics (CLAS)
- East Asian Studies (EAST)
- English (ENGL)
- French Language and Literature (FREN)
- German Studies (GERM)
- Hispanic Studies (HISP)
- Islamic Studies (ISLA)
- Italian studies (ITAL)
- Jewish Studies (JWST)
- Music for Arts (MUAR only)
- Philosophy (PHIL)
- Religious Studies (RELG)
- Russian Studies (RUSS)

Languages

Courses may be taken in this category to improve language skills.

Languages include:

- Classics (Latin, Ancient Greek, Modern Greek) (CLAS)
- East Asian Studies (Chinese, Japanese, Korean) (EAST)
- English as a Second Language (CEAP, CESL)
- French as a Second Language (FRSL)
- French Language and Literature (FREN)
- German Studies (GERM)
- Hispanic Studies (Spanish) (HISP)
- Islamic Studies (Arabic, Persian, Turkish, Urdu) (ISLA)
- Italian (ITAL)
- Jewish Studies (Hebrew, Yiddish) (JWST)
- Russian and Slavic Studies (Polish, Russian, Armenian, Czech) (RUSS)

Social Sciences

Courses selected from the following subjects:

- Anthropology (ANTH)
- Economics (ECON)
- History (HIST)
- Linguistics (LING)
- Political Science (POLI)
- Sociology (SOCI)

Advanced Standing/Transfer Credits

Students who have completed the Diploma of Collegial Studies, Advanced Placement exams, Advanced Levels, the International Baccalaureate, the French Baccalaureate, or McGill placement examinations may receive exemption and/or credit for all or part of the Mathematics and foundational science courses as well as exemption from all or part of the Arts courses requirement of the Foundation Program. Similarly, students who have completed courses at other universities or colleges may receive exemptions and/or credits.

Advanced Placement Examination results with a score of 4 or 5 must be declared by the student at the time of initial registration at the University.

For more information about advanced standing, please consult: <http://www.mcgill.ca/students/transfercredit/>. Students must carefully select their mathematics and science Foundation Program courses so that they have all the required prerequisites for their intended departmental programs.

Anthropology Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students interested in Joint Honours should consult an advisor in the other department for specific course requirements. A form will be supplied by the Anthropology Department to keep track of courses required by both departments for the programs selected.

Students who wish to study at the Honours level in two disciplines can combine the Joint Honours Program component in Anthropology with one in any other Arts discipline.

The Joint Honours thesis topic should be arranged by consultation with an advisor in Anthropology and the other discipline, and supervisors should be appointed in each department who will work together to guide the student.

Joint Honours students must maintain a GPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Course (3 credits)

The Joint Honours thesis should be determined in consultation with advisers from both Joint Honours components programs. Normally, the thesis is 6 credits of coursework with 3 credits applying to each Joint Honours component.

[Expand all](#)

ANTH 359	History of Archaeological Theory.	3

400/500 Level

A minimum of 6 credits of Anthropology (ANTH) courses at the 400 or 500 level (maximum of one 3-credit Special Topic course at the 400 level).

Anthropology Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major concentration is especially appropriate for students who aim to take courses across several sub-disciplinary or topical concentrations, and for whom specialization is premature. There are no prerequisites for admission to the Major Concentration Anthropology. Students are encouraged to take a course in quantitative methods (listed under the Honours program), but this course cannot count as part of this concentration.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

200 Level

6 credits selected from 200-level courses in Anthropology (ANTH).

Core (350 Level)

6 credits from:

(Note: These are restricted to students in any Anthropology program with U2 standing or above.)

[Expand all](#)
[Contract all](#)

Course	Title	Credits
ANTH 352	History of Anthropological Theory.	3
ANTH 355	Theories of Culture and Society.	3
ANTH 357	Archaeological Methods.	3
ANTH 358	The Process of Anthropological Research.	3
ANTH 359	History of Archaeological Theory.	3

400 Level

6 credits, two 400-level Anthropology (ANTH) courses.

Undergraduate Level

18 credits of additional undergraduate-level Anthropology courses of which no more than 6 credits may be at the 200 level.

Anthropology Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Anthropology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Anthropology permits students to explore the development and diversity of human beings and human society and culture through courses in human evolution, prehistoric archaeology, and socio-cultural anthropology. Students may include courses in all of these fields, or may focus on one or two.

This program may be expanded to the Major Concentration Anthropology.

Complementary Courses (18 credits)

6-9 credits from 200-level courses in Anthropology.

9-12 credits from any 300-, or 400-, or 500-level courses in Anthropology (only 3 credits of which can be at the 400 or 500 level. Only 1 Special Topic course can be taken.)

Art History Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Art History provides an introduction to the study of diverse artistic traditions from ancient to contemporary times. It is expandable to the Major Concentration Art History.

Complementary Courses (18 credits)

3-15 credits from the following list, as an introduction to methods, theories, and practices in diverse fields of the discipline.

Communication Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Communication Studies provides undergraduate students with a critical understanding of the role that communications media and communication technologies play in a society. It offers students intellectually challenging and innovative instruction in key traditions of Communications and Media Studies and new theoretical and methodological practices being developed in the field. The courses included in the program focus on issues of the relationship between communication, democracy and urban life, the social life of communication technologies, the historical development and transformation of media and communication forms, institutions, practices and technologies, and the mass media representation and mobilization of social difference.

Art History Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Art History concentrates on analysis of forms of visual and material culture from ancient to contemporary times. It provides a grounding in diverse fields and methods of the discipline.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Art History Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Art History & Communications (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours Component Art History is a flexible program that emphasizes breadth, depth as well as art historical methods and research. It is designed especially for students who anticipate pursuing graduate studies and careers in art history or related disciplines.

Students are encouraged to apply for admission to the Joint Honours program after their first year of study at the University and after completion of no less than 12 credits in Art History. Admission is on a competitive basis. While the Faculty of Arts regulations require a minimum CGPA of 3.0 for Honours programs, the Department requires in addition a program GPA of 3.50 for admission into the program and the awarding of Honours.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Biology - Organismal Minor Concentration (B.A. & Sc.) (19 credits)

Offered by: Biology (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 19

Biology - Cell/Molecular Minor Concentration (B.A. & Sc.) (19 credits)

Offered by: Biology (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 19

Program Description

The Minor Concentration Biology - Cell/Molecular, is restricted to students in the B.A. & Sc. It is a sequence of courses designed to yield a broad introduction to cell/molecular biology.

Advising Note: Students interested in a Biology minor concentration must choose either the Cell/Molecular option or the Organismal option, but may not take both. Students interested in a more in-depth program in Biology should consider the Major concentration.

Students may complete this program with a minimum of 18 credits or a maximum of 19 credits depending if they are exempt from taking CHEM 212 Introductory Organic Chemistry 1. and their choice of complementary courses.

Required Courses (13 credits)

Biology Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Biology (Faculty of Science)

Degree: Bachelor of Arts and Science**Program credit weight:** 36

Program Description

The B.A. & Sc.; Major Concentration in Biology is a planned sequence of courses designed to promote a basic grounding in biology. Topics include a range of fundamental biological concepts spanning molecules and cells to organisms and ecosystems, including development, behaviour and evolution.

Advising Note: Freshman students should be aware that PHYS 101 and/or PHYS 102 are required for some of the courses in the major and minor concentrations in Biology.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (18 credits)

Chemistry Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Chemistry (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration Chemistry is not certified by the Ordre des Chimistes du Québec. Students interested in pursuing a career in Chemistry in Quebec are advised to take an appropriate B.Sc. program in Chemistry.

The Major Concentration Chemistry, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (21 credits)

*Required courses taken at CEGEP or elsewhere that are not credited toward the B.A. & Sc. or B.Sc./B.Ed. must be replaced by courses from the Complementary Course List equal to or exceeding their credit value. Regardless of the substitution, students must take at least 36 credits in this program.

Cognitive Science Honours (B.A. & Sc.) (60 credits)

Offered by: Science (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 60

Program Description

The Honours Cognitive Science, which is restricted to students in the B.A. & Sc., is an extension of the Interfaculty program and offers students an opportunity to undertake a research project in close association with professors in their main Arts and Science focus areas. Prior to selecting the Honours program, students should meet with the Cognitive Science Program Adviser <https://www.mcgill.ca/science/undergraduate/advice/sousa> and review the B.A. & Sc. academic requirements for Honours and First Class Honours, which can also be found under "University Regulations and Resources," "Graduation," and "Graduation Honours."

To receive an Honours degree, students are required to achieve a minimum overall program GPA of 3.3 at graduation, and attain a grade of B+ (3.3) or better in COGS 444 Honours Research.. Students must

complete both the 60-credit Honours program and an approved minor concentration or a minor in the Faculties of Arts or of Science.

Note: B.A. & Sc. students who take interfaculty programs, including the Honours in Cognitive Science, must take at least 21 credits in Arts and 21 credits in Science across their interfaculty program and their minor or minor concentration.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Cognitive Science Interfaculty Program (B.A. & Sc.) (54 credits)

Offered by: Science (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 54

Program Description

The Interfaculty Program Cognitive Science, which is restricted to students in the B.A. & Sc., is designed to allow students to explore the multidisciplinary study of cognition in humans and machines. The goal is to understand the principles of intelligence and thought with the hope that this will lead to a better understanding of the mind and of learning, and to the development of intelligent devices.

Note: B.A. & Sc. students who take interfaculty programs must take at least 21 credits in Arts and 21 credits in Science across their interfaculty program and their minor or minor concentration.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).

- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Computer Science Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Computer Science (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

This Major concentration represents an in-depth introduction to computer science and its sub-areas. Students that are interested in further study in Computer Science can combine the Major Concentration Computer Science with the Supplementary Minor in Computer Science to constitute a program very close to the Major Computer Science offered by the Faculty of Science. For further information, please consult the Program Adviser.

Students with two programs in the same department/unit must have a third program in a different department/unit to be eligible to graduate. Please refer to the Faculty of Arts regulations for "Faculty Degree Requirements," "About Program Requirements," and "Departmental Programs" for the Multi-track System options.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).

- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (18 credits)

MATH 133 Linear Algebra and Geometry., MATH 140 Calculus 1., and MATH 141 Calculus 2. (or their equivalents) should be completed prior to taking courses in this program.

Software Engineering Major Concentration (B.A. & Sc.) (37 credits)

Offered by: Computer Science (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 37

Program Description

The Major Concentration Software Engineering focuses on the techniques and methodology required to design and develop complex software systems and covers the subject commonly known as "Software Engineering."

MATH 133, MATH 140, and MATH 141 (or their equivalents) must be completed prior to taking courses in this program.

Note: This program does not lead to certification as a Professional Engineer.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (30 credits)

*Students who have sufficient knowledge in a programming language do not need to take COMP 202 and can replace it with additional computer science complementary course credits.

Expand allContract all

Course	Title	Credits
COMP 202	Foundations of Programming.	3
COMP 206	Introduction to Software Systems.	3

East Asian Language Supplementary Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts and Science

Program credit weight: 18

Program Description

This program may not be expanded to the Major Concentration East Asian Studies.

The program offers students who have a background in an East Asian language the opportunity to study this language at the advanced level (300 level and above), including the classical language.

Complementary Courses (18 credits)

There are two options.

18 credits in second, third, or fourth level language courses in a single East Asian language, or a combination of an advanced language and other courses in East Asian culture, literature, or society at the 300 level or above, chosen in consultation with the Departmental Program Adviser.

East Asian Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in East Asian Studies provides in-depth training in the humanistic studies of East Asia (including language, society, literature, history, media, religion, politics, and art). The program includes core survey on China, Japan, and Korea.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

East Asian Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: East Asian Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours - East Asian Studies Component provides in-depth training in the humanistic studies of East Asia (including language, society, literature, history, media, religion, politics, and art). The program includes core survey on China, Japan, and Korea. and progresses to upper-level lectures and seminars that allow students to tailor an individualized program of study. Half of the coursework will be done in East Asian Studies and the other half in another program within the Faculty of the Arts.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Economics Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Economics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Economics provides a moderate level of specialization in Economics for students who usually are pursuing Major Concentrations or Honours Programs in other fields of study. It does, however, provide an option to switch to or add a Major Concentration in Economics. There is a special Minor for Management students.

Complementary Courses (18 credits)

18 credits, of which 6 credits must be from Group A and 12 credits from Group B.

Group A

Expand allContract all

Course	Title	Credits
ECON 208	Microeconomic Analysis and Applications.	3
ECON 209	Macroeconomic Analysis and Applications.	3
ECON 230D1	Microeconomic Theory.	3
ECON 230D2	Microeconomic Theory.	3

Group B

Economics courses with course numbers above ECON 208 Microeconomic Analysis and Applications. (excluding ECON 295 Macroeconomic Policy.), at least 6 credits of which must be at the 300, 400 or 500 level.

Program Notes:

Only one of ECON 208 Microeconomic Analysis and Applications. or ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. or ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours. can be credited to the Economics Minor. Only one of ECON 209 Macroeconomic Analysis and Applications. or the 6 credit combination of (ECON 332 Macroeconomic Theory: Majors 1. and ECON 333 Macroeconomic Theory - Majors 2.) or (ECON 353 Macroeconomics - Honours 1. and ECON 354 Macroeconomics - Honours 2. can be credited to the Economics Minor. The combination of ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. and ECON 209 Macroeconomic Analysis and Applications. is allowed.

Special Minor in Economics for Management Students

Information on this Minor Concentration and its special restrictions is in the Desautels Faculty of Management website at www.mcgill.ca/desautels/programs/bcom/academics/areas-study/economics/mi.... Students should consult with the advisers in both the Faculty of Management and the Department of Economics for advice on this minor concentration.

Economics Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Economics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Economics is a planned sequence of courses designed to permit the student a degree of specialization in economics. It consists of 36 credits in courses approved by the Economics Department. Students wishing to pursue this concentration need to consult the department's rules and regulations at: www.mcgill.ca/economics/undergraduates/majorminor.

All students who wish to begin (or continue) the Major Concentration Economics should see a majors adviser in the Department of Economics in each of their university years. Further information may be obtained from the Department's website, or from any majors adviser; consult the Department website for a list of advisers and their email addresses.

Students who are registering for the first time with the Department should attend the orientation meeting in August (check the website for details) before seeing an adviser.

A student choosing the Major Concentration Economics must take 36 credits in Economics. The Economics courses will normally be taken at McGill and will be selected from the courses shown below. Major Concentration in Economics students entering University at

the U1 year in September should directly proceed to ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. without taking ECON 208 Microeconomic Analysis and Applications. and ECON 209 Macroeconomic Analysis and Applications..

Note: Students who wish to switch from the Major Concentration to Honours Economics must complete all the requirements of the Honours program.

Mathematics: Mastery of high school mathematics is required for all economics courses.

Prerequisites: In general, 200-level courses have no prerequisites and 300-level and 400-level courses have ECON 230D1 Microeconomic Theory./ECON 230D2 Microeconomic Theory. or ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours. (or ECON 208 and ECON 209 Macroeconomic Analysis and Applications., or MGCR 293 Managerial Economics. and ECON 295 Macroeconomic Policy.) as prerequisites. In addition, 400-level courses have Calculus 1 (or its equivalent) or a course in mathematical techniques for economic analysis (or its equivalent) as a prerequisite.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (18 credits)

All students must take 6 credits of approved statistics courses.

Students should refer to the Department's document "Rules on Stats Courses for Economics Students" available at: <http://www.mcgill.ca/economics/undergraduates/courses/>.

Expand allContract all

Course	Title	Credits
ECON 227D1	Economic Statistics.	3

ECON 230D1	Microeconomic Theory.	3
ECON 230D2	Microeconomic Theory.	3

ECON 332	Macroeconomic Theory: Majors 1.
ECON 333	Macroeconomic Theory - Majors 2.

3	Degree Requirements – B.A. students <u>To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.</u>
---	--

Complementary Courses (18 credits)

18 credits in Economics selected from other 200- (with numbers above 209), 300-, 400- and 500-level courses. At least 6 of these credits must be in 400- or 500-level courses. No more than 6 credits may be at the 200 level.

Economics Joint Honours Component (B.A. & Sc.) (30 credits)

Offered by: Economics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 30

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two approved disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs" on the Economics Department website.

Joint Honours students should consult an adviser in each of the relevant departments to discuss their course selection and their interdisciplinary research project (if applicable) in each year of their program.

For the Economics component of this program, Joint Honours students should consult: <http://www.mcgill.ca/economics/undergraduates/honours>. For the current list of advisers in Economics and their advising times, see the website of the Department of Economics.

Continuation in the Economic component of this program from one year to the next requires a minimum grade of B- in ECON 250D1 Introduction to Economic Theory: Honours./ECON 250D2 Introduction to Economic Theory: Honours., and a minimum B- average in the required and complementary Honours Economics courses. Students failing to meet these requirements must switch out of the Honours program. If they continue to register in Honours, they will not be allowed to graduate with Honours. Note that graduation with Honours has more stringent requirements (see below) than these.

For graduation with the Economics component, a student must also obtain a 3.00 GPA in the required courses, a 3.00 average in the required and complementary credits in Economics, and a CGPA of 3.00. For a First Class Honours degree, the minimum requirements are a 3.50 program GPA in the required courses, a 3.50 average in the required and complementary credits in Economics, and a CGPA of 3.50. In cases where a student takes a Supplemental Exam in an Economics course, both the original and the Supplemental Exam grades will be counted in the calculation of the GPA and CGPA averages.

Students also have to meet the requirements of the other component of this program and of the relevant Faculty for Honours and First Class Honours.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Program Prerequisites (0-10 credits)

For entering the program:

Drama and Theatre - Courses of Interest - Other Departments

Permission to count extra-departmental credits must be obtained in advance of taking any course from outside the Department of English. Students are normally permitted to count 3 credits from other departments towards their Drama and Theatre Minor. Permission is obtained with the signature of a Department of English program adviser on the student's program audit sheet.

This list comprises courses in other departments that might be accepted by an adviser for credit toward the student's Drama and Theatre program. This list applies only to these courses as they are offered in the current academic year.

There might be other courses in the Faculty of Arts for which a student could receive Drama and Theatre program credit. A student who has identified a course not noted below should show their program adviser the course syllabus in advance and, if he or she agrees, get the adviser's initialled approval of the course on their program audit sheet. The Department requires a complete signed audit sheet in the student's file in Arts 155 in order to process the file for graduation.

Included in the list are courses taught in languages other than English and courses that have prerequisites.

ENGL 461	Studies in Literary Theory 2.	3

English - Cultural Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Cultural Studies option concentrates on analysis of forms of cultural expression and symbolic interaction, and of the various media through which these may be disseminated and transformed. Such study concerns symbolic form, aesthetically based forms of analysis, and the various modes of criticism and theory relevant to media which contain both verbal and non-verbal elements. The aim is above all to hone students' analytical and interpretive skills while introducing them to specific critical approaches to cultural studies. This is not a major in journalism or communications; and while many of our graduates go on to do creative work in a variety of media, instruction in film and video production is not part of the curriculum.

For the most up-to-date information on Department requirements and detailed course descriptions, please see the English Department Handbook at <http://www.mcgill.ca/english/>.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (9 credits)

These courses should be taken in the first two terms of the program.

Course	Title	Credits

ENGL 480	Studies in History of Film 1.	3

Additional Courses

9 additional credits from ENGL offerings, in the Literature, Cultural Studies, and Drama and Theatre Options. Other courses require approval by a departmental adviser.

Other Departments

Students are normally permitted to count 6 credits from other departments toward their English programs. In exceptional circumstances, an adviser who is approached by a student with strong academic grounds for including a third such course may grant permission (to a maximum of 9 extra-departmental credits) and must so indicate in advance by signing the departmental program audit sheet.

English - Drama and Theatre Major Concentration (B.A. & Sc.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Drama and Theatre option tries to place its subject in as broad a social and philosophical context as possible. The Drama and Theatre program is not designed to provide professional theatre training. The aim is rather to encourage students to explore the subject as a liberal arts discipline.

For the most up-to-date information on Department requirements and detailed course descriptions, please see the English Department Handbook at <http://www.mcgill.ca/english/>.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Drama and Theatre Before 1900 Courses

3 credits from the list of courses in Drama and Theatre before 1900:

Additional Courses

12 additional credits from ENGL offerings, in the Literature, Cultural Studies, and Drama and Theatre Options. Other courses require approval by a departmental adviser

English - Literature Major Concentration (B.A. & Sc.) (36 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Literature option provides a grounding in the basic texts and methods of the discipline as well as wide acquaintance with substantial areas of the field.

For the most up-to-date information on Department requirements and detailed course descriptions, please see the English Department Handbook at <http://www.mcgill.ca/english/>.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Additional Courses

6 additional credits from ENGL offerings, in the Literature, Cultural Studies, and Drama and Theatre Options. Other courses require approval by a departmental adviser.

**English - Cultural Studies
Joint Honours Component
(B.A. & Sc.) (36 credits)****Offered by:** English (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 36**Program Description**

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs". Applications to do a Joint Honours program in English and another subject in the Faculty of Arts should be submitted once a minimum of 9 credits, and no more than 18 credits, have been completed in

English. There are normally two possible application dates for Joint Honours in English: either by the end of January (by which time first-term courses are completed and the grades are available), or at the same time as the Honours application date, typically in mid-April. (Only students who will have completed more than 18 credits in English by the end of January may apply in the Fall.) Applications will be considered by the Department's Honours Committee on the basis of the student's program GPA, at a minimum of 3.50. The application form is available in the Department's General Office (Arts 155), and the specific submission requirements are described by that form.

The maintenance of a 3.50 program GPA is required for continuation in Joint Honours. Graduation with Joint Honours requires a minimum CGPA of 3.00, a minimum program GPA of 3.50, and a minimum mark of B+ on the Honours Essay. Graduation with First Class Joint Honours in English requires a minimum CGPA of 3.50, a minimum program GPA of 3.70, and a minimum mark of A on the Honours Essay.

Each academic year, there is a special adviser for Joint Honours students, and the receptionist in the General Office can provide their name and contact information. The Department's website <http://www.mcgill.ca/english/> provides additional information on the Joint Honours program and applications, and this website should also be consulted prior to contacting the Adviser.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Course	Title	Credits
ENGL 275	Introduction to Cultural Studies.	3
ENGL 277	Introduction to Film Studies.	3
ENGL 359	The Poetics of the Image.	3

Complementary Courses (27 credits)

27 credits selected as described below.

In addition to the 6-credit requirement for Advanced Study described below, all Joint Honours students' programs of study shall include 6 credits of study at the 400 level or above. Students are encouraged to take courses at the 300 level and above. In addition to the Advanced Study requirement, 3 of the remaining 21 Complementary Course credits must be completed at the 500 level. A maximum of 9 of the 27 credits are allowed at the 200 level, none in the final year of the program.

Note on Topics Courses: The Department of English offers courses which change topic from academic year to academic year. Depending on the topic in a specific year, these courses may count toward different program requirements. At the time they register for a topics course, students should confirm with their program adviser the program requirement it fulfils for that academic year.

Advanced Study

6 credits of advanced study, in one of the following two forms A or B, in order of preference:

A) 6 credits of honours essay:

Complementary Courses (24 credits)

24 credits selected as described below.

In addition to the 6-credit requirement for Advanced Study described below, all Joint Honours students' programs of study shall include 6 credits of study at the 400 level or above. Students are encouraged to take courses at the 300 level and above. At least 3 of the 24 credits must be devoted to a course on a Major Author as indicated under the rubrics dedicated to these offerings in each year's list of Complementary Courses on the Department of English website (<http://www.mcgill.ca/english>). In addition to the Advanced Study requirement, 3 of the remaining 18 Complementary Courses credits must be completed at the 500 level. A maximum of 9 of the 24 credits are allowed at the 200 level, none in the final year of the program.

Note on Topics Courses: The Department of English offers courses which change topic from academic year to academic year. Depending on the topic in a specific year, these courses may count toward different program requirements. At the time they register for a topics course, students should confirm with their program adviser the program requirement it fulfills for that academic year.

Advanced Study

6 credits of advanced study, in one of the following two forms A or B, in order of preference:

A) 6-credits of honours essay:

Expand allContract all

Course	Title	Credits
ENGL 491D1	Honours Essay.	3
ENGL 491D2	Honours Essay.	3

B) Two 3-credit 500-level courses selected in consultation with the student's adviser(s).

(In very rare cases, a third alternative may be approved at the discretion of the Joint Honours Adviser, but only when it is formally recommended for the joint subject according to the description of that Joint Honours program found in the Arts section of the Course Catalogue. For example, Joint Honours with Anthropology allows the option of combining 3 credits of essay work with 3 credits in the joint subject to create a joint essay.)

Areas of English Literature

3 credits from one of the following areas: Backgrounds of English Literature, Old English, Medieval, Renaissance.

World Cinemas Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: English (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration World Cinemas instructs students in film aesthetics, history, and theory by acquainting them with cinematic practices from different national and international traditions. This interdisciplinary program draws on the already existing teaching and research activities in several departments within the Faculty of Arts and will serve as an institutional context for future teaching and research endeavors in film studies.

Required Courses (6 credits)

Environment Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Bieler School of Environment

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

This 18-credit Minor Concentration Environment is intended for Arts students in the multi-track system, Law and Management students. Students in Agricultural & Environmental Sciences, Engineering, and Science should complete the Minor Environment.

Advising Note

Consultation with the Program Adviser for approval of course selection to meet program requirements is obligatory. No overlap is allowed between this program and the student's major program or concentration, or a second minor program.

Complementary Courses (18 credits)

18 credits of complementary courses, all of which must fall outside the discipline or field of the student's major program or concentration, and which must be 200-level or above, selected as follows:

12 credits of MSE core courses:

The core ENVR courses are taught at both campuses. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

ENVR 400	Environmental Thought.	3	GEOG 210	Global Places and Peoples.	3

6 credits of environmentally related courses selected with the approval of the Program Adviser (at least 3 credits must be in natural sciences). A list of Suggested Courses is given below.

Suggested Course List

The Suggested Course List is divided into two thematic categories: Social Sciences and Policy; and Natural Sciences and Technology.

Most courses listed at the 300 level and higher have prerequisites. You are urged to prepare your program of study with this in mind.

This list is not exhaustive. You are encouraged to examine the course lists of the various domains in the Environment program for other courses that might interest you. Courses not on the Suggested Course List may be included with the permission of the Program Adviser.

Some courses on the Suggested Course List may be subject to other regulations (e.g., the Restricted Courses List for Faculty of Science students. If in doubt, ask the Program Adviser.

Location Note

When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Environment Interfaculty Program (B.A. & Sc.) (54 credits)

Offered by: Bieler School of Environment

Degree: Bachelor of Arts and Science

Program credit weight: 54

Program Description

The B.A. & Sc.; Interfaculty Program in Environment focuses on the myriad of environmental problems faced by society today. The program offers a great degree of flexibility and can provide both a broad liberal arts/science training as well as specific and in-depth focus on particular areas of interest.

Program Requirements

- Students are required to take a maximum of 21 credits at the 200 level and a minimum of 12 credits at the 400 level or higher in this program. This includes required courses.
- Students must complete at least 21 credits in the Faculty of Arts and at least 21 in the Faculty of Science as part of their interfaculty

Location Note: When planning your schedule and registering for courses, you should verify where each course is offered because courses for this program are taught on both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (18 credits)

Location Note: Core required courses are taught at both McGill's Downtown campus and at the Macdonald campus in Sainte-Anne-de-Bellevue. You should register in Section 001 of an ENVR course that you plan to take on the Downtown campus, and in Section 051 of an ENVR course that you plan to take on the Macdonald campus.

Environment Honours (B.A. & Sc.)

Offered by: Bieler School of Environment**Degree:** Bachelor of Arts and Science**Program credit weight:** 60

Program Description

This program is open only to students in the B.A. & Sc. Interfaculty Program Environment. To be eligible for Honours, students must satisfy the requirements set by their B.A. & Sc. degree.

In addition, students must satisfy the following:

1. Students apply for the Honours program in March of their U2 year. See the Program Adviser for details.
2. Applicants must have a minimum Program GPA (GPA of all required and complementary courses for the program in Environment taken at McGill) of 3.3 to enter the Honours program.
3. Students must earn a B grade (3.0) or higher for the Honours Research course (ENVR 495D1 and ENVR 495D2).
4. Students are required to achieve a minimum overall CGPA of 3.0 at graduation, and a minimum Program GPA of 3.3 to obtain Honours.
5. B.A. & Sc. students must complete at least 21 credits in the Faculty of Arts and at least 21 in the Faculty of Science as part of their Honours program and their Minor concentration or Minor program. For a list of available Minor concentrations or Minor programs, see "Overview of Programs Offered" and "Minor Concentrations or Minors."

Students in the B.A. & Sc. Honours programs complete the coursework (54 credits) for the Interfaculty Program in Environment as well as the Honours required courses (6 credits).

At the completion of your Honours research, you are expected to present your results at an Honours Symposium, and are required to submit a copy of your final report to the Bieler School of Environment Program Adviser.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Field Studies Minor (B.Sc.) (18 credits)

Offered by: Science (Faculty of Science)

Degree: Bachelor of Science

Program credit weight: 18

Program Description

Students participating in any one of the field study semesters, i.e., the Africa Field Study Semester, the Barbados Field Study Semester, the Barbados Interdisciplinary Tropical Studies (BITS) Field Study Semester, McGill Arctic Field Study Semester, or the Panama Field Study Semester may complete the 18-credit Minor in Field Studies.

The Minor consists of the 15 credits of a field study semester plus three additional complementary credits chosen by the student in

consultation with their departmental adviser and/or the Field Study Minor adviser.

For students in the B.Sc. Liberal Program, the Field Studies Minor can serve as the breadth component.

Program descriptions for each of the field study semesters are provided below.

Note: The field study semesters are not degree programs. Credits may be counted toward McGill degrees with the permission of program advisers. Students who complete a field study semester may consult the Field Study Minor adviser about completing the Minor program as part of their McGill degree.

Africa Field Study Semester (15 credits)

The Africa Field Study Semester (AFSS) is run through McGill's Canadian Field Study in Africa Program (CFSIA).

The AFSS provides one term of integrated field study in East Africa, with emphasis on environmental conservation, culture change, and sustainable development. Students investigate challenges of sustaining biological diversity and social justice in African environments subject to cultural change, economic development, and environmental stress. Cultural and ecological variation is examined in highland, montane, rangeland, desert, riverine, salt- and fresh-water lake, coastal, and urban settings.

Africa Field Study Semester - Required Courses

6 credits

Students select one course titled "Research in Society and Development in Africa" and one course titled "Research in Ecology and Development in Africa" from the courses below.

Barbados Field Study Semester (15 credits)

The Barbados Field Study Semester (BFSS), offered in partnership with the University of the West Indies, offers a unique opportunity to study at McGill University's campus in the tropics, the Bellairs Research Institute in Barbados. The focus of this field study semester is the study of sustainability science, with emphasis on the Caribbean, which includes: a different climate and culture, field research, and conducting an applied research project. Project work is conducted with local partners and focuses on sustainability in Barbados.

Barbados Interdisciplinary Tropical Studies Field Semester (15 credits)

The Barbados Interdisciplinary Tropical Studies (BITS) Field Semester is an activity-filled, hands-on experience for students with an interest in international studies with a Caribbean flavour. The focus is on sustainable agri-food, nutrition, and energy production on a tropical island with a tourist-based economy. It is offered annually (in the Summer). It consists of two 2-hour orientation sessions conducted on the Macdonald campus and at the Bellairs Research Institute in Barbados, followed by three 3-credit and one 6-credit project courses at Bellairs Research Institute. This program integrates intensive course work with group project work and contributes to the formation of professionals with planning, managing, decision-making, and communication skills. The program addresses a global need for experienced professionals capable of interacting with various levels of government, non-governmental organizations, and the private sector. BITS welcomes applications from senior undergraduate students from across the University.

Panama Field Study Semester (15 credits)

This program is offered in Panama in partnership with the Smithsonian Tropical Research Institute (STRI).

Hands-on experience is gained through research projects organized around multidisciplinary environmental issues. The nature of these projects will centre on practical environmental problems/questions important for Panama. Students will form teams that will work with Panamanian institutions (NGO, governmental, or research).

There is a one- or two-day period of transition and 13 weeks of course attendance in Panama. Field trips will be integrated into each of the courses offered.

Minor Field Studies - Complementary Course

In consultation with their departmental adviser and/or the Field Study Minor adviser, students who have completed one of the field study semesters described above may select a 3-credit complementary course to complete the requirements for the Minor and ask for it to be added to their academic records.

Gender, Sexuality, Feminist, & Social Justice Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Inst for Gender, Sex & Fem St (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Gender, Sexuality, Feminist, & Social Justice Studies (GSFS) is an interdisciplinary program that centrally engages contemporary and historical issues centered on gender, sexuality, feminism, and social justice. The program provides students with opportunities to explore the meaning and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships.

Complementary Courses (18 credits)

3 credits from the following:

Course	Title	Credits
GSFS 200	Feminist and Social Justice Studies.	3
GSFS 250	Sexual and Gender Diversity Studies.	3

3 credits Gender, Sexuality Feminist, and Social Justice Studies (GSFS) from the following:

Expand allContract all

Credits may count towards only one program requirement.

12 credits from the following:

Minimum of 6 credits must be at the 300 level or higher.
Complementary courses must centrally engage with at least two of the following themes: gender, sexuality, feminism, and social justice. Courses are offered by a range of faculties and disciplines.

Maximum of 3 transfer credits may be accepted from approved exchange programs subject to University approval.

Gender, Sexuality, Feminist, & Social Justice Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Inst for Gender, Sex & Fem St (Faculty of Arts)

Degree: Bachelor of Arts, Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Gender, Sexuality, Feminist, & Social Justice Studies (GSFS) is an interdisciplinary program that centrally engages contemporary and historical issues centered on gender, sexuality, feminism, and social justice. The program provides students with opportunities to explore the meaning and intersections of such categories as gender, race, class, sexual identification, age, ability, citizenship, and national identity, for example, and to examine how such categories might inform and reproduce power relationships. The Major Concentration consists of required GSFS courses that allow for an immersion into this area of study, and complementary courses from a range of departments, disciplines, and faculties. Students must see an adviser in Gender, Sexuality, Feminist, and Social Justice Studies at a minimum upon declaring the GSFS Major Concentration and prior to selecting courses for the final year of study.

Students are advised to take GSFS 200 Feminist and Social Justice Studies, and GSFS 250 Sexual and Gender Diversity Studies, in their first year in the program, GSFS 300 Research Inquiry in GSFS, in their second year of the program, and GSFS 400 Capstone: Engaging Fields of GSFS, in their final year of the program.

Students must see an adviser in Women's Studies at a minimum upon registering in GSFS and prior to selecting courses for the final year of study.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Geography Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The B.A.; Minor Concentration in Geography focuses on the interactions among people, places, and the environment, and is an

excellent complement to many majors. It includes coursework in methodological techniques, human, and/or physical Geography. This Minor Concentration may be expanded into the Major Concentration Geography, but not into the Major Concentration Geography (Urban Studies).

Geography (Urban Studies) Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

This interdisciplinary program introduces students in the Faculty of Arts to a range of urban dynamics and the challenges facing contemporary cities around the world. Students should observe the levels indicated by course numbers: 200-level are first year (U1); 300-level, second year (U2); 400- or 500-level, third year (U3).

Health Geography Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Geography (Faculty of Science)
Degree: Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 18

Program Description

There is increasing consensus around the idea that health is not just an expression of individual characteristics but an interaction between the characteristics of the individual and the environments, both physical and social, to which one is exposed over a lifetime of daily living and working. Health outcomes vary dramatically by physical and social characteristics of places both within and between countries and these provide a wedge for our understanding of the factors that might be modified to improve the health of large groups of people. The B.A.; Minor Concentration in Health Geography introduces students to both local and global health issues and provides a skill set in spatial and statistical analyses of diverse health outcomes in populations.

Geography - Physical Geography Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration Geography - Physical Geography, which is restricted to students in the B.A. & Sc., is a planned sequence of courses designed to permit a degree of specialization in this discipline.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

The remaining 18 credits are to be selected from Geography (GEOG) courses excluding GEOG 200 Geographical Perspectives: World Environmental Problems, and GEOG 205 Global Change: Past, Present and Future.. Of these 18 credits, at least 3 credits must be at the 400 level or above.

Geography (Urban Studies) Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

This major concentration exposes students to various approaches to the study of the urban world. Urban Studies is an interdisciplinary program that introduces students in the Faculty of Arts to a range of urban dynamics and the challenges facing contemporary cities around the world, and a variety of methodological approaches. Students should observe the levels indicated by course numbers: 200-level are first year (U1); 300-level, second year (U2); 400- or 500-level, third year (U3).

For students majoring in Urban Studies, the total number of credits permitted outside Arts and Science is 30 credits. Faculty of Arts regulations about "Courses Outside the Faculties of Arts and of Science" may be found in the Arts guidelines for "Course Requirements".

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

Geography Joint Honours Component (B.A. & Sc.) (37 credits)				
Offered by: Geography (Faculty of Science)				
Degree: Bachelor of Arts; Bachelor of Arts and Science				
Program credit weight: 37				

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components of Geography and another Arts discipline. As with the regular Honours program, the Geography component of Joint Honours focuses on the interactions among people, places, and the environment, and requires an Honours project, which entails independent, original research conducted over two semesters, normally in the final year of study, under the supervision of a department faculty member. The requirements for Honours programs vary considerably among units, so students interested in Joint Honours should consult an adviser in each department to discuss their course selection and research project(s).

In addition to the Faculty of Arts requirement that Joint Honours students maintain a CGPA of at least 3.00, students in a Joint Honours Component Geography program must maintain a program GPA of at least 3.30 to remain in the Honours program and receive an Honours degree. In addition to meeting these Geography requirements, students must meet the requirements set forth by the other unit.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

NOTE: Minimum 3 credits CLAS courses at the 400-level

NOTE: Maximum 9 credits complementary courses at the 200-level

Note: a maximum total of 6 credits of non-CLAS McGill courses and/or classics courses not taken at McGill (transfer credits) may be counted toward the program.

History Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration History introduces students to the study of diverse cultures and societies around the world from antiquity to contemporary times. It is an excellent complement to the major concentrations offered in the Faculty of Arts. The Minor Concentration History is expandable to a Major Concentration History.

Students wishing to complete a history program are encouraged to consult a Program Adviser at the beginning of their first year, and to fill out a departmental program advising/audit form. For more information about the undergraduate programs in history, and for advising information and forms, visit the program's website at <http://www.mcgill.ca/history/undergraduate>.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the overall credit requirement for history programs.

Complementary Courses (18 credits)

18 credits of history courses (HIST or Cognate courses - see list below), of which no more than 6 credits may be at the 200-level.

Cognate Courses

The following non-HIST courses may be counted toward the History minor program (max. 3 credits). Additional courses may be submitted for consideration to the Undergraduate Program Director. Faculty regulations stipulate that a course may not be counted toward more than one program.

Course	Title	Credits
CLAS 303	Ancient Greek Religion.	3
CLAS 304	Ancient Greek Democracy.	3
CLAS 305	Roman Religion.	3
CLAS 406	Greek and Roman Historiography.	3
ISLA 311	History of the City-Islamic World	3
ISLA 315	Ottoman State and Society to 1839.	3
ISLA 355	Modern History of the Middle East.	3
ISLA 365	Middle East Since the 1970's.	3
ISLA 375	Sufi Women	3
ISLA 410	History: Middle-East 1798-1918.	3

JWST 371	Jews and the City.	3
RELG 326	Christians in the Roman World.	3

Notes: 200-level cognate courses count toward the 6-credit limit of 200-level courses allowed for the program.

Classics Major Concentration (B.A. & Sc.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Classical Studies is an in-depth study of ancient Greece and Rome. Two Streams are offered. The Classical Languages stream emphasizes ancient Greek and Latin language, requiring advanced coursework in one or both languages. The Classical Studies stream provides a broad foundation in ancient languages and Greek and Roman literature while allowing students greater flexibility to take a variety of courses in translation.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Note: For either stream students may count a maximum total of 12 credits of non-CLAS McGill courses and/or classics courses not taken at McGill (transfer credits) toward the program.

History Major Concentration (B.A. & Sc.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration History is a highly flexible program that emphasizes both breadth and depth, while introducing students to different historical theories and methodologies. Students select from a wide variety of courses on diverse cultures and societies around the world from antiquity to contemporary times, and also on thematic subjects such history and sexuality, imperialism and colonialism, histories of science, environmental history, and the history of thought and ideas. Students design their program to match their geographic, chronological, thematic or methodological interests.

Students wishing to complete a history program should consult a Program Adviser at the beginning of their first year, and fill out a departmental program advising/audit form. For more information, visit the program's website at <http://www.mcgill.ca/history/undergraduate>.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the credit requirements for history programs.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

36 credits of HIST or cognate courses (see list below) according to the following requirements.

Distribution requirement:

- 3 credits from Group A
- 3 credits from Group B
- 3 credits from Group C

Note: Cognate courses (see below) may not be used to satisfy the Distribution requirement

Temporal Breadth requirement:

- At least 3 credits focused on the period before 1800
- At least 3 credits focused on the period after 1800

Notes: The same course may be used to satisfy both a Distribution and Temporal Breadth requirement. HIST 299 The Historian's Craft. may not be used to satisfy Temporal Breadth requirements.

Level requirement:

- Maximum 15 credits of complementary courses at the 200-level.
- Minimum 6 credits of 400- or 500- level courses.

Note: student may use at most 3 credits of HIST 498 Independent Research. or HIST 499 Internship: History. to fulfill this requirement.

Classics Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs". The Joint Honours Component Classics emphasizes the study of ancient Greek and Latin: proficiency in both languages is required, advanced coursework is required in at least one of the classical languages. The program is designed for students who wish to pursue graduate studies in classics or related disciplines (such as ancient History), or for graduate programs that require proficiency in ancient languages.

According to Faculty regulations, Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Note: students may count a maximum total of 12 credits of non-CLAS McGill courses and/or classics courses not taken at McGill (transfer credits) toward the program.

History Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. The Joint Honours Component History is a flexible program that emphasizes breadth, depth as well as historical methods and research.

Students wishing to complete the Joint Honours History Component should consult a Program Adviser at the beginning of their first year to map out a course of study, and fill out a departmental program advising/audit form. For more information, visit the program's website: <http://www.mcgill.ca/history/undergraduate>. Students must also fulfill program requirements in the second honours component and should consult an adviser in that program.

Important note: Advanced Placement or International Baccalaureate credits may not be included in the overall credit requirement for history programs.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

South Asian Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: History and Classical Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The B.A.: Minor Concentration in South Asian Studies offers breadth and depth on the history, literature, languages, politics, religions, cultures, and societies of South Asia. The minor concentration is

divided into two streams, "Culture and Civilization" and "Languages." An interdisciplinary curriculum is collaboratively offered by the Department of Anthropology, English, History and Classical Studies, Political Science, and Sociology, the Institute of Islamic Studies, and the School of Religious Studies, and is complemented by language instruction in Persian, Sanskrit, Tibetan, and Urdu-Hindi.

Complementary Courses (18 credits)

18 credits from one of the following streams:

Stream 1: Culture and Civilization

Note: As course content may change according to the offering unit's yearly curriculum, all classes listed must be approved in consultation with the South Asian Studies adviser as relevant to the Minor Concentration. Students should refer to the Course Catalogue to confirm any prerequisites for the following courses.

Canadian Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Canadian Studies is an interdisciplinary program focused on in-depth multidisciplinary perspectives on Canada and its key institutions, with an emphasis on public affairs as it relates to social and cultural issues and debates in the Canadian context and the responses and actions taken or needed to be taken. The program draws on interdisciplinary perspectives incorporating research and approaches from both the humanities and the social sciences.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Canadian Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Joint Honours - Canadian Studies Component is an interdisciplinary program focused on in-depth multidisciplinary perspectives on Canada and its key institutions, with an emphasis on public affairs as it related to social and cultural issues and debates in the Canadian context, and the responses and actions taken or needed to be taken.

Students who wish to study at the Honours level in two disciplines can combine Joint Honours components from any two Arts disciplines. Students with a minimum program GPA of 3.30 in their program courses and, in keeping with Faculty regulations, a minimum CGPA of 3.00 in general, are eligible to apply to the Joint Honours. Application deadlines are December 25 and May 15. Forms are available on the McGill Institute for the Study of Canada (MISC) website.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

Indigenous Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Indigenous Studies provides students with a broad, interdisciplinary view of key issues in the historical, social and cultural dimensions of Indigenous life in Canada. Core courses offered within the program will provide interdisciplinary treatments of Indigenous life. The Program will focus on the history of indigenous populations in Canada, Aboriginal art and culture, the experience of indigeneity and gender, and legacies of Indigenous resistance to the Canadian state.

Quebec Studies and Community-Engaged Learning Minor Concentration/Études sur le Québec et apprentissage par engagement communautaire La concentration Mineure (B.A. & Sc.) (18 credits)

Offered by: Institute for Study of Canada (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

La concentration Mineure en Études sur le Québec et apprentissage par engagement communautaire a pour but de donner à l'étudiant(e) une connaissance interdisciplinaire des réalités historiques et contemporaines du Québec en complémentarité à sa propre discipline de spécialisation tout en misant sur un apprentissage par engagement communautaire en milieu montréalais. En collaboration avec le Social Equity and Diversity Education (SEDE) Office, les étudiants ont ainsi la possibilité, grâce à un stage, de mettre en pratique le contenu d'enseignement des cours au sein d'un organisme communautaire montréalais. Enjeux liés à l'équité, à la diversité et à l'inclusion en contexte montréalais.

The goal of the Minor Concentration Quebec Studies and Community-Engaged Learning is to give students an interdisciplinary overview of Quebec historical and contemporary realities that is complementary to their degree by taking advantage of a community engagement learning approach within the Montreal community. With the collaboration of the Social Equity and Diversity Education (SEDE) Office, students have the possibility to link the academic course content with a hands-on

experience within a Montreal community organization. Equity, diversity and inclusion issues within the Montreal context.

Required Courses / Cours Obligatoires (9 credits)

De façon usuelle, les cours obligatoires (9 crédits) sont complétés selon la séquence suivante : QCST 200 Introduction to the Study of Quebec. (3 crédits) en U0 ou U1, QCST 300 Quebec Culture and Society. (3 crédits) en U1 et QCST 440 Contemporary Issues in Quebec. (3 crédits) en U2 ou en U3. Les cours complémentaires (9 crédits) peuvent être complétés en U1, U2 ou en U3.

Normally, the required courses (9 credits) are completed in the following order: QCST 200 Introduction to the Study of Quebec. (3 credits) in U0 or U1, QCST 300 Quebec Culture and Society. (3 credits) in U1 and QCST 440 Contemporary Issues in Quebec. (3 credits) in U2 or in U3. The complementary courses (9 credits) can be completed in U1, U2, or U3.

Course	Title	Credits
QCST 200	Introduction to the Study of Quebec.	3
QCST 300	Quebec Culture and Society.	3
QCST 440	Contemporary Issues in Quebec.	3

Complementary Courses / Cours Complémentaires (9 credits)

De ces 9 crédits, 6 doivent être des cours provenant du tronc commun ou des cours approuvés par la direction du programme.

3 crédits doivent provenir d'un cours dont la langue d'enseignement est le français et peuvent provenir d'un cours de français langue seconde.

Au moins 6 des 9 crédits complémentaires doivent être du niveau 300 ou supérieur.

Le choix de ces cours se fera en consultation avec le directeur du programme et variera selon le domaine de spécialisation de chaque étudiant(e).

Of these 9 credits, 6 credits must be core courses, or courses approved by the Program Director.

3 credits must be taught in the French language and can be chosen from French as a Second Language course offerings.

At least 6 of the 9 complementary credits must be at the 300 level or above.

The selection of courses will be made in consultation with the Program Director and will vary depending on the major concentration or honours program of each student.

Interdisciplinary Life Sciences Minor (B.A. & Sc.) (24 credits)

Offered by: Science (Faculty of Science)**Degree:** Bachelor of Arts and Science**Program credit weight:** 24

Program Description

The Interdisciplinary Life Sciences Minor will allow students from the earth, physical, math, and computational science areas to broaden their studies with some basic life sciences, health social science, and empirical technological science. The Minor is 24 credits and allows students flexibility in their course selections. Students must take 9 credits from an extensive list of basic life science courses, 3 credits from an extensive list of health and social science courses, and 3 credits from an empirical and technological science list. The remaining 9 credits may be taken from courses listed in any of the three categories.

Please note: Students studying in Anatomy and Cell Biology; Biochemistry; Honours Immunology; Microbiology and Immunology; Neuroscience; Pharmacology; and Physiology are not permitted to complete this Minor.

Complementary Courses (24 credits)

The 24 credits required for this program must satisfy the following criteria:

At least 18 credits must be outside the student's main discipline.

Depth requirement:

at least 6 credits must be at the 300 level or above.

Breadth requirement:

at least 9 credits must be taken from the Basic Life Sciences List,

at least 3 credits from the Health Social Sciences List,

at least 3 credits from the Empirical Science and Technology List.

The remaining 9 credits may be selected from any of the lists.

International Development Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Inst for the St of Development (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

3 **Program credit weight:** 18

Program Description

The B.A.; Minor Concentration in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, and key development-related themes.

NOTE: At least 9 of the 18 credits must be at the 300 level or above.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

Required Courses (9 credits)

International Development Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Inst for the St of Development (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Major Concentration in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, key development-related themes, and training in research methods related to international development studies.

Course Selection Guidelines for the Overall Program

- At least 18 of the 36 credits must be at the 300 level or above.
- At least 9 credits must be from INTD courses.
- Students cannot take more than 12 credits in any one discipline other than the INTD discipline.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

International Development Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Inst for the St of Development (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Honours in International Development Studies focuses on the many challenges facing developing countries, including issues related to socio-economic inequalities and well being, governance, peace and conflict, environment and sustainability, key development-related themes, and training in research methods related to international development studies.

Honours students must maintain a CGPA of 3.50 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Course Selection Guidelines for the Overall Program

- At least 18 of the 36 credits must be at the 300 level or above. Nine credits must be at the 400 level or above.
- At least 12 credits must be from INTD courses.
- Students cannot take more than 12 credits in any one discipline other than the INTD discipline.

Students who are pursuing a Field Studies program can have a portion of their Field Studies courses count towards their IDS program. See Adviser in office for details.

NOTE: Students in the Econ-IDS Joint Honours program are required to take ECON 257D1 Economic Statistics - Honours./ECON 257D2 Economic Statistics - Honours. and therefore cannot also take ECON 227D1 Economic Statistics. /ECON 227D2 Economic Statistics.as part of their IDS program requirements.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

African Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration African Studies provides students with an interdisciplinary approach to the study of the African continent.

Students wishing to major in African Studies should consult the Program Adviser at the beginning of their first academic year. In the African Studies Major concentration, students will be encouraged to identify an area within a discipline of the Faculty, taking as many relevant courses as possible in that field.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

African Studies Joint Honours Component (B.A. & Sc.) (36 credits)**Offered by:** Islamic Studies (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 36**Program Description**

The Joint Honours program in African Studies provides students with an interdisciplinary approach to the study of the African continent.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs". Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary Honours thesis (if applicable). Joint Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations a minimum CGPA of 3.00 in general.

At least 9 of the 36 credits must be at the 400 level or above.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

World Islamic and Middle East Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the languages, textual traditions, and social life of Muslims across different times and places.

Complementary Courses (18 credits)

18 credits of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

3 credits at the 200 level, in non-language ISLA courses;

6 credits at the 300 level and Higher, in non-language ISLA courses;

9 credits at any level. If non-language courses are selected, no more than 6 credits in non-language courses overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

World Islamic and Middle East Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the textual traditions and social life of Muslims across different times and places.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

12-15 credits (2 levels) in one language: Arabic, Persian, Turkish, or Urdu. One level is 6 credits. In the case of Arabic, the first two levels involve 15 credits. The extra 3 credits may count toward the 6-9 credits at any level category of the complementary courses' requirement.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

21-24 credits (21 if the extra Introductory Arabic credits are used) of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

3 credits of 200-level non-language ISLA courses;

6 credits of 300-level non-language ISLA courses;

6 credits of 400-/500-level non-language ISLA courses;

6-9 credits at any level, including more language courses, but no more than 6 non-language credits overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

World Islamic and Middle East Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Islamic Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

World Islamic and Middle East Studies is an interdisciplinary program focusing on Muslim cultures and societies both past and present. Recognizing the variety of approaches within Islam, its global reach, but also its regional specificities, and that of the Middle East in particular, the program aims at providing students with training in the textual traditions and social life of Muslims across different times and places.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs."

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a program GPA of 3.30 in their World Islamic & Middle East Studies courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Course	Title	Credits
ISLA 495	World Islamic and Middle East Studies Research Seminar.	3

Complementary Courses (33 credits)

33 credits of complementary courses selected from the World Islamic and Middle East Studies course lists as follows:

12-15 credits (2 levels) in one language: Arabic, Persian, Turkish, or Urdu (lists below). One level is 6 credits. In the case of Arabic, the first two levels involve 15 credits. The extra 3 credits may count toward the 3-6 credits at any level category of the complementary courses' requirement.

NOTE: Hebrew courses (JWST 220D1/D2, 320D1/D2, 340D1/D2), listed under Non-ISLA Courses, are considered non-language courses.

18-21 credits (18 if the 3 extra introductory Arabic credits are used), distributed as follows:

3 credits of 100-/200-level non-language ISLA courses;

9 credits of 300-level non-language ISLA courses;

3 credits of 400-/500-level non-language ISLA courses;

3-6 credits at any level, including more language courses, but no more than 6 credits in non-language courses overall at the 200-level. Students may fulfill these credits by taking complementary courses from the list of the Non-ISLA Courses below.

Other Department Courses - History

Many of the courses in Jewish Studies are related to other departments, e.g., History, Religious Studies. There are also related courses in other departments which students specializing in certain areas of Jewish Studies might be encouraged to include in their programs, e.g., Classical Greek, Arabic, theories of literature, etc.

The following History department courses may be used as Jewish Studies courses in the Department of Jewish Studies programs. These courses have been included in the areas of study course lists above.

Expand allContract all

Jewish Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Jewish Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

In order to permit students flexibility within their chosen area, all courses in the Jewish Studies concentrations are placed into the category "Complementary Courses".

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

36 credits in Jewish Studies of which 24 are normally taken at the 300 level or above, selected as described below. Consultation with an adviser is strongly recommended.

Jewish History

6 credits (minimum) in the history of Jewish civilization to be chosen from:

Other Department Courses - History

Many of the courses in Jewish Studies are related to other departments, e.g., History, Religious Studies. There are also related courses in other departments which students specializing in certain areas of Jewish Studies might be encouraged to include in their programs, e.g., Classical Greek, Arabic, theories of literature, etc.

The following History department courses may be used as Jewish Studies courses in the Department of Jewish Studies programs. These courses have been included in the areas of study course lists above.

Jewish Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Jewish Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Requirements

Students who wish to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.00 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Langue et littérature françaises - Langue française Concentration Mineure (B.A. & Sc.) (18 credits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Description du Programme

Le programme « Concentration mineure en Langue et littérature françaises (option « Langue française ») » est offert en collaboration avec le Centre d'enseignement du français. Il s'adresse à des étudiant(e)s de français langue seconde qui ont déjà une bonne connaissance de la langue. Il vise l'acquisition d'un niveau de français équivalent au niveau B2 (« utilisateur expérimenté ») du Cadre européen de référence pour les langues dans les sphères universitaire, professionnelle, publique et personnelle.

Cette concentration mineure ne peut pas être convertie en concentration majeure. Pour être admis(e), l'étudiant(e) doit passer un test de classement au Centre d'enseignement du français.

Cours Complémentaires (18 crédits)

De 3 à 15 crédits de cours FRSL (Centre d'enseignement du français) répartis de la façon suivante :

Langue et littérature françaises - Études et pratiques littéraires Double Spécialisation (B.A. & Sc.) (36 credits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts, Bachelor of Arts and Science

Program credit weight: 36

Description du Programme

Ce programme, qui prépare aux études supérieures, offre une formation spécialisée incluant l'histoire des littératures d'expression française, l'analyse critique des œuvres et la théorie littéraire. La formation vise également à fournir aux étudiant(e)s les moyens de bien maîtriser l'écriture critique et les ressources de la langue. Les

étudiant(e)s suivent aussi bien des cours portant sur les études littéraires que des cours portant sur les pratiques littéraires. Ils et elles doivent en outre se spécialiser dans l'un ou l'autre grand domaine en choisissant entre trois orientations : « Études littéraires », « Crédit littéraire » et « Traduction littéraire ». L'inscription au programme presuppose une très bonne connaissance du français lu, écrit et parlé. Moyennes minimales requises : 3,00 pour l'ensemble des cours du programme et un CGPA de 3,00. Pour les détails quant aux jumelages possibles, consulter le site Web de la Faculté des Arts.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Langue et littérature françaises - Traduction Concentration (B.A. & Sc.) (36 credits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Description du Programme

Le programme de « Concentration majeure en Langue et littérature françaises (option « Traduction ») » offre une formation générale en traduction de l'anglais vers le français. D'abord pratique, cette formation fournit également des assises théoriques sur le fonctionnement de la langue ou les enjeux de la traduction. Elle favorise l'amélioration de la compréhension de l'anglais et des compétences rédactionnelles en français, compétences que l'étude de la littérature de langue française viendra renforcer. L'admission au programme nécessite une bonne connaissance du français et de l'anglais lus et écrits, de même que du français parlé ; cette connaissance est vérifiée à l'aide d'un test de classement, à la suite duquel l'étudiant(e) peut se voir imposer de suivre le cours FREN 239 Stylistique comparée.

Langue et littérature françaises - Études et pratiques littéraires Concentration (B.A. & Sc.) (36 credits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Description du Programme

Ce programme offre une formation générale qui inclut l'histoire des littératures d'expression française, l'analyse critique des œuvres et la théorie littéraire. Cette formation vise également à fournir aux étudiant(e)s les moyens de bien maîtriser l'écriture critique et les ressources de la langue. L'étude de la littérature s'y fait à travers les différentes pratiques que sont la création, la traduction et l'édition. Tou(te)s les étudiant(e)s sont amené(e)s à suivre aussi bien des cours portant sur les études littéraires que des cours portant sur les pratiques littéraires ; ils et elles doivent cependant choisir une majorité de cours dans l'un ou l'autre grand domaine. L'inscription au programme presuppose une très bonne connaissance du français lu, écrit et parlé.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Langue et littérature françaises - Études et pratiques littéraires Concentration Mineure (B.A. & Sc.) (18 credits)

Offered by: French Language & Literature (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

3 **Program credit weight:** 18

Description du Programme

Ce programme offre une introduction aux études littéraires de langue française et aux différentes pratiques littéraires que sont la création, la traduction et l'édition. Il vise également à fournir à chaque étudiant(e) les moyens de bien maîtriser l'écriture critique et les ressources de la langue. Il est possible de s'inscrire d'abord à ce programme et de le convertir par la suite en concentration majeure, moyennant l'ajout des cours requis pour répondre aux exigences de ce dernier programme. L'admission au programme nécessite une bonne connaissance du français lu, écrit et parlé.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Cours Complémentaires (18 crédits)

European Literature and Culture Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in European Literature and Culture provides students with a broad foundation for understanding the development and interconnectedness of European culture, and its relevance for the comprehension of today's world through the study of literature and the arts from the Middle Ages to modern times. Knowledge of a language other than English is not required to complete the program.

German Language Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

The Minor Concentration in German Language is designed to allow students to achieve linguistic proficiency in German and to introduce students to some of the major aspects of German culture.

This program may be expanded to the Major Concentration German Studies.

Students may begin at the intermediate or advanced level in their first year if they have taken German courses in high school or in CEGEP or through McGill Summer Studies.

Note: Beginners' and Intermediate language levels are offered either as a one-term intensive course or a two-term spanned course. Students choose which version of the level they prefer.

Complementary Courses (18 credits)

18 credits of language courses or any course above the 325 level given in the German language, selected from the following:

German Studies Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in German Studies provides an introduction to and critical understanding of a variety of aspects of German culture from the eighteenth century to the present day. It is designed to complement other forms of disciplinary and cultural inquiry, such as international studies, the digital humanities, and studies in other languages or geographic areas. Courses include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture.

This program may be expanded to a Major Concentration.

Complementary Courses (18 credits)

18 credits of courses in German literature, culture, and film taught in English or German selected from the following list.

A maximum of 6 credits of LLCU courses can be taken, with prior departmental approval.

Beginners' and Intermediate Language courses may not be applied towards this Minor Concentration.

German Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in German Studies provides students with a rigorous and broad inquiry into the major features that have defined German cultural life since the eighteenth century. Knowledge of the German language is a core component of the major concentration and normally courses towards the major concentration will be taught in German. Courses will include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture. Students will acquire the skills of critical reading and viewing that allow them to interpret complex works of art and evaluate their social and cultural significance.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are

met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

6 credits must be in pre-20th century literature and culture.

A minimum of 9 credits of literature, culture, and film courses taught in German.

A maximum of 6 credits of LLCU courses, with prior departmental approval.

German Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours – German Studies Component provides students with a rigorous and broad inquiry into the major features that have defined German cultural life since the eighteenth century. Knowledge of the German language is a core component of the Joint Honours Component and normally courses towards the Joint Honours Component will be taught in German. Courses will include the study of major works of literature, philosophy, film, theory, and visual art that have made a defining impact on German and European culture. Students will acquire the skills of critical reading and viewing that allow them to interpret complex works of art and evaluate their social and cultural significance.

Note: Beginners' and intermediate language levels are offered either as a one-term intensive course or a two-term spanned course. Students choose which version of the level they prefer.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Admission to the Joint Honours program requires departmental approval. Joint Honours students must maintain a GPA of 3.30 in their program courses, and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

6-18 credits to be chosen from among Hispanic Studies course offerings other than language courses, of which no more than 6 credits may be courses taught in English.

Note: Advanced Placement (AP) credits cannot be counted towards the Minor.

Hispanic Studies Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Department of Languages, Literatures, and Cultures – Hispanic Studies offers courses in the literature, intellectual history, and civilization of Spain and Latin America, as well as in the Spanish language. The Department's undergraduate and graduate programs are committed to expanding the liberal arts background of students by helping to develop the skills of communication and critical reasoning, and by providing insight into the culture of other regional, linguistic, and national groups. Enrichment in these areas reduces provincialism and broadens intellectual horizons, regardless of the professional interests or fields of specialization that may guide students in other facets of their university education.

McGill University has bilateral exchange agreements with the Universidad de Salamanca (Spain), the Universidad Nacional Autónoma de México, and the Universidad de las Américas, Puebla (Mexico), as well as with other leading universities in the Spanish and Portuguese-speaking world which allow student and faculty exchanges, and other collaborative ventures. Further information about these exchanges may be obtained from the Department or from the International Education website.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Italian Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.30 in their program courses and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Admission to Joint Honours requires departmental approval. Students wishing to register in the program should consult with the Department as early as possible. Students may register for Joint Honours in the first

year, instead of the second year, if in the opinion of the departments they are found to be qualified.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Latin American and Caribbean Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)**Degree:** Bachelor of Arts; Bachelor of Arts and Science**Program credit weight:** 36**Program Description**

The B.A.; Joint Honours Latin American and Caribbean Studies Component provides students with an interdisciplinary approach to the study of the Latin American and Caribbean region. Students wishing to study at the Honours level in two disciplines can combine Joint Honours programs in any two Arts disciplines. For a list of available

Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs." Joint Honours students should consult an adviser in each department to discuss their course selection and their research project. Joint Honours students are expected to maintain a program GPA of 3.30 and, according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Russian Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Languages, Literatures, Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Russian gives students a foundation in the language, literature, and culture of Russia from the 19th century to the present. It incorporates a balance of instruction in the Russian language, the opportunity to read selected texts in the original language, and to explore Russian language and culture through translated texts.

By arrangement with the Department and subject to University approval, transfer credits will be accepted from Department-approved exchange/immersion programs.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Russian Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Languages,Literatures,Cultures (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Prior to registering for each Joint Honours component, students must consult with advisers in the respective departments for approval of their course selection.

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00. Departments may require a higher program GPA. Joint Honours students must meet the requirements of both components of their program.

The specific course requirements for the 36-credit Joint Honours Component Russian program are determined on an individual basis in consultation with the student's program adviser(s).

The Honours thesis course, RUSS 490 Honours Seminar 01., is usually completed in the student's final year and is on a topic in Russian literature or culture agreed upon in consultation with the student's thesis advisor. It is to be written independently from the thesis that is required by the second program in which the student is pursuing their Joint Honours degree

¹ Note: Students must submit their Russian thesis project proposals to the Russian Studies departmental adviser by March 15th or November 15th of the preceding term for independent research courses.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Linguistics Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Linguistics (Faculty of Arts)
Degree: Bachelor of Arts; Bachelor of Arts and Science
Program credit weight: 18

Program Description

The Minor Concentration in Linguistics focuses on basic Linguistics, the scientific study of human language, including phonetics and syntax, theoretical linguistics (phonology, syntax and semantics); experimental linguistics (phonetics, laboratory phonology, language acquisition and psycholinguistics); computational linguistics; linguistic fieldwork and language revitalization; and language variation and change (sociolinguistics, dialectology and historical linguistics). The program is expandable to the Major Concentration in Linguistics.

Required Courses (9 credits)

Expand allContract all

Course	Title	Credits
LING 201	Introduction to Linguistics.	3
LING 330	Phonetics.	3
LING 371	Syntax 1.	3

Required courses must be completed at McGill unless Departmental permission is obtained.

Complementary Courses (9 credits)

9 credits in Linguistics chosen according to the student's interests. At least 3 of these credits must be at the 400 or 500 level. Only 3 credits at the 200 level may count towards complementary credits. Students who take LING 360 Introduction to Semantics. as one of their complementary courses may also count one of the following courses that are its prerequisites toward the complementary course requirement:

Course	Title	Credits
COMP 230	Logic and Computability.	3
MATH 318	Mathematical Logic.	3
PHIL 210	Introduction to Deductive Logic 1.	3

Linguistics Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Linguistics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Linguistics focuses on various aspects of linguistics, including theoretical linguistics (phonology, syntax and semantics); experimental linguistics (phonetics, laboratory phonology, language acquisition and psycholinguistics); computational linguistics; linguistic fieldwork and language revitalization; and language variation and change (sociolinguistics, dialectology and historical linguistics).

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

At least 9 of these credits must be at the 400/500 level.

Only 3 credits at the 200 level may count towards complementary credits.

Linguistics Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Linguistics (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students who wish to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see the "Overview of Programs Offered" page.

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.30 (B+ average) in their program courses and a minimum grade of B+ must be obtained in three out of four of the following courses: LING 330 Phonetics., LING 331 Phonology 1., LING 360 Introduction to Semantics., LING 371 Syntax 1., as well as in the Joint Honours Thesis, LING 481D1 Joint Honours Thesis./LING 481D2 Joint Honours Thesis.. According to Faculty of Arts regulations, Joint Honours students must also maintain a minimum CGPA of 3.00 in general.

The requirement for First Class Honours is a CGPA of 3.50 and a minimum grade of A- in the Joint Honours Thesis. Inquiries may be addressed to the departmental office or to the Adviser for Undergraduate Studies.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Only 3 credits at the 200 level may count towards complementary credits.

Mathematics Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration Mathematics is offered in two versions: an expandable version, for students who wish to leave open the option of expanding the program into a Major Concentration Mathematics, and a non-expandable version for students who know on entry into the Minor that they do not wish to expand it into a major concentration.

The Minor Concentration Mathematics may be taken in conjunction with a major concentration in some other discipline under option A of the Multi-track System. Students planning on taking the Major Concentration Mathematics and the Minor Concentration Mathematics as part of Multi-track option C should select the Supplementary Minor Concentration in Mathematics in place of this Minor concentration.

Under option C, it is not possible to combine the Minor Concentration Mathematics and the Minor Concentration Statistics. Students wishing to do this should instead take the Major Concentration Mathematics under option B (two major concentrations) and select a large number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

No overlap is permitted with other programs.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 18 credits required for the program.

Mathematics Major Concentration (B.A. & Sc.) (46 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 46

Program Description

The B.A.; Major Concentration in Mathematics aims to provide an overview of the foundations of mathematics.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Guidelines for Course Selection

Students who received advanced standing or the CEGEP equivalent of the 100-level Math courses listed below are no longer required to take them. Whenever an exemption without credits is granted for a 200-level and above required Math course, the latter must be replaced with a complementary course chosen in consultation with a program advisor.

Where appropriate, Honours-level courses may be substituted for their Majors-level counterparts. Students planning to undertake graduate studies in mathematics are urged to make such substitutions. If there is no major counterpart available for a course, please see a departmental advisor to discuss its inclusion into your program as a complementary course in the lower section.

Students interested in computer science should consider the courses MATH 317, MATH 318, MATH 327, MATH 340, MATH 417, and take the Minor Concentration Computer Science.

Students interested in probability and statistics should consider either taking the Minor Concentration Statistics under option C or taking the major concentration in statistics.

Students interested in applied mathematics should consider the courses MATH 317, MATH 319, MATH 324, MATH 326, MATH 327, and MATH 417.

Students interested in careers in business, industry or government should consider the courses MATH 317, MATH 319, MATH 327, MATH 417, MATH 423, and MATH 447.

Students who have done well in MATH 242 and MATH 235 at the end of their first term should consider, in consultation with their adviser and the instructors of the courses involved, the possibility of entering an Honours program in Mathematics, in Applied Mathematics, in Probability and Statistics, or a Joint Honours program in Mathematics and another discipline.

Statistics Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts

Program credit weight: 18

Program Description

The Minor Concentration Statistics is offered only in a non-expandable version, that is, one that cannot be expanded into the Major Concentration Mathematics.

The Minor Concentration Statistics may be taken in conjunction with a major concentration in some other discipline under option A of the Multi-track System, or together with the Major Concentration Mathematics and a minor concentration (which must be in some other discipline than Mathematics) under option C.

Under option C, it is not possible to combine the Minor Concentration Statistics and the Minor Concentration Mathematics. Students wishing to do this should instead take the Major Concentration Mathematics

under option B (two major concentrations) and select a large number of statistics complementaries.

For more information about the Multi-track System options please refer to the Faculty of Arts regulations under "Faculty Degree Requirements", "About Program Requirements", and "Departmental Programs".

No overlap is permitted with other programs.

Program Prerequisites

Students who have not completed the program prerequisite courses listed below or their equivalents will be required to make up any deficiencies in these courses over and above the 18 credits required for the program.

Statistics Major Concentration (B.A. & Sc.) (46 credits)

Offered by: Mathematics and Statistics (Faculty of Science)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 46

Program Description

The program provides training in statistics with a mathematical core. Taken together with the B.A.; Supplementary Minor Concentration in Statistics, these two programs constitute an equivalent of the B.Sc.; Major in Statistics program offered by the Faculty of Science. With satisfactory performance in an appropriate selection of courses, these two programs can lead to the accreditation "A.Stat" from the Statistical Society of Canada, which is regarded as the entry level requirement for a statistician practicing in Canada. Students interested in this accreditation should consult an academic advisor.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Guidelines for Course Selection

Students who received advanced standing or the CEGEP equivalent of the 100-level Math courses listed below are no longer required to take them. Whenever an exemption without credits is granted for a 200-level and above required Math course, the latter must be replaced with a complementary course chosen in consultation with a program advisor.

Students are strongly advised to complete all required courses by the end of U2.

History and Philosophy of Science Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Philosophy (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

History and Philosophy of Science at McGill is an interdisciplinary program that aims to provide students with an understanding of science through the study of both its historical development and of some of the fundamental philosophical principles upon which it rests. For more information about the program and events, please visit <http://www.mcgill.ca/hpsc>.

Complementary Courses (18 credits)

18 credits with a maximum of 9 credits at the 200 level selected as follows:

Philosophy of Science

6-12 credits of courses focused on the Philosophy of Science with no more than 6 credits at the 200 level chosen from the following:

Communication Studies (COMS)

Philosophy Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Philosophy (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Philosophy Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Philosophy (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Prior to registering for each Joint Honours component, students should consult an adviser in each department for approval of their course selection and their interdisciplinary research project (if applicable).

According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 and maintain a minimum program GPA of 3.00.

Admission to Joint Honours: Students must attain a 3.00 CGPA and have a 3.00 GPA in Philosophy courses.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Physics Minor (B.A. & Sc.) (18 credits)

Offered by: Physics (Faculty of Science)

Degree: Bachelor of Science; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The 18-credit Minor permits no overlap with any other programs. It contains no Mathematics courses, although many of the courses in it have Math pre- or corequisites. It will, therefore, be particularly appropriate to students in Mathematics, but it is also available to any Science student with the appropriate mathematical background.

Students in certain programs (e.g., the Major Chemistry) will find that there are courses in the Minor that are already part of their program, or that they may not take for credit because of a substantial overlap of material with a course or courses in their program. After consultation with an adviser, such students may complete the Minor by substituting any other physics course(s) from the Major or Honours Physics programs.

Physics Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Physics (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration Physics, which is restricted to students in the B.A. & Sc. or B.Sc./B.Ed., is a planned sequence of courses designed to permit a degree of specialization in this discipline. This program is insufficient to prepare a student for professional or graduate work in physics; students interested in pursuing a career in physics are advised to take the appropriate B.Sc. program in physics.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Political Science Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Political Science (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Political Science is an 18-credit program in four fields: comparative politics, international relations, Canadian politics, and political theory, including empirical methods.

Complementary Courses (18 credits)

18 credits selected as follows:

6 or 9 POLI credits at the 200 level. Each of these POLI courses must be in a different group, the relevant groups being: Canadian Politics, International Relations, Comparative Politics, Political Theory, and Methods.

The rest of the 18 credits (9 or 12 credits) must come from POLI courses at the 300 or 400 level in any group(s). Note, however, that to take a 300- or 400-level POLI course, students must have taken a 200-level POLI course in the same field.

No more than 6 POLI transfer credits can be used toward the program requirements.

POLI 490 Independent Reading and Research 1. and POLI 499 Honours Essay. are not open to students enrolled in the Minor Concentration.

Course lists for each group of political science courses are provided below.

Political Science Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Political Science (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Major Concentration in Political Science is a 36-credit program in four fields: comparative politics, international relations, Canadian politics, and political theory, including empirical methods.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Complementary Courses (36 credits)

36 credits of courses selected from the four main fields of political science (Canadian Politics, Comparative Politics, International Relations, and Political Theory) with the following specifications.

Only POLI courses at the 200-level or above (or their equivalent courses from other universities) can be counted toward this program.

No more than one-half of the credits (18 credits) may be taken in a single field of political science, unless the field is Comparative Politics in which case the maximum is 21 credits.

12 of the 36 credits must be taken at the 200 level. No more than 3 credits at the 200 level may be in any given group - the groups being Canadian Politics, Comparative Politics, International Relations, Political Theory, and Methods. All other 24 credits must come from 300- or 400-level POLI courses.

3 credits must be taken at the 400 level at McGill rather than as transfer credits. This requirement cannot be fulfilled with POLI 599 Internship: Political Science..

To take a 300- or 400-level POLI course, students must have taken a 200-level POLI course in the same field. Students are therefore expected to take all their 200-level courses in their first two years.

No more than 12 POLI transfer credits can be used toward the program requirements. POLI Methods courses at McGill do not have equivalencies from courses taken elsewhere.

Course lists for each group of political science courses are provided below.

Political Science Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Political Science (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours program in Political Science is a 36-credit program at the Honours level in two Arts disciplines. This program focuses on Political Science in four fields: comparative politics, international relations, Canadian politics, and political theory, including empirical methods.

Students may enter the Joint Honours program in U1. To enter, remain and graduate in Joint Honours, students must achieve/maintain a 3.3 average in their political science courses and more than half of the political science grades must be at the B+ level or higher. According to Faculty regulations, Joint Honours students must maintain a minimum CGPA of 3.00 in general. In addition to meeting these Political Science requirements, students must meet the requirements set forth by the other department.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Course (3 credits)

Course	Title	Credits
POLI 210	Political Science Research Methods.	3

Complementary Courses (33 credits)

33 credits of complementary POLI courses selected with the following specifications:

3 credits must be taken in POLI Methods courses at the 300 or 400 level. The 6-credit methods requirement (including POLI 210 Political Science Research Methods.) can only be fulfilled with courses taken at McGill. Credits transferred from other universities are not accepted for this purpose.

9 credits must be taken at the 200 level with no more than 3 credits in a given substantive field (i.e. Political Theory, Comparative Politics, International Relations, Canadian Politics). The remaining 24 credits must come from POLI courses at the 300 level and above.

At least 9 credits must be taken at the 400 level and above, including one mandatory 500-level Honours Seminar which must be taken at McGill.

No more than one-half (18 credits) of a student's political science credits may be in any one field (Canadian Politics, Comparative Politics, International Relations, Political Theory). However, if the field is Comparative Politics the maximum is 21 credits. Refer to the lists below for course choices in each field.

To take a 300- or 400-level POLI course, students must have taken a 200-level POLI course in the same field. Students are therefore expected to take all their 200-level courses in their first two years.

No more than 12 POLI transfer credits can be used toward the program requirements.

Course lists for each group of political science courses are provided below.

Psychology Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

Psychology is the scientific study of the mind and behaviour. The B.A. Minor Concentration Psychology (18 credits) is intended to compliment

the student's primary field of study by providing a focused introduction to specialized topics in psychology.

Program Requirements

Students registered in a Bachelor of Arts program in another department may pursue the Minor Concentration Psychology. This minor concentration is expandable for students who may wish to transfer into the Major Concentration Psychology at a later date.

Program Prerequisites (0-3 credits)

Students planning to enter the Minor Concentration Psychology program should have completed an introductory course in general psychology in CEGEP. Otherwise, they can complete it in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology. at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology. in their first year.

McGill Freshman students are recommended to complete the following course in their UO year:

Course	Title	Credits
PSYC 100	Introduction to Psychology.	3

Complementary Courses (18 credits)

6 credits selected from:

Course	Title	Credits
PSYC 204	Introduction to Psychological Statistics.	3
PSYC 211	Introductory Behavioural Neuroscience.	3
PSYC 212	Perception.	3
PSYC 213	Cognition.	3
PSYC 215	Social Psychology.	3

12 credits in Psychology at the 300 level or above.

Psychology Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Psychology is the scientific study of the mind and behavior. The B.A. Major Concentration in Psychology (36 credits) provides students with a basic overview, covering the core areas of psychological science as well as more advanced courses in specialized content areas. Students also have the option to complete a research course(s) (see Program Requirements for details). Note: this program may not

provide sufficient undergraduate background preparation for certain graduate programs. Students who wish to go on to graduate training in psychology, and those who wish to complete the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs), are advised to take the supplementary Minor Concentration Behavioural Science. This specialization option will give students the space to take the additional courses they may need for such applications.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Program Prerequisites (0-6 credits)

Students planning to enter the Major Concentration Psychology program should have completed an introductory course in general psychology and biology in CEGEP. Otherwise, they can complete them in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology in their first year.

Students who have completed Human Biology or General Biology 1 or 2 in CEGEP would have the recommended biology background. Students who have not completed one of those courses are advised to complete BIOL 115 Essential Biology or BIOL 111 Principles: Organismal Biology or BIOL 112 Cell and Molecular Biology during their first year.

McGill Freshman students are recommended to complete the following courses in their U0 year:

To be eligible to apply to the B.A. Joint Honours in Psychology, students must have completed a minimum of 27 graded credits in the academic year prior to applying (fall and winter terms only). All applicants must have taken PSYC 204 Introduction to Psychological Statistics., PSYC 211 Introductory Behavioural Neuroscience., PSYC 212 Perception., PSYC 213 Cognition., PSYC 215 Social Psychology. and PSYC 305 Statistics for Experimental Design.. Exceptional performance in these courses is a primary criterion for acceptance into the B.A. Joint Honours program. In addition to performance in these psychology courses, a minimum cumulative grade point average (CGPA) of 3.50 is required to apply. However, since enrolment is limited, the typical CGPA cut-off is ~3.75, although this varies from year to year depending on the applicant pool. Once in the B.A. Joint Honours program, students must obtain a GPA of 3.00 in the U2 year to continue in the B.A. Joint Honours program for U3. Students are also encouraged to continue to complete a minimum of 27 graded credits in their U2 and U3 academic years. This is also the minimum number of credits required to be eligible for fellowships and awards.

Psychology Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Psychology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

Psychology is the scientific study of the mind and behavior. The B.A.; Joint Honours Psychology Component (36 credits) provides students with an overview of psychological science, covering the core areas as well as select advanced courses. Students are required to take a 2-term research course and seminar; students also have the option to complete an additional research course (see Program Requirements for details). This program emphasizes practice in the research techniques and statistics used in graduate school and professionally later on. However, the Joint Honours Program is not as comprehensive as the B.A. or B.Sc. Honours Program, and does not give students the space to take the additional courses they may need for certain graduate programs in psychology or to complete the undergraduate credits in psychology as specified by the Ordre des Psychologues du Québec (which are required by some graduate psychology programs). Students must apply to the Joint Honours program; admission is selective.

Program Requirements

Students who wish to study at the Honours level in two Arts disciplines may apply to combine Joint Honours program components from two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection.

Admission to the B.A. Joint Honours Component Psychology is highly selective. Typically, students apply to the B.A. Joint Honours

The application is available on the Psychology Department website at: <https://www.mcgill.ca/psychology/undergraduate/current-students/research-opportunities/research-courses>. The deadline is specified on the website. Candidates will be informed of the Department's decision via email before classes begin in September.

Awarding of the B.A. Joint Honours program will depend on both CGPA and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "First Class Honours" is awarded to students who obtain a minimum CGPA of 3.50 and a minimum grade of A- in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology.. "Joint Honours" is awarded to students with a minimum CGPA of 3.00 and a minimum grade of B in PSYC 380D1 Honours Research Project Seminar./PSYC 380D2 Honours Research Project Seminar. and PSYC 306 Research Methods in Psychology..

In addition to the requirements of the B.A. Joint Honours Component Psychology, students must also complete all requirements of their other Joint Honours component.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).

- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Program Prerequisites (0-6 credits)

Students planning to enter the B.A. Joint Honours Psychology program, should have completed an introductory course in general psychology, biology and statistics at the CEGEP level. Otherwise, they can complete them in their first year of study at McGill University (see below).

Introduction to Psychology or General Psychology in CEGEP is equivalent to PSYC 100 Introduction to Psychology. at McGill. Students who have not completed either of those courses are advised to take PSYC 100 Introduction to Psychology. in their first year.

Students who have completed Human Biology or General 1or 2 in CEGEP would have the recommended biology background.

Student who have not completed ones of those courses are advised to complete BIOL 115 Essential Biology. or BIOL 111 Principles: Organismal Biology. or BIOL 112 Cell and Molecular Biology. during their first year.

McGill Freshman students are recommended to complete the following courses in their U0 year:

Religious Studies Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Religious Studies (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The B.A.; Joint Honours - Religious Studies Component focuses on the methodological approaches to the study of religious traditions, including the teachings, and history of those traditions.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable). A 3-credit Joint Honours thesis related to the student's area of focus must be submitted. The Joint Honours thesis topic must be approved by a Religious Studies adviser. A supervisor will be appointed to guide the student.

Students in Joint Honours program must maintain a program GPA and a CGPA of 3.00 (3.50 for First Class Honours) and attain a B- or higher in each program course. No overlap is allowed between the courses forming each component of the Joint Honours program.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Social Studies of Medicine Minor Concentration (B.A. & Sc.) (18 credits)

Offered by: Social Studies of Medicine (Faculty of Medicine and Health Sciences)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 18

Program Description

The Minor Concentration in Social Studies of Medicine presents as a complex network of institutions, cultures, and political relations embedded in the institutions, cultures and political relations of the larger society. Courses are divided into three groups: History of Medicine, Anthropology of Medicine, and Sociology of Medicine. The Minor consists of 18 credits. Students are required to take at least one course in each of the three groups.

Note: No overlap is permitted with courses counting towards the student's major concentration.

Complementary Courses (18 credits)

18 credits from the following (at least 3 credits from each of the three groups):

Sociology Major Concentration (B.A. & Sc.) (36 credits)

Offered by: Sociology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The purpose of the Major Concentration Sociology is to give the student a comprehensive understanding of the field of sociology.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Sociology Joint Honours Component (B.A. & Sc.) (36 credits)

Offered by: Sociology (Faculty of Arts)

Degree: Bachelor of Arts; Bachelor of Arts and Science

Program credit weight: 36

Program Description

The Joint Honours Component Sociology provides a greater focus on Sociology with substantial breadth and depth. The completion of a Joint Honours program is an asset when applying to graduate or profession schools.

Students wishing to study at the Honours level in two disciplines can combine Joint Honours program components in any two Arts disciplines. For a list of available Joint Honours programs, see "Overview of Programs Offered" and "Joint Honours Programs".

Joint Honours students should consult an adviser in each department to discuss their course selection and their interdisciplinary research project (if applicable).

Joint Honours students must maintain a GPA of 3.50 in their program courses, and according to Faculty regulations, a minimum CGPA of 3.00 in general.

Degree Requirements – B.A. students

To be eligible for a B.A. degree, a student must fulfil all Faculty and program requirements as indicated in Degree Requirements for the Faculty of Arts.

We recommend that students consult an Arts OASIS advisor for degree planning.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Sustainability, Science and Society Honours (B.A. & Sc.) (60 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 60

Program Description

The grand challenge of the 21st century is sustainable well-being; that is, to improve human well-being while maintaining the Earth's life-support systems. This B.A. & Sc. program provides the interdisciplinary and integrative knowledge and skills required to effectively understand and address this challenge in its multiple dimensions—scientific-technological, socio-economic, political-institutional, ethical, and human behavioural—and to chart a transition to sustainability. It is built upon three pillars:

1. Science and Technology, to provide an in-depth understanding of the underpinnings of the problems of concern along these dimensions;
2. Economics, Policy, and Governance, to understand how we can make the sustainability transition; and

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
 - The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.
- Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Required Courses (33 credits)

Sustainability, Science and Society Interfaculty Program (B.A. & Sc.) (54 credits)

Offered by: Geography (Faculty of Science)

Degree: Bachelor of Arts and Science

Program credit weight: 54

Program Description

The B.A. & Sc. Interfaculty Program in Sustainability, Science and Society focuses on the interdisciplinary and integrative knowledge and skills required to effectively understand and address challenges in transitioning to a sustainable future. Challenges are often defined by multiple dimensions, including scientific-technological, socio-economic, political-institutional, ethical, and human behavioural. The program is built on three pillars:

1. science and technology - to provide an in-depth understanding of the biophysical basis for current issues and challenges;
2. economics, policy, and governance - to understand how we can make the sustainability transition;
3. ethics, equity, and justice - to discuss why we need change, and the issues of equity and justice associated with taking action.

This program is offered in collaboration with the Bieler School of Environment.

Degree Requirements – B.A. & Sc. students

This program is offered as part of a Bachelor of Arts & Science (B.A. & Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Dentistry (Four-Year Program) (D.M.D.) (221 credits)

Offered by: Dental Med & Oral Health Sci (Faculty of Dental Medicine and Oral Health Sciences)

Degree: DMD

Program credit weight: 221

Program Description

The D.M.D. program focuses on simulation training and introduction to the clinical environment, which includes clinical training in the undergraduate teaching clinic. The Fundamentals of Medicine and Dentistry are taught in conjunction with the Faculty of Medicine and Health Sciences. The program includes rotations through various hospital departments, including Oral and Maxillofacial Surgery (at the Montreal General Hospital), Pediatric Dentistry (at the Montreal Children's Hospital), the Jim Lund Dental Clinic (at the Welcome Hall Mission in St. Henri), and the Alan Edwards Pain Management Unit (at the Montreal General Hospital).

Dental Preparatory (Dent-P) (B.Sc.) (30 credits)

Offered by: Science (Faculty of Science)

Degree: Bachelor of Science

Program credit weight: 30

Program Description

The five-year program consists of a Dental Preparatory (Dent-P) year followed by the regular four-year dental program. During the Dent-P year, students are registered in the Faculty of Science and must take courses totalling 30 credits. There are several required courses as well as a number of elective courses selected for the purpose of broadening and enriching their education.

Required Courses in Sciences (18 credits)

Elective Courses in Humanities (12 credits)

A student accepted to the Dent-P program will be required to register for a full year in the Faculty of Science. In that year, the student must take courses totalling 30 credits. Following the successful completion of this year, determined by a Student Promotion Committee, students will proceed into the first year of the four-year program. Students must obtain a minimum cumulative GPA of 3.5 with all individual grades "B" or higher for required courses and passing grades for all

complementary courses to be promoted into the first year of the D.M.D. program.

Note: Students failing to meet these requirements will be able to transfer into a B.Sc. and may reapply to the D.M.D. program following completion of the undergraduate degree. Please note that a grade of B in all courses would lead to a GPA of 3.0 and that a grade of B in required courses and grades below B in complementary courses would lead to a GPA below 3.0.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

General Practice Residency Program (Dentistry) (Cert.) (52 credits)

Offered by: Dental Med & Oral Health Sci (Faculty of Dental Medicine and Oral Health Sciences)

Degree: GC-GPR

Program credit weight: 52

Program Description

The General Practice Residency (GPR) program offers advanced postgraduate training in all aspects of general practice dentistry. Residents are exposed to a wide variety of dental and related medical specialties. The program also includes practical training in oral conscious sedation and certification in Basic Life Support (BLS) and in Advanced Cardiac Life Support (ACLS).

Selection of residents is based on academic standing and personal interviews. Applicants must be graduates of an accredited Canadian or U.S. dental school and be eligible for licensure in Quebec.

Candidates who have not graduated from high school in the province of Quebec must have successfully fulfilled the French language requirements of the Office québécois de la langue française before applying. For more information, please consult the following website: www.mcgill.ca/dentistry/general-residency-program.

DENT 576	Dental Residency Training 2.	17

DENT 577	Dental Residency Training 3.	17	The candidate must have completed a year of internship or a general practice residency or equivalent prior to commencing the program. The candidate has to be certified in ACLS (Advanced Cardiac Life Support) prior to starting the program.
DENT 578	Community Practice Rotations.	0	

Oral Surgery Internship (Cert.) (52 credits)

Offered by: Dental Med & Oral Health Sci (Faculty of Dental Medicine and Oral Health Sciences)

Degree: C-OSI

Program credit weight: 52

Program Description

The Oral Surgery Internship is a one-year certificate program to prepare students for admission to an Oral and Maxillofacial Surgery (OMFS) residency. Interns assist residents in providing patient care. The curriculum consists of lectures, seminars, journal clubs, and clinical activities.

One to two positions are available for Canadian citizens or permanent residents who have graduated from an accredited North American dental school, or are graduates of programs that have a contractual sponsorship agreement through the Faculty of Dental Medicine and Oral Health Sciences, McGill University.

For more information, consult <https://www.mcgill.ca/omfs/academic-programs/1-year-certificate-oral-surgery/>....

Oral and Maxillofacial Surgery (4-year program) (Cert.) (144 credits)

Offered by: Dental Med & Oral Health Sci (Faculty of Dental Medicine and Oral Health Sciences)

Degree: C-OMS

Program credit weight: 144

Program Description

McGill University, through the Faculty of Dental Medicine and Oral Health Sciences and the McGill University Health Centre, offers an advanced education program in Oral and Maxillofacial Surgery. The program is fully accredited by the Canadian Dental Association Accreditation Committee. It is a four-year program and commences on July 1 of each year. This program is only offered to candidates who are graduates of programs that have a contractual sponsorship agreement through the Faculty of Dental Medicine and Oral Health Sciences, McGill University and is not open to all candidates.

It is the intent of the program to develop both well-trained, practising oral and maxillofacial surgeons and surgeons who pursue academic careers and research. Therefore, an optional additional year is offered to residents who wish to complete the requirements for a Master of Science (M.Sc.) degree.

Candidates for this program must possess a D.D.S. or D.M.D. degree or the equivalent and be eligible to obtain a limited dental license from the Ordre des dentistes du Québec. (A limited license can be issued by the Ordre des dentistes du Québec without prior testing of French language competency.)

Oral and Maxillofacial Surgery (Integrated O.M.F.S. & M.D.,C.M.) (Cert.)

Offered by: Dental Med & Oral Health Sci (Faculty of Dental Medicine and Oral Health Sciences)

Degree: C-OMS

Program Description

McGill University, through the Faculty of Dental Medicine and Oral Health Sciences, Faculty of Medicine and Health Sciences, and the McGill University Health Centre, offers an advanced education program in Oral and Maxillofacial Surgery. The program is fully accredited by the Canadian Dental Association Accreditation Committee. It is a six-year program and commences on July 1 of each year.

It is the intent of the program to develop both well-trained, practising oral and maxillofacial surgeons, and surgeons who pursue academic careers and research. All residents will also complete an M.D.,C.M. degree through the McGill School of Medicine. For the full M.D.,C.M. curriculum please refer to www.mcgill.ca/study/faculties/medicine/undergraduate/programs/mdcm-doctoral-program...

Currently the six-year M.D.,C.M. & OMFS program is only open to dentists who are Canadian citizens or permanent residents of Canada, and have graduated from an accredited North American dental school. Candidates for this program must possess a D.D.S. or D.M.D. degree

or the equivalent and be eligible to obtain a limited dental license from the Ordre des dentistes du Québec. (A limited license can be issued by the Ordre des dentistes du Québec without prior testing of French language competency.)

Human Relationships, Diversity and Sexuality (Dip.) (30 credits)

Offered by: Educational and Counselling Psych (Faculty of Education)

Program credit weight: 30 credits

Program Description

The Diploma in Human Relationships, Diversity and Sexuality focuses on the complexity of relationships in a digital and global world. Taking an intersectional approach with an orientation toward social justice, topics include sexuality, culture, ability, media literacy, communication, advocacy, and leadership.

Required Courses (21 credits)

In addition to the above, other complementary courses may be approved by the Program Director.

Kindergarten and Elementary Education (B.Ed.) (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Requirements

The Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120-credit program) for a total of 150 credits.

The Kindergarten and Elementary Education program leads to certification to teach children between the ages of 5 and 11 years (kindergarten and elementary school). The program consists of academic and professional courses, as well as studies in pedagogy and educational foundations. Each year of the program provides a school-based practicum.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs," "Undergraduate Education Programs," and "Quebec Teacher Certification."

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in the subjects taught in elementary school, as well as to explore areas that are not normally taken as "teachable" subject area courses within B.Ed. programs (e.g. Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. Also recommended are any 100- or 200-level courses with the subject codes of ANTH (Anthropology), ENGL (English), GEOG (Geography), HIST (History), MUAR (Music-Arts Faculty), POLI (Political Science), PSYC (Psychology), RELG (Religious Studies), and SOCI (Sociology) and appropriate Music courses offered by the Schulich School of Music. For 200-level courses, information about any required prerequisites is found in the Minerva Class Schedule by "clicking on" the course CRN for registration. Check prerequisites before registering.

6 credits at the undergraduate level.

Kindergarten and Elementary Education (B.Ed.) - First Nations and Inuit Studies (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Requirements

The Bachelor of Education (B.Ed.) - Kindergarten and Elementary Education - First Nations and Inuit Studies program requires 120 credits and leads to teacher certification. Interested applicants must contact the Office of First Nations and Inuit Education for admission information; please call 514-398-4527.

Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of foundation courses (in addition to the 120 credit program) for a total of 150 credits. Students who are admitted as "mature students" are not required to complete the 30 credits of Foundation courses. These students are admitted to U1.

Please note that graduates of teacher education programs are recommended by the University for Quebec Certification to the Quebec Ministère de l'Enseignement supérieur. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

6 credits chosen from the Subject Area and/or the Methods and Curriculum and Pedagogy courses listed above. No more than 9 credits can be chosen from any one subject area.

Kindergarten and Elementary Jewish Studies (B.Ed.) (120 credits)**Offered by:** Integrated Studies in Ed (Faculty of Education)**Degree:** Bachelor of Education**Program credit weight:** 120 credits**Program Description**

Bachelor of Education (B.Ed.) - Kindergarten and Elementary Jewish Studies program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120-credit program) for a total of 150 credits.

The Kindergarten and Elementary program leads to certification to teach children between the ages of 5 and 11 years (kindergarten and elementary school). The program consists of academic and professional courses, as well as studies in pedagogy and educational foundations. Each year of the program provides a school-based practicum.

The Jewish Studies option is addressed to students enrolled in the Kindergarten and Elementary program who wish to teach Jewish studies as well as general studies. Students are encouraged to acquire a strong background in Bible, Jewish prayer, Jewish holidays, and Jewish history prior to registering in the option. Students lacking the

ability to teach in Hebrew should consider spending a semester at an Israeli university or seek other avenues to improve their language skills.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Ministry (Education). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs," and "Quebec Teacher Certification."

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in the subjects taught in elementary school, as well as to explore areas that are not normally taken as teachable subject area courses within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. Also recommended are any 100- or 200-level courses with the subject codes of ANTH (Anthropology), ENGL (English), GEOG (Geography), HIST (History), MUAR (Music-Arts Faculty), POLI (Political Science), PSYC (Psychology), RELG (Religious Studies), and SOCI (Sociology). For 200-level courses, information about any required prerequisites is found in the Minerva Class Schedule by clicking on the course CRN for registration. Check prerequisites before registering.

Electives (3 credits)

Kindergarten and Elementary Pédagogie de l'Immersion Française (B.Ed.) (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Requirements

The Kindergarten and Elementary Pédagogie de l'Immersion Française major is designed to meet the needs of students enrolled in the B.Ed. Kindergarten and Elementary program who wish to teach in French immersion contexts. It consists of 30 credits of French and second language education courses embedded within the regular B.Ed. Kindergarten and Elementary program. In addition, certain other course sections may be offered in French.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs," "Undergraduate Education Programs," and "Quebec Teacher Certification".

Competency in French

Students wishing to follow the Kindergarten and Elementary Pédagogie de l'Immersion Française major must demonstrate a high level of competency in French by providing proof that:

- i. The candidate attended a French-language institution for high school and/or university in Canada or elsewhere in the world for at least four consecutive years; or
- ii. The candidate attended a French-language university in Quebec for at least three consecutive years; or

iii. The candidate completed secondary V in a French-language institution in Quebec as well as a DEC at a French-language CEGEP.

Otherwise, they must have successfully completed the French Language Placement Test (FLPT) at the French Language Centre (McGill).

Pédagogie de l'Immersion Française (PIF) Foundation Year (U0)

Students from outside of Quebec may be required to complete the Foundation-option en français year (offered through the French Language Centre, Faculty of Arts). Students undertaking the Foundation en français year may be accepted into the PIF program by passing the McGill Test de Français Admission - PIF (TFA-PIF).

Major Education in Global Contexts (B.A. Education) (90 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: BA-ED

Program credit weight: 90 credits

Program Description

The B.A.(Education): Major Education in Global Contexts is intended to equip students with a strong grounding in educational theory, issues and challenges, with an emphasis on building in-depth understandings on key issues facing education in diverse global contexts. A foundational program, it provides a variety of pathways for future study or employment for our students in a range of government, educational, industry and community organizations. Students complete a 54 credit major in Education in Global Contexts addressing the core of the program, with the addition of an 18 credit minor in a complementary discipline (choice of three approved minors), and complete the degree with 18 credits of electives. The program includes an internship and opportunities for applied research. This program is a general degree mirroring the "Liberal Arts" degree, but specifically in the area of Education.

NOTE: This program does not lead to Teacher Certification for formal elementary/secondary classroom teaching in the Province of Quebec.

Foundation Program

Students whose highest level of education is high school (normally out of province) are admitted into Year 0 (U0) to complete the Foundation Program. Foundation students are required to complete 30 credits of introductory (100- or 200- level) courses of the students' choice (in addition to the 90-credit program), verified by an adviser , for a total of 120 credits. Students will not be granted permission to take first-year (U1) courses if the credits from the Freshman year have not been obtained. In consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. There are no required courses in the Foundation Program, though the department recommends that students use the opportunity to take 100- or 200- level courses in the subject areas that interest them or

are relevant to their chosen concentration. As well, the Freshman year offers students the opportunity to explore areas that are not typically taken as a course of study in the program.

1

Foundation Advising:

All Foundation students must have their Fall and Winter course selections verified prior to the start of classes. This can be done by email or by attending the group advising session in late August. To verify your course selection by email, send a message to edgc.advise@mcgill.ca with the subject "B.A.(Education) Foundation Course Selection" including your student ID number and Adviser name.

The department recommends the following courses:

B.A.; Minor Concentration in Educational Psychology

Subject to approval of program director and with permission from the offering unit of the Minor, students may complete an additional (second) Minor [either offered by the Faculty of Education or another faculty.] in order to fulfill the requirement of 18 credits of elective courses

Elective Courses (18 credits)

18 credits of electives selected from Faculty of Education offerings.

Exceptionally, students may be permitted to take courses elsewhere in the University with permission of the program adviser.

Music Education / Music Elementary and Secondary Concurrent Major (B.Mus./B.Ed.) (170 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 170

**** The concurrent Concurrent B.Mus./B.Ed. program is currently not offered; B.Ed. Music is open to applicants having already completed a Bachelor of Music****

Program Description

The Concurrent B.Mus./B.Ed. combines the Bachelor of Music (Major Music Education) with the Bachelor of Education (Music Elementary and Secondary).

Requirements are normally completed in five years and lead to certification as a school teacher in the Province of Quebec. Out-of-province students (or those without Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the Concurrent program) are required to complete 170 credits, normally in six years.

Applicants who already hold a Bachelor of Music degree from a North American university should apply directly to the Bachelor of Education in Music Elementary and Secondary (B.Ed. Music) program offered by the Faculty of Education <https://www.mcgill.ca/dise/progs/music>.

Notes:

1. Students majoring in Music Education in the jazz stream may take MUJZ 260 Jazz Arranging 1. with the permission of the instructor, per available space in the course, and if they have the prerequisite, MUJZ 161 Jazz Materials 2.. Alternatively, they may be asked to register for a different jazz stream course upon the recommendation of the Jazz Area Chair and/or the Music Education Area Chair.
2. In addition to meeting prerequisites/co-requisites for MUCO 230 The Art of Composition. or MUCO 261 Orchestration 1., students must obtain the relevant instructor's permission, per available space in the course, prior to registration. MUCO 260 Instruments of the Orchestra. is waived as a prerequisite for MUCO 230 The Art of Composition..

The B.Mus. Major Music Education program in the Schulich School of Music focuses on the development of prospective music educators as musicians. This is achieved both through core music history, theory, musicianship, and performance courses, as well as through different instrumental, vocal, and conducting techniques courses. Laboratory experiences provide an opportunity to develop facility with basic music rehearsing/teaching techniques, with emphasis on the ability to diagnose and correct technical and musical problems. The B.Ed. Music Elementary and Secondary program in the Faculty of Education focuses on the development of the musicians as educators. This is achieved through courses in educational foundations, music pedagogy, pedagogical support, and a practicum component comprised of four field experiences and supporting professional seminars.

The components of the 137-credit Concurrent Bachelor of Music - Major Music Education and Bachelor of Education - Music Elementary and Secondary (excluding the 33-credit Foundation Program) are as follows:

58 credits in Education

71 credits in Music

8 free elective credits

Program Prerequisites - Foundation Program

33 credits

Prerequisite Courses

33 credits distributed as follows:

4 credits (2 credits per term) Basic Ensemble Training

6 credits of Non-Music Electives

and 23 credits in the following course list:

Students who can demonstrate through auditions and placement tests that they have mastered the material in any of the courses below will be exempt from them and may proceed to more advanced courses.

First-year students enrolled in the Bachelor of Music program who have completed the Quebec Diploma of Collegial Studies (Diplôme d'études collégiales) in a Music concentration or equivalent, or students transferring from other universities or colleges, who have successfully completed a course in the history of Western music, will be exempted from the first-year Western Musical Traditions requirement (MUHL 186 Western Musical Traditions.).

Secondary English (B.Ed.) (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)**Degree:** Bachelor of Education**Program credit weight:** 120

Program Description

The Bachelor of Education (B.Ed.) in Secondary English program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate,

International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. in Secondary Education program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of courses in Education (including field experiences) and courses in the subject area of the teaching specialization. Students also take 6 credits of free electives. For all teacher education programs, course sequencing is highly structured. For this reason, the advising information in this Course Catalogue section must be used in conjunction with the summary companion document (Program Overview) found at <http://www.mcgill.ca/dise/progs/secenglish>.

The Secondary English program provides students with the learning opportunities needed to become proficient English teachers.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs," "Undergraduate Education Programs," and "Quebec Teacher Certification".

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in English, as well as to explore areas that are not normally taken as "teachable" subject areas within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. The list includes English literature courses that may be used toward the academic component of the Secondary English course requirements. Also included are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level.

Unofficial "Teachable" Subject Area (15 credits)

15 credits of designated courses for Secondary English Stream 2 students (Math, Social Sciences, or Science and Technology - see an adviser for course selection.)

Elective Courses (6 credits)

Note: Students who have chosen to do Stream 2 (33 credits in one teachable subject and 15 credits in another) will use 3 credits of electives to take the Secondary Teaching Methods course needed for their second unofficial teachable subject.

Secondary Mathematics (B.Ed.) (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Description

The Bachelor of Education (B.Ed.) - Secondary Mathematics program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120 credits for the program) for a total of 150 credits.

Note: Students entering this program from CEGEP or with Advanced Standing should have a strong background in their Mathematics courses. Students entering from CEGEP or with Advanced Standing without having completed two calculus courses and one linear algebra course (MATH 133 Linear Algebra and Geometry., MATH 140 Calculus 1., and MATH 141 Calculus 2. or their equivalents) will be required to

This integrated program consists of courses in Education (including field experiences) and courses in the subject area of the teaching specialization. Students also take 6 credits of free electives. For all teacher education programs, course sequencing is highly structured. For this reason, the advising information in this Course Catalogue section must be used in conjunction with the summary companion document (Program Overview) found at <http://www.mcgill.ca/dise/progs/secmath>.

The Secondary Mathematics program provides students with the learning opportunities needed to become proficient Mathematics teachers.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in Mathematics, as well as to explore areas that are not normally taken as teachable subject areas within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

Students in the Secondary Mathematics program must complete three Math prerequisite courses in their Foundation year, MATH 133 Linear Algebra and Geometry., MATH 140 Calculus 1., and MATH 141 Calculus 2..

In addition, students select courses from the recommended list below or other courses in consultation with the Program Adviser. The French Second Language (FRSL) courses suggested require a placement test to determine the appropriate course level.

Elective Courses (6 credits)

Secondary Social Sciences (B.Ed.) - History and Citizenship, Culture and Citizenship in Quebec (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Description

The Bachelor of Education (B.Ed.) - Secondary Social Sciences - History and Citizenship, Culture and Citizenship in Quebec program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120 credits for the program) for a total of 150 credits.

The aim of the B.Ed. Secondary Education Program is to prepare strong beginning teachers for the secondary school level. This integrated program consists of courses in Education (including field experiences) and courses in the subject area of the teaching specialization. Students also take 6 credits of free electives. For all teacher education programs, course sequencing is highly structured. For this reason, the advising information in this eCalendar section must be used in conjunction with the summary companion document (Program Overview) found at <http://www.mcgill.ca/dise/progs/secsocsci>.

The Secondary Social Sciences - History and Citizenship, Culture and Citizenship in Quebec program provides students with the learning opportunities needed to become proficient Social Science teachers with a strong knowledge base in the associated disciplinary areas. Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education

for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs," "Undergraduate Education Programs," and "Quebec Teacher Certification."

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation Program year is the time to take introductory-level courses in a teachable subject area, as well as to explore areas that are not normally taken within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. The list includes History, Geography, and Religious Studies courses that may be used toward the academic component of the Secondary Social Sciences course requirements. Also included are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level.

Electives (6 credits)

Teaching English as a Second Language (TESL) (B.Ed.) - Elementary and Secondary: Teaching Greek Language & Culture (120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Description

This program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French

Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120-credit program) for a total of 150 credits.

The program includes studies in language and language learning from linguistic, literary, social, cultural, and psychological perspectives, accompanied by field experiences. It prepares students to teach English as a Second Language (ESL) at both the elementary school level (including regular and intensive ESL) and the secondary school level (including regular ESL and ESLA - English Second Language Arts), and provides a base for adult and other ESL teaching. This program also prepares students to teach in Hellenic school settings. Students are encouraged to participate in a 'study away' semester in Greece.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

Additional Entrance and Language Requirements

All applicants must pass the English Language Proficiency Test (ELPT) set by the Department of Integrated Studies in Education and pass a Greek language proficiency test set by the Department of Classical Studies prior to being offered admission. Eligible applicants will be contacted by email with information on how to register for these two tests.

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in the subject field, as well as to explore areas that are not normally taken as academic subjects within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. In Quebec, ESL is taught within the French school system. Thus, proficiency in French is an asset for student teaching placements, and is a requirement for employment in Quebec.

Other language courses (selected from CLAS Greek/Latin; EAST Korean/Chinese/Japanese; GERM German; HISP Spanish, ISLA Arabic; ITAL Italian; RUSS Russian/Polish) are also good choices for the Freshman year.

Teaching English as a Second Language-TESL Elementary and Secondary (B.Ed.)(120 credits)

Offered by: Integrated Studies in Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Description

The Bachelor of Education (B.Ed.) - Teaching English as a Second Language - TESL Elementary and Secondary program requires 120 credits and leads to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Foundation courses (in addition to the 120-credit program) for a total of 150 credits.

The program includes studies in language and language learning from linguistic, literary, social, cultural, and psychological perspectives, accompanied by field experiences. It prepares students to teach English as a Second Language (ESL) at both the elementary school level (including regular and intensive ESL) and the secondary school

level (including regular ESL and ESLA - English Second Language Arts), and provides a base for adult and other ESL teaching.

Please note that graduates of teacher education programs are recommended by the University to the Quebec Ministry of Education for Quebec teacher certification. For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

The Department is committed to supporting students in the development and creation of their individual professional portfolios throughout their program.

Foundation Program

Students normally complete 30 credits in their Foundation (U0) year.

The Foundation year is the time to take introductory-level courses in the subject field, as well as to explore areas that are not normally taken as academic subjects within B.Ed. programs (e.g., Sociology, Psychology, Political Science, etc.). Students should also investigate the possibility of taking one of the First Year Seminar courses offered by the Faculty of Arts or the Faculty of Science.

In consultation with the Program Adviser, students may select courses from the recommended course list below or other courses. Included in the list are several French Second Language (FRSL) courses for which placement tests are required to determine the appropriate level. In Quebec, ESL is taught within the French school system. Thus, proficiency in French is an asset for student teaching placements, and is a requirement for employment in Quebec.

Other language courses (selected from CLAS Greek/Latin; EAST Korean/Chinese/Japanese; GERM German; HISP Spanish, ISLA Arabic; ITAL Italian; RUSS Russian/Polish) are also good choices for the Foundation year.

Elementary Education: Indigenous Education (B.Ed. for Certified Teachers) (90 credits)

Offered by: Faculty of Education

Program credit weight: 90 credits

Program Description

This 90-credit program is designed for teachers who are already certified to teach in elementary schools and who wish to earn a Bachelor of Education degree. Normally, a minimum of 60 credits must be taken in the program, and no more than 30 credits may be transferred from other institutions. Credits may be transferred from programs leading to the certificates in Educational Technology, Second

Language Teaching, Inclusive Education, or Indigenous Language and Literacy Education taken concurrently. Credit may also be transferred from the Certificate in Education for First Nations and Inuit, which is normally completed before the B.Ed. Students completing the Bachelor of Education for Certified Teachers following the Certificate in Education for First Nations and Inuit will have accumulated a total of 120 credits, 60 for the certificate and a further 60 for the B.Ed.

The Certificate in Indigenous Language and Literacy Education, the Certificate in Middle School Education in Indigenous Communities, or the Certificate in First Nations and Inuit Educational Leadership may be taken concurrently and completed within the Bachelor of Education for Certified Teachers if the required B.Ed. profile is fulfilled.

This program does not lead to further certification.

Complementary Courses

Candidates enrolled in the program complete 90 credits within the following general pattern.

Academic Concentration (30 credits)

30 credits in five (5) subject areas relevant to elementary education in a 12-9-3-3-3 pattern (i.e., 12 credits in one subject, 9 credits in a second subject, and 3 credits in each of three (3) other subject areas), or 30 academic credits in three subject areas in a 15-9-6 pattern.

Note: Subject areas relevant to elementary education, in broad terms, are the Arts (Art, Music and Drama), English, French, Science, Mathematics, Physical Education, Moral and Religious Education, Social Studies, Educational Technology, or an Indigenous language.

Cultural Development (15 credits)

15 credits of courses that will enhance the candidate's cultural development. These are to be chosen in consultation with the Director of Programs in First Nations and Inuit Education.

Education Concentration (30 credits)

30 credits. Normally the Education concentration is completed within the Certificate in Education for First Nations and Inuit.

Electives (15 credits)

15 credits selected by the candidate after consultation with the Director of Programs in First Nations and Inuit Education.

Education for First Nations and Inuit (Cert.) (60 credits)

Offered by: Faculty of Education

Program credit weight: 60 credits

Program Description

This 60-credit program provides an opportunity for Algonquin, Cree, Inuit, Mi'gmaq, Mohawk, and Naskapi people to become qualified as teachers. It is offered on a part-time basis in Indigenous communities throughout Quebec in collaboration with, for example, the Cree School Board, the Kativik Ilisarniliriniq and various Mi'gmaq, Mohawk, Algonquin and education authorities.

Quebec graduates of this program receive Quebec Ministère de l'Éducation certification to teach at the elementary school level in Indigenous schools.

On completion of the Certificate requirements, trainees may apply for admission to the Bachelor of Education - Kindergarten and Elementary Education - First Nations and Inuit Studies or Bachelor of Education for Certified Teachers program and consult the Program Adviser to determine Advanced Standing.

Time Limit

The time limit for completion of the 60-credit Certificate in Education for First Nations and Inuit is 12 years. The University reserves the right to request that a student retake a course or courses after a five-year period if it is felt that too long a break has occurred in the ongoing nature of the training.

First Nations and Inuit Student Personnel Services (Cert.) (30 credits)

Offered by: Faculty of Education

Program credit weight: 30 credits

Program Description

This program is offered by the Department of Educational and Counselling Psychology through Office First Nations and Inuit Education.

This 30-credit program is designed to provide Indigenous school personnel advisers with a training program that will enable them to learn about the principles and practice of personnel services as generally applied in educational settings, to help Indigenous student personnel advisers develop their personal skills, and to modify or adapt their services and the content to best suit the cultural and educational needs of Indigenous students; to encourage Indigenous student personnel advisers to take leadership in developing educational programs that address the social needs of their communities, to upgrade their academic qualifications and professional development; and to develop and make available, in English and in the languages of instruction, collections of professional and scholarly knowledge about students' needs, and services in Indigenous communities.

Bearers of this certificate will be qualified to work as educational and school personnel advisers within the employ of an Indigenous educational authority.

Middle School Education in Indigenous Communities (Cert.) (30 credits)

Offered by: Faculty of Education

Program credit weight: 30 credits

Program Description

This 30-credit program focuses on developing the particular skills and abilities required of the Indigenous teacher in the middle school of his/her community. It does not lead to provincial certification. Rather, it prepares Indigenous teachers, who are bilingual or have some knowledge of their Indigenous language and who have already established themselves as teachers, to teach students at this level in ways that are developmentally and culturally appropriate. The program focuses on the particular psychological, emotional, and social needs of Aboriginal adolescents and the teacher's role in facilitating the transition between elementary and high school.

This certificate may be taken concurrently and completed within the Bachelor of Education for Certified Teachers program if the requirements for the B.Ed. are fulfilled.

First Nations and Inuit Educational Leadership (Cert.) (30 credits)

Offered by: Faculty of Education

Program credit weight: 30 credits

Program Description

The 30 credit Certificate in First Nations and Inuit Educational Leadership will focus on the following 5 objectives:

1. developing the core competencies of educational leaders;
2. fostering a self-reflective leader able to partner with parents to create community outreach;
3. cultivating awareness of the holistic learning and developmental cycles of the child and the role of the educational leader in enhancing that development;
4. maintaining the inter-connectedness and continuity of community and cultural values and aspirations within the structure of the administration of the school and other educational milieu; and
5. understanding and supporting the pedagogical objectives and the administrative framework of the educational context and system.

Inclusive Education (Cert.) (30 credits)

Offered by: Faculty of Education

Program credit weight: 30 credits

Program Description

The Certificate in Inclusive Education is intended for regular class teachers, special educators, adult educators, and other educational personnel. The program provides a sequence of courses that will ensure a sound foundation for adapting curriculum and instruction for students with varying abilities, learning styles, and special needs. It strives to meet the needs of educators who must adapt to their changing roles in contemporary schools:

1. for general educators, to educate students with diverse needs in their heterogeneous classrooms, and
2. for special educators, to collaborate with other professionals working with exceptional students.

Physical and Health Education (B.Ed.) (120 credits)

Offered by: Kinesiology and Physical Ed (Faculty of Education)

Degree: Bachelor of Education

Program credit weight: 120 credits

Program Description

The Bachelor of Education (B.Ed.) - Physical and Health Education is a 120-credit program leading to teacher certification. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies prior to commencing the B.Ed. must also complete a minimum of 30 credits of Freshman courses (in addition to the 120 credit program) for a total of 150 credits.

The Physical and Health Education program prepares students to teach physical and health education at the elementary and secondary levels. In a unique structure interweaving academic studies, professional course work, and teaching practices over the course of study, students are rapidly given the opportunity to assume a teaching role; the extent of teaching involvement and expectations progressively building on additional academic and professional courses.

Please note that graduates of teacher education programs are recommended by the University for Quebec certification to the Ministère de l'Éducation, et L'Enseignement supérieur (MEES). For more information about teacher certification in Quebec, please refer to the Faculty of Education section under "Overview of Faculty Programs", "Undergraduate Education Programs", and "Quebec Teacher Certification".

Freshman Program

Freshman students are required to complete 30 credits of introductory (100- or 200-level) courses. Students will not be granted permission to take first-year (U1) courses if the credits from the Freshman year have not been obtained. For students considering a second teachable subject, the following areas are recommended: history, geography, English, or mathematics.

From the "Required Courses" list, Freshman students take the 0-credit course EDEC 215 English Exam for Teacher Certification. English Language Requirement. In addition, in consultation with the Program Adviser, students may select courses from the recommended course list below or other courses.

Electives (12 credits)

12 credits chosen from any of the University's course offerings to contribute to the student's academic proficiency and professional preparation. Students are encouraged to choose as they wish. However, beware that some courses have restrictions, pre-requisites and/or enrollment limitations.

Kinesiology (B.Sc.) (90 credits)

Offered by: Kinesiology and Physical Ed (Faculty of Education)

Degree: Bachelor of Science (Kinesiology)

Program credit weight: 90 credits

Program Description

The B.Sc.(Kinesiology) is a 90-credit program. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a four-year B.Sc.(Kinesiology) program, which includes a 30-credit Freshman year for a total of 120 credits.

The focus of the Kinesiology program is a comprehensive understanding of human movement. Kinesiology is a multidisciplinary field viewing human movement from social, historical, psychological, or biological perspectives. The program provides students with a breadth of theoretical knowledge as well as an opportunity to explore related areas in greater depth, including minor programs available elsewhere within the University.

An Honours program is available for particularly strong students. To qualify for the Honours program, students must obtain a CGPA of 3.3 after two years in Kinesiology and must retain this CGPA until graduation.

Graduation Requirement

Prior to graduation, students are required to show proof of certification in Standard Level Safety Oriented First Aid/Level C in Cardiopulmonary Resuscitation, or equivalencies.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are

Kinesiology - Honours (B.Sc.) (90 credits)

Offered by: Kinesiology and Physical Ed (Faculty of Education)

Degree: Bachelor of Science (Kinesiology)

Program credit weight: 90 credits

Program Description

The Honours version of the B.Sc.(Kinesiology) is a 90-credit program. Students who have not completed Quebec CEGEP, French Baccalaureate, International Baccalaureate, or at least one year of university studies are normally enrolled in a four-year B.Sc. (Kinesiology) program, which includes a 30-credit Freshman year for a total of 120 credits.

The Kinesiology - Honours program offers particularly strong students aspiring to continue their studies at the graduate level the opportunity to pursue more advanced coursework. The program requires the completion of a research project under the direction of a professor during the final year. To qualify for the Honours program, students must obtain a CGPA of 3.3 after two years in Kinesiology and must retain this CGPA until graduation.

Graduation Requirement

Prior to graduation, students are required to show proof of certification in Standard Level Safety Oriented First Aid/Level C in Cardiopulmonary Resuscitation, or equivalencies.

Degree Requirements – B.Sc.

This program is offered as part of a Bachelor of Science (B.Sc.) degree.

To graduate, students must satisfy both their program requirements and their degree requirements.

- The program requirements (i.e., the specific courses that make up this program) are listed under the Course Tab (above).
- The degree requirements—including the mandatory Foundation program, appropriate degree structure, and any additional components—are outlined on the Degree Requirements page.

Students are responsible for ensuring that this program fits within the overall structure of their degree and that all degree requirements are met. Consult the Degree Planning Guide on the SOUSA website for additional guidance.

Architecture (B.Sc.) (126 credits)

Offered by: Architecture (Faculty of Engineering)

Degree: Bachelor of Science (Architecture)

Program credit weight: 126 credits

Program Description

Program credit weight for CEGEP students: 98 credits

The B.Sc.(Arch.) program provides conceptual, technical, and procedural foundations for the professional M.Arch. program, which is accredited by the Canadian Architectural Certification Board and recognized as accredited by the National Council of Architectural Registration Boards in the US. Students entering the B.Sc.(Arch.) program complete first-year courses in general studies (including sciences, humanities, and social sciences), for which individuals entering with the Québec Diploma of Collegial Studies in Arts and Science or Pure and Applied Science (or equivalent) are generally granted transfer credits. All students then complete six terms of immersion in architecture, centered in studio courses exploring principles of design, norms of representation, cultures of construction, and the human experience of architecture. Studio-based learning is complemented by lecture courses on foundational knowledge. Complementary courses provide further opportunities to learn about how culture intersects with technology in the work of architecture, and students select electives to customize their learning experience.

Required Year 0 (Freshman) Courses (28 credits)

Generally, students admitted to the Architecture program from Quebec CEGEPs are granted transfer credit for the Year 0 (Freshman) courses and enter a 98-credit (six-term) program.

Course choices must be made through consultation with the Student Adviser for the Professional Programs.

All Year 0 students must successfully complete 10 credits from the following:

Expand allContract all

Course	Title	Credits
MATH 133	Linear Algebra and Geometry.	3
MATH 140	Calculus 1.	3
PHYS 131	Mechanics and Waves. ¹	4

¹ A PHYS course equivalent to Mechanics with labs may be substituted upon approval of the department.

All Year 0 students must also successfully complete 18 credits as follows:

3 credits from among any 100- or 200-level courses with the subject codes of ATOC (Atmospheric and Oceanic Sciences), COMP (Computer Science), ENVR (Environment), and EPSC (Earth and Planetary Sciences).

15 credits from among any 100- or 200-level courses with the subject codes of AFRI (African Studies), ANTH (Anthropology), ARTH (Art History), CANS (Canadian Studies), CATH (Catholic Studies), CLAS (Classics), COMS (Communication Studies), EAST (East Asian Studies), ECON (Economics), ENGL (English), FREN (French), FSCI (Faculty of Science), GEOG (Geography), GSFS (Gender, Sexuality, Feminist, and Social Justice), GERM (German), HISP (Hispanic Studies), HIST (History), INDG (Indigenous Studies), ISLA (Islamic Studies), ITAL (Italian), JWST (Jewish Studies), LING (Linguistics), LLCU (Languages, Literatures, and Cultures), MUAR

(Music - Arts Faculty), PHIL (Philosophy), POLI (Political Science), PSYC (Psychology), RELG (Religious Studies), RUSS (Russian), SOCI (Sociology).

9 credits of elective courses outside the School of Architecture must be completed, subject to approval by the Student Adviser.

Bioengineering (B.Eng.) (142 credits)

Offered by: Bioengineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 142

Program Description

The B.Eng.; Major in Bioengineering will

- provide students with the ability to apply systematic knowledge of biology, physical sciences and mathematics; and sound engineering foundations in order to solve problems of a biological nature; and
- prepare students for the broad area of bioengineering, incorporating both biology-focused biological engineering and medicine-focused biomedical engineering.

Students will acquire fundamental knowledge in bioengineering-related natural sciences and mathematics, as well as in the foundations of general engineering and bioengineering. Students will also acquire knowledge in one area of specialization of bioengineering:

- biological materials and biomechanics;
- biomolecular and cellular engineering; or
- biological information and computation

Required Year 0 (Freshman) Courses (29 credits)

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credits for Year 0 (Freshman) courses, except BIOL 112 Cell and Molecular Biology. Students from Quebec CEGEPs who have successfully completed a course at CEGEP that is equivalent to BIOL 112 Cell and Molecular Biology, may obtain transfer credits for this course by passing the McGill Science Placement Exam for BIOL 112. For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see www.mcgill.ca/

engineering/student/sao/newstudents and select your term of admission.

Chemical Engineering (B.Eng.) (143 credits)

Offered by: Chemical Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 143 credits

Program Description

Program credit weight for Quebec CEGEP students: 114 credits

Program credit weight for out-of-province students: 143 credits

The discipline of chemical engineering is distinctive in being based equally on physics, mathematics, and chemistry. Application of these three fundamental sciences is basic to a quantitative understanding of the process industries. Those with an interest in the fourth fundamental science, biology, will find several courses in the chemical engineering curriculum that integrate aspects of the biological sciences relevant to process industries such as food processing, fermentation, biomedical, and water pollution control. Courses on the technical operations and economics of the process industries are added to this foundation. The core curriculum concludes with process design courses taught by practising design engineers. Problem-solving, experimenting, planning, and communication skills are emphasized in courses throughout the core curriculum.

Certain students who take advantage of Summer session courses can complete the departmental program in three calendar years.

In some cases, students from university science disciplines have sufficient credits to complete the requirements for the B.Eng. (Chemical) program in two and a half years. Those concerned should discuss this with their adviser.

Students must obtain a grade of C or better in all core courses. For the Department of Chemical Engineering, core courses include all required courses (departmental and non-departmental) as well as technical complementary courses.

Note to CEGEP Students

If you have successfully completed a course at CEGEP that is equivalent to CHEM 212 Introductory Organic Chemistry 1. or CHEM 234 Topics in Organic Chemistry., you may obtain transfer credits for either or both courses by passing the McGill Science Placement Exam for the course(s). You must complete an application form available on the Science Placement Exam website and an application fee will be charged to your student account. Science placement exams take place in August and September before classes begin. If you pass the exam(s), transfer credits for the course(s) will be reflected on your transcript and your program credit requirements will be decreased to reflect these transfer credits. For information

on Science Placement Exams, including application deadlines, the application form, application fee, dates, times, and location of the exams, see www.mcgill.ca/exams/dates/science. If you do not pass the placement exams, you must register for CHEM 212 Introductory Organic Chemistry 1. and CHEM 234 Topics in Organic Chemistry. during your studies at McGill as outlined in your program requirements.

Required Year 0 (Freshman) Courses (29 credits)

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 114-credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

Civil Engineering (B.Eng.) (139 credits)

Offered by: Civil Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 139 credits

Program Description

Program credit weight for Quebec CEGEP students: 110 credits

The Civil Engineering program is comprehensive in providing the fundamentals in mechanics and engineering associated with the diverse fields of the profession, in offering choices of specialization, and in fully reflecting the advances in science, mathematics, engineering, and computing that have transformed all fields of engineering in recent years. The resulting knowledge and training enables graduates to not only enter the profession thoroughly well prepared, but also to adapt to further change.

The required courses ensure a sound scientific and analytical basis for professional studies through courses in solid mechanics, fluid mechanics, soil mechanics, environmental engineering, water resources management, structural analysis, systems analysis, and mathematics. Fundamental concepts are applied to various fields of practice in both required and complementary courses.

By a suitable choice of complementary courses, students can attain advanced levels of technical knowledge in the specialized areas mentioned above. Alternatively, students may choose to develop their interests in a more general way by combining complementary courses within the Department with several from other departments or faculties.

Required Year 0 (Freshman) Courses (29 credits)

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 110-credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams,

Advanced Levels, and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

Electrical Engineering (B.Eng.) (134 credits)

Offered by: Electrical & Computer Engr (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 134 credits

Program Description

Program credit weight: 134-137 credits

Program credit weight for Quebec CEGEP students: 109-112 credits

This program gives students a broad understanding of the key principles that are responsible for the extraordinary advances in the technology of computers, micro-electronics, automation and robotics, telecommunications, and power systems. These areas are critical to the development of our industries and, more generally, to our economy. A graduate of this program is exposed to all basic elements of

Required Year 0 (Freshman) Courses (25 credits)

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 109- to 112 credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see www.mcgill.ca/engineering/current-students/undergraduate/new-students and select your term of admission.

Elective Course

One 3-credit course at the 200-level or higher from any department at McGill, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering.

Enhanced Power Concentration

Students following this program must complete 16-17 credits of technical complementary courses.

The Institute for Electrical Power Engineering was recently established as a province-wide centre for electrical power engineering education. It is funded by industry, mostly Hydro-Québec, and provides a comprehensive program, state-of-the-art laboratory facilities, and a point of contact between industry and universities involved in power engineering.

Note: This program is open to students in the regular Electrical Engineering program only.

Here are some benefits of the concentration:

- A complete and up-to-date final-year program in electrical power engineering, with industry-sponsored and supported courses
- Access to industry-sponsored projects, internships, and new employment opportunities

Eligibility Criteria

Admission to the program is granted only in the Fall semester of every academic year. To be considered, the applicant must:

- be registered in the B.Eng. program (regular Electrical Engineering);
- have a cumulative GPA of at least 2.5;
- have completed or be registered in ECSE 362 Fundamentals of Power Engineering.;
- be able to complete the degree requirements within three semesters after initial registration in the concentration (excluding summer semesters);
- agree to follow the curriculum requirements set out below.

Selection Criteria

The number of students selected, expected to be between five and ten, will be subject to a specific agreement between the University and the Institute. Selection criteria for admission to the Institute will be based on the CGPA and on the curriculum vitae. The selection process for the scholarship may involve an interview with the committee presided by Hydro-Québec and the industrial partners. There is a possibility of an internship with Hydro-Québec.

Curriculum Requirements for Selected Students

Generally, unless the University has authorized specific substitutions, students must complete the degree requirements set out in this Course Catalogue with the following specifications:

Technical Complementaries and Laboratories (16 credits)

All students must take (or have taken) five courses from the following:

Required Courses (10 credits)

Course	Title	Credits
ECSE 464	Power Systems Analysis.	3
ECSE 465	Power Electronic Systems.	3
ECSE 470	Electromechanical and Static Conversion Systems.	4

Students must also complete ECSE 458D1 Capstone Design Project. (Capstone Design Project) and ECSE 458D2 Capstone Design Project.E on a practical project in power engineering, preferably at the Institute or with a company sponsoring the Institute.

Complementary Courses

6-7 credits from the following:

Expand allContract all

Course	Title	Credits
ECSE 403	Control.	4
ECSE 460	Appareillage électrique (Electrical Power Equipment).	3
ECSE 463	Electric Power Generation. ¹	3
ECSE 466	Réseaux de distribution. ¹	3
ECSE 467	Comportement des réseaux électriques. ¹	3
ECSE 468	Électricité industrielle (Industrial Power Systems).	3
ECSE 469	Protection des réseaux électriques. ¹	3

¹ Courses taught in French.

Note: ECSE 460 Appareillage électrique (Electrical Power Equipment),, ECSE 463 Electric Power Generation., ECSE 464 Power Systems Analysis., ECSE 465 Power Electronic Systems., ECSE 467 Comportement des réseaux électriques., ECSE 468 Électricité industrielle (Industrial Power Systems)., and ECSE 469 Protection des réseaux électriques. are courses sponsored by the Institute and taught at Polytechnique Montréal.

Electrical Engineering Honours (B.Eng.) (138 credits)

Offered by: Electrical & Computer Engr (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 138 credits

Program Description

Program credit weight: 138-141 credits

Program credit weight for Quebec CEGEP students: 113-116 credits

Entry into the Electrical Engineering Honours Program

The Honours program is a limited enrolment program and entry is highly competitive. There is no direct entry to the Honours program in the first year. Students may enter the Honours program in the following ways:

- Students from CEGEP will be admitted, on the basis of their grades, at the start of the third term.
- Students from outside Quebec will be admitted, on the basis of their grades, at the start of the fifth term.

To remain in the Honours program and to be awarded the Honours degree, a student must have completed at least 14 credits in each term since entering Electrical and Computer Engineering, except for the

final two terms of their degree, and maintained a CGPA of at least 3.30 since entering Electrical and Computer Engineering. In either of their final two full terms (i.e., Fall and Winter, or Winter and Fall) students may drop below 14 credits, provided the combined load for the two terms is at least 16 credits. For more information, please contact the Departmental office at 514-398-3943.

Required Year 0 (Freshman) Courses (25 credits)

Note: Students in the Honours Electrical Engineering program complete the Year 0 (Freshman) courses before entering the Honours program, as explained above.

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 113- to 116-credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

Program Description

Program credit weight: 133-136 credits

Program credit weight for Quebec CEGEP students: 108-111 credits

Program credit weight for out-of-province students: 133-136 credits

The Computer Engineering program provides students with greater depth and breadth of knowledge in the hardware and software aspects of computers. Students are exposed to both theoretical and practical issues of both hardware and software in well-equipped laboratories. Although the program is designed to meet the growing demands by industry for engineers with a strong background in modern computer technology, it also provides the underlying depth for graduate studies in all fields of Computer Engineering.

In addition to technical complementary courses, students in the program take general complementary courses in social sciences, management studies, and humanities. These courses allow students

3 to develop specific interests in areas such as psychology, economics, management, or political science.

Required Year 0 (Freshman) Courses (25 credits)

Generally, students admitted to Engineering from Quebec CEGEPs are granted transfer credit for these Year 0 (Freshman) courses and enter a 108- to 111 credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

Elective Course (3 credits)

One 3-credit course at the 200-level or higher from any department at McGill, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering.

Co-op in Software Engineering (B.Eng.) (141 credits)

Offered by: Electrical & Computer Engr (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 141-144 credits

Program Description

The B.Eng. Co-op in Software Engineering program focuses on the skills needed to design and develop complex software systems, and it includes mandatory co-op terms. The program emphasizes the application of the principles and techniques of engineering, computer science, and mathematical analysis to cover the lifecycle of engineering modern software applications.

Required Year 0 (Freshman) Courses (28 credits)

Generally, students admitted to Engineering from Quebec CEGEPs may be granted transfer credit for Year 0 courses

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see <http://>

www.mcgill.ca/engineering/current-students/undergraduate/new-stud... and select your term of admission.

One 3-credit course at the 200-level or higher from any department at McGill, approved by the Undergraduate Programs Office in the Department of Electrical and Computer Engineering.

Global Engineering (B.G.E.) (127 credits)

Offered by: Engineering - Dean's Office (Faculty of Engineering)

Degree: Bachelor of Global Engineering

Program credit weight: 120-127 credits

Program Description

The Bachelor of Global Engineering is designed to provide a combination of hard, technical skills in science and engineering, combined with soft, non-technical skills in the humanities, business/management, and languages. The program focuses on: 1) a strong foundation in mathematics, and all three principal scientific disciplines (physics, chemistry and biology), and 2) specialized engineering training in one of nine streams (Breadth, Biological, Chemical, Civil, Data Science, Electrical, Entrepreneurship, Materials and Mechanical). Moreover, the program is offered, by design, in an international setting (two years at CentraleSupélec in France, and two years at

Required Year 0 and Year 1 Courses

60 credits (120 ECTS credits)

Years 0 and 1 of the program take place at CentraleSupélec, in France, and the required Year 0 and Year 1 courses will be taken there. All remaining courses will be taken at McGill.

Complementary Courses (50-57 credits)

Global Engineering Technical Complementary Courses

41-53 credits

Upon their arrival at McGill in the third year, each student will take 41-53 credits in one of nine streams:

1. Breadth (p. 508)
2. Biological (p. 509)
3. Chemical (p. 509)
4. Civil (p. 509)
5. Data Science (p. 509)
6. Electrical (p. 510)
7. Entrepreneurship (p. 510)
8. Materials (p. 510)
9. Mechanical (p. 511)

The choice of stream will have been determined in advance, at the end of their second year of studies at CentraleSupélec. All streams have (stream-specific) core courses. Some streams have stream-specific technical complementaries and/or sustainability complementaries.

Stream 1: Breadth

45-48 credits (14 courses) must be taken, chosen as follows:

30 credits (9 courses) from List A

9-11 credits (3 courses) from List B

6-7 credits (2 courses) from List C

List A: Breadth Stream Core

30 credits

Mechanical Engineering (B.Eng.) (142 credits)

Offered by: Mechanical Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 142 credits

Program Description

The B.Eng. in Mechanical Engineering encompasses the following fundamental disciplines: design and manufacturing, materials and solid mechanics, thermodynamics and fluid mechanics, dynamics and control, mechatronics, mathematics and computational modelling. Application of engineering principles to the solution of practical problems through experimentation, design, and manufacturing.

Areas of focus include industrial engineering, numerical methods, controls and robotics, bioengineering, aeronautics, energy systems, and systems engineering.

Required Year 0 Courses (25 credits)

Generally, students admitted to Engineering from Quebec CEGEPs may be granted transfer credit for these Year 0 courses.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

Mechanical Engineering Honours (B.Eng.) (142 credits)

Offered by: Mechanical Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 142 credits

Program Description

This program is not currently offered

Program credit weight for Quebec CEGEP students: 113 credits

Program credit weight for out-of-province students: 142 credits

To prepare the mechanical engineer for a wide range of career possibilities, there is a heavy emphasis in our curriculum on the fundamental analytical disciplines. This is balanced by a sequence of experimental and design Engineering courses, which include practice in design, manufacturing, and experimentation. In these courses, students learn how to apply their analytical groundwork to the solution of practical problems.

The Honours program is particularly suitable for those with a high aptitude in mathematics and physics and gives a thorough grounding in the basic engineering sciences.

Special interests are satisfied by selecting appropriate complementary courses from among those offered with a specific subject concentration, such as management, industrial engineering, computer science, controls and robotics, bio-engineering, aeronautics, combustion, systems engineering, etc.

Required Year 0 (Freshman) Courses (29 credits)

Generally, students admitted to Engineering from Quebec CEGEPs may be granted transfer credit for these Year 0 courses and enter a 113-credit program.

For information on transfer credit for French Baccalaureate, International Baccalaureate exams, Advanced Placement exams, Advanced Levels, and Science Placement Exams, see <http://www.mcgill.ca/engineering/current-students/undergraduate/new-stud...> and select your term of admission.

SOCI 325	Sociology of Science.	3

Note: Enrolment in certain courses is subject to permission from the offering department.

¹ Note: Prerequisites will be strictly applied.
² Note: ENVR courses have limited enrolment.

Note: Management courses have limited enrolment and registration dates. See Important Dates at <http://www.mcgill.ca/importantdates>

Group B - Humanities and Social Sciences, Management Studies, and Law

3 credits at the 200 or 300 level from the following:

Faculty of Arts

200 or 300 level courses in the following departments excluding seminars, field courses, surveys, special/selected topics courses, courses with physical, natural or medical sciences, mathematics, and statistic contents, and courses reserved for major or Honours in the relative programs:

Anthropology (ANTH)

Art History & Communications (ARTH and COMS)

East Asian Studies (EAST)

Economics (ECON) (any 200- or 300-level course excluding ECON 227D1/D2 and ECON 337)*

French Language & Literature (FREN)* (excluding FREN 222 and FREN 333)

French Language Center (FRSL courses 200 level or higher)

History and Classical Studies (HIST and CLAS) excluding HIST 339

Inst for Gender, Sex & Fem St (GSFS)

Institute for Study of Canada (CANS, and INDG)

Islamic Studies (AFRI, and ISLA)

Jewish Studies (JWST)

Languages, Literatures, Cultures (GERM, HISP, ITAL, LLCU and RUSS)

Philosophy (PHIL) (excluding PHIL 210 and PHIL 310)

Political Science (POLI) (excluding POLI 311)

Religious Studies (CATH and RELG)

Sociology (SOCI) (excluding SOCI 211, SOCI 331, SOCI 342, SOCI 343 and SOCI 350)

OR from the following list:

* Restriction applies to the courses that are reserved for the majors and Honours.

¹ Note: Management courses have limited enrolment and registration dates. See Important Dates at <http://www.mcgill.ca/importantdates>

² Note: INTG 215 is not open to students who have taken INTG 201 and INTG 202.

³ Note: ENVR courses have limited enrolment.

Typical Program of Study

Students entering the program from CEGEP follow a different course of study from those entering from out of province. Students will be advised by the Department as to which courses they should select from the course lists above.

For a detailed curriculum, see <http://www.mcgill.ca/mecheng/undergrad/curriculum>.

For all minors and concentrations, students should complete a Course Authorization Form, available from the McGill Engineering Student Centre (Student Affairs Office) (Frank Dawson Adams Building, Room 22) or from the Undergraduate Program Coordinator, indicating their intention to take the minor or concentration.

Mechanical Engineering - Design (B.Eng.) (15 credits)

Offered by: Mechanical Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 15

Program Description

****This program is not currently offered****

Students in this concentration take five courses in the area of design, including the completion of an interdisciplinary project.

Students should complete a Course Authorization Form, available from the McGill Engineering Student Centre (Student Affairs Office) (Frank Dawson Adams Building, Room 22) or from the Undergraduate Program Coordinator, indicating their intention to take the concentration.

Total concentration credit weight: 15-16 credits

Required Courses (6 credits)

Expand allContract all

Course	Title	Credits
MECH 498	Interdisciplinary Design Project 1.	3
MECH 499	Interdisciplinary Design Project 2.	3

Complementary Courses

9-10 credits from the following:

Course	Title	Credits
ARCH 515	Sustainable Design.	3
CHEE 453	Process Design.	4
MECH 497	Value Engineering.	3
MECH 528	Product Design.	3
MECH 530	Mechanics of Composite Materials.	3
MECH 543	Design with Composite Materials.	3
MECH 565	Fluid Flow and Heat Transfer Equipment.	3
MECH 579	Numerical Optimization	3

Mechanical Engineering - Design Honours (B.Eng.) (15 credits)

Offered by: Mechanical Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 15

Program Description

****This program is not currently offered****

Students in this concentration take five courses in the area of design, including the completion of an interdisciplinary project.

Students should complete a Course Authorization Form, available from the McGill Engineering Student Centre (Student Affairs Office) (Frank Dawson Adams Building, Room 22) or from the Undergraduate Program Coordinator, indicating their intention to take the concentration.

Materials Engineering (B.Eng.) (148 credits)

Offered by: Mining & Materials Engineering (Faculty of Engineering)

Degree: Bachelor of Engineering

Program credit weight: 148 credits

Program Description

Program credit weight for Quebec CEGEP students: 119 credits

Students wanting to study Materials Engineering may only be admitted into the B.Eng.; Co-op in Materials Engineering program. There is no direct admission to the B.Eng.; Materials Engineering program (which does not include the work terms required for the Co-op program). Students can transfer from the B.Eng.; Co-op in Materials Engineering to the B.Eng.; Materials Engineering program once they have met certain requirements and obtained approval from the departmental adviser.
